Definition of Agriculture, Food & Natural Resources Education For New Jersey

“Agricultural Education prepares people for careers and professional leadership in production, processing, marketing, and distribution of agricultural products, and for related careers in plant and animal technology (including aquatic life), economics, education, mechanics and engineering, natural resources and environmental technology, politics and sociology, and international relations and trade.”

Definition of Supervised Agricultural Experience – SAE

“Planned, documented, practical activities conducted outside of the academic class time in which students develop and apply agricultural knowledge and skills.”

SAE programs are supervised by teachers, employers, parents/guardians and other adults who assist students in achieving their objectives. The experiences are agriculture-based, supervised, experience-centered, and individualized to meet the needs of diverse student clientele.

FFA Mission Statement:

FFA makes a positive difference in the lives of students by developing their potential for premier leadership, personal growth and career success through agricultural education.

The Three Essential Components of a Complete Program of Agricultural Education
