## Agricultural Film and Drip Irrigation Tape Recycling

The recycling program is open to all national-wide growers. Saves your landfill cost and save the environment.

We accept agricultural film, drip irrigation tape, nursery, green house film.

We arrange pick up.

Please prepare the plastics as followings:

- ✓ Shake the plastics remove all the contaminants such as soil, plant material, twine, mulch plastics, and etc.
- ✓ Only baled agricultural film and drip irrigation tape is accepted at the moment. You can get a higher price for the agricultural film and drip irrigation tape that baled separately; if the agricultural film and drip tape are baled together, the price is lower.  
Before bale the agricultural film and drip tape, the agricultural film and drip tape can be rolled up and tied with film or drip tape. Do NOT use twine or wire or anything else to tie the bundles.
- ✓ The agricultural film and drip irrigation tape shall be avoided from being exposed to sunlight if possible, because sunlight will degrade the material. If the materials cannot be stored indoors, please cover them with plastic sheet.
- ✓ Keep the material as dry and clean as possible.

Please contact AEIPLUS Inc to discuss your individual recycling needs, get quote for your plastics, as well as pick up arrangement and cost.

Our office hour from Monday to Friday 9:00AM to 4:30PM Eastern Time.

Thank you for recycling.
