REPORT OF THE EXECUTIVE DIRECTOR

Ms. Payne made the following comments:

- Bills in the Legislature

Ms. Payne stated there was a lot of activity in the Legislature regarding companion bills A1272 and S837. The legislation as drafted would amend the Right to Farm Act to give Right to Farm protection to a wide range of ag-tourism events, including "special occasion events." Special occasion events include weddings and other social and cultural gatherings. The bills are comprised of pieces of legislation that have been floating around on this issue for a couple of years. Unfortunately, the legislation is really unclear and not properly constructed. An interesting provision in this legislation would give Right to Farm protection to special occasion events at wineries in particular but then it says the municipality has most of the control, from site plan and traffic to noise and curfews. On the one hand, it is trying to give Right to Farm protection to these operations and on the other hand it kind of takes it away. The legislation is problematic on many levels.

Mr. Danser asked if the bills speak to preserved versus nonpreserved? Ms. Payne stated that the text of the legislation does not affect preserved farms; it only amends the Right to Farm Act. The bill statements both talk about the intent of this applying to both preserved and unpreserved farms and that is one of the big problems – that the legislation’s language as drafted is not effecting the intent of the statements. She stated the bills were passed by Assembly and Senate Committees on Monday and the legislation is posted for a vote in the Senate today. Yesterday, the State Board’s legislative committee met and the State Board issued a letter in opposition to the legislation for some of the reasons just stated. The other reason is that the legislation would really up-end the five years of work the SADC just completed on the On-Farm Direct Marketing AMP because it statutorily greatly expands the definition of agri-tourism with no deliberative process. New Jersey Farm Bureau also submitted a letter not supporting the bill in its current form. This legislation would have huge impacts on this program, on Right to Farm, if it is signed into law. The Secretary of Agriculture, the Farm Bureau and the State Board will continue to have their voices heard as this moves forward.

Mr. Johnson stated that he feels the spirit of this bill is good and that the subject keeps popping up and the SADC and New Jersey Farm Bureau keep batting it back. He asked how we can get involved in the process so that we get something that we can all live with. Ms. Payne stated that she didn’t want to speak on the Farm Bureau’s behalf but their letter said that it was not opposed to the bill in that it was a terrible bill that shouldn’t be passed, but they wrote a very long letter saying they think that these kinds of events are something that really need to be looked at carefully and that the SADC needs to go through the AMP process to define what the parameters of special occasion events on farms should be for Right to Farm and for farmland preservation. Basically, she thinks they have been pretty happy with the process we went through developing the On-Farm Direct Marketing AMP in terms of working with the agricultural community and the broader community. Mr. Johnson stated that the AMP didn’t address these points though. Ms. Payne stated that it didn’t and we knew it didn’t. She stated that the Farm Bureau is saying that we should go through a parallel process to deal with these issues. Whether the Committee has the same opinion, we will have to get to that.

Mr. Siegel questioned whether the legislation contained the provision from the original bill that allowed wineries on preserved farms to have events and obtain most of their income from those events. Ms. Payne stated that those provisions are

still in this bill. She stated that another unusual provision is that the legislation has a penalty clause. For the first offense, if a winery violates that income ratio, the SADC is supposed to go after them in civil court to fine them \$1,000. It would cost more to hire an attorney to do that. Then the second offense would be \$2,000, the third offense would be \$3,000 and the like. The irony of that is that Right to Farm is not something we enforce; it is a protection and if a property owner doesn't comply with the standard, then the protection is gone and the SADC does not force the owner to comply with Right to Farm. Those are some of the structural and legal problems of that bill.

Mr. Siegel stated that his opinion on the Dancer bill is that it would be unconstitutional to treat wineries differently from other direct marketing and farm market type operations. Why is wine different from grape juice or apple cider? How can you tell, say Terhune, they are under a different standard than someone who sells a fermented beverage? You would also be wiping out the control mechanisms over our ability to manage markets, which has been a big debate in the past several months here. The income standard becomes vacated and a person can then do anything they want at a farm market and sell anything and still has Right to Farm protections. Ms. Payne stated that was one of the points that the Farm Bureau made in their letter, that this issue is bigger than just wineries. She stated that the League of Municipalities has also been very aware of this all along and she thinks that the reason why all those provisions are in there giving all that deference to municipalities is to get the League's support, and she feels that is completely counter-intuitive to Right to Farm. What the bill means is if you are in a town that likes you as an operator, then you are good to go, and if you are in a town that doesn't then you have zero protections. That is not how Right to Farm works. Mr. Siegel stated that the other significant aspect for municipalities would be that one of the biggest questions regarding Right to Farm eligibility is whether the farm qualifies as a commercial farm. One of the measurements, as we saw in the Brodhecker case, is are you selling farm produce or not? Ms. Payne stated that Assemblyman Dancer's bill proposed basically allowing non-farm produce to be the majority of the income. Ms. Payne stated that the legislation, as drafted for wineries, says that the winery just has to be in compliance with the ABC's laws and regulations. A plenary farm license says that as long as you have three acres of vines you can ship juice and grapes from anywhere in the country or world for that matter and make and manufacture up to 250,000 gallons of wine a year, so that relationship between what is being grown and what is being produced has collapsed. Ms. Payne stated that the State Board of Agriculture's letter also reflects some of those concerns.

Mr. Johnson stated it isn't just wineries. He stated that he is sure everyone is aware that wedding and other life celebratory events are happening on farms throughout the state and there is tremendous demand. Personally, he feels it fits under the ag-tourism venue. Whether or not we can accept that, if we keep trying to lump this in with farm markets it is not going to work. It is different. Ms. Payne stated that is why during deliberations on the On-Farm Direct Marketing AMP she asked that they put that issue aside so that we could deal with marketing like we've contemplated. If this is a new and growing part of the agricultural industry and the SADC gets its head around that and the parameters for that, then we can deal with it on a separate track. But to try to take all of that, which is absolutely new, and try to incorporate it into the AMP was biting off too much. She stated that she hears him loud and clear and the issue is not going away. She felt the Committee should deal with the issue but her position is that this bill would do serious damage to the SADC's ability to do it in any reasonable way. She stated that she would keep the Committee posted going forward.

Mr. Johnson stated that he is on the Committee to speak for the agri-tourism industry in general. There is opportunity and these types of events could contribute greatly to the preservation of a lot of historic structures on farms and that is what this industry wants.

- On-Farm Direct Marketing AMP

Ms. Payne stated that the AMP will be published in the New Jersey Register on April 7th and then we will have an adopted published rule to start using for Right to Farm protection.

- Monmouth County's Preservation Program

Ms. Payne wanted to congratulate Monmouth County on preserving its 200th farm, one of the Lustgarten farms. It was a huge accomplishment. The SADC will send a letter recognizing that accomplishment to Monmouth County.

- New SADC Staff Person

Ms. Payne stated that the SADC will have a new staff person, David Clapp, on board effective April 7th. Mr. Clapp has been a Department of Agriculture employee and has worked very closely with the Natural Resources Conservation

Service (NRCS) and is a certified NRCS Conservationist. He will be part of the SADC's stewardship team and will help staff with the increasing number of issues we have relating to the stewardship of farms, such as erosion issues and management issues, to be able to help farmers deal with issues in a way that is compliant with the deed of easement. He will be a huge help with stewardship and Right to Farm matters.

- Solar Approval – Executive Director (Hansen Farm)

Ms. Payne noted that the Committee delegated routine solar development reviews on preserved farms to the staff and to the Executive Director for approval. She stated that staff promised to report to the Committee any time the SADC issued one of those approvals. She referred the Committee to the Administrative Review of Solar Projects spreadsheet showing the approval of one solar project on the Canright-Hansen Farm in Bethlehem Township, Hunterdon County. She reviewed the specifics with the Committee. No action was required for this agenda item. It is for informational purposes only.

COMMUNICATIONS

Ms. Payne reminded the Committee to take home the various articles provided in the meeting binders. She stated that in the aftermath of the SADC's decision regarding the Brodhecker matter last month, there is a copy of a letter dated March 26th from McGovern and Roseman, P.A., on behalf of Hampton Township and also a letter dated March 20th sent by the attorney for the Brodhecker Farm objecting to the SADC's decision and requesting a hearing in that matter. The SADC issued a final decision and when staff received this letter, she was uncertain about the SADC's legal options. Staff has been in consultation with the Attorney General's Office and if the Committee wants to hear more about options, it can discuss that in Executive Session to get an understanding of what some of the parameters would be. Then after that deliberation the Committee can take whatever action, if any, it finds appropriate. Mr. Brodhecker's attorney asked that the Committee be provided with their correspondence, which staff sent out to the Committee in advance of today's meeting. As soon as the SADC received the Hampton Township letter, that also was provided to the Committee by email.

Mr. Siegel stated that he read the letter dated March 20th from Ursula Leo and Richard Clark, Counsel for the Brodheckers, briefly and he questioned their assertion that the SADC decision reversed both the Sussex CADB decision and

the OAL decision without any sort of a hearing. He asked what they were talking about. Ms. Payne stated that the Right to Farm process is set forth in the Administrative Procedure Act so when someone appeals a CADB decision, the hearing is held at the Office of the Administrative Law. The Brodheckers were suggesting that there be another opportunity to be heard on the case. That has not been the SADC's procedure and it isn't the procedure in the Act. Mr. Germano stated that to his knowledge it isn't the procedure in any other State agency either. Mr. Siegel stated that is what he couldn't understand -- if they were asking for the SADC to conduct a plenary hearing, which he didn't think the SADC had legal authority to do. Mr. Danser stated that even with the courts if you appeal something it is done on the record typically. Ms. Payne stated that the Brodheckers are present today and will comment on the issue.

PUBLIC COMMENT

Tom Brodhecker thanked the Committee for the opportunity to speak today. He stated that in 1996 to 1998 when the State Board of Agriculture was working on the state Right to Farm Law, he was involved in the process and the biggest issue they had was how to decide what a farm can sell as ancillary or contributory so that it was fair to everyone concerned. They started making lists of things you can and cannot sell and they finally came out with the 49/51 percent rule. He stated that 49 percent of what you sell can be ancillary or contributory to your farm income but 51 percent or more must be grown, raised or manufactured by the farm. That was the limit they came up with and the reason they did was because if they started making a list for every circumstance that farms could eventually be involved in, a list was not going to work.

Mr. Brodhecker stated that this ratio is very limiting to the farm. This has been an issue with his operation and his case. He described for the Committee the origin and history of the complaints from a neighbor who lives directly across the street. After he received a cease and desist order from the Township for selling muck boots and gazebos, he called them and asked what he needed to do. The Township said he had to come in for a variance. They went in for a variance, he started just to go in himself and then he felt he should get the proper legal people to do this and they did. They retained the firm of Laddey, Clark and Ryan and they went in for their first variance. Ultimately, however, his attorney advised that they should put the variance procedure on hold until such time that they could go to the CADB with this issue. They respectfully asked for that delay, the Township granted it and they went to the CADB. Because his wife is the Chair of that CADB, the Township tried to prevent the CADB from hearing the matter and there was a two-year period where they went back and forth arguing over who would hear it.

Meanwhile, they were in limbo. In the meantime, there is a provision in the Right to Farm Act that says a site-specific agricultural management practice (SSAMP) should come under this 49/51% rule. Mr. Brodhecker stated that they put in for the SSAMP. During the hearing they were cross-examined by the Township and examined by anyone who wanted to examine them. They did everything by the book and they got a very favorable SSAMP granted to them by the CADB. The Township appealed this. They have always sold, with the pure intent in mind, something that is accessory or a need to the agricultural community in their county, which is now hobby farms, and there are a lot of them. Everything they do is geared to them. They don't compete with tractor supply or any of these organizations and he doesn't want to compete and he cannot compete with them. They can buy things much cheaper than he can. They try to get things the people need and cannot get readily at other places. They compete with Wal-Mart, which sells corn for deer. They sell corn for deer that they grew. Having said all this he would like to give his attorney an opportunity to speak to the Committee as well.

Ursula Leo, attorney for the Brodheckers, stated that she recognizes that a hearing is not provided for under the Right to Farm Act. However, under the law the CADB is presumed valid unless a certain legal factor is met and that factor isn't accepted unless there is a clear abuse or unreasonably and arbitrary exercise of discretion. When they read this proposed final decision, she doesn't see that in the SADC's proposed decision. It is concerning to them and upsetting to them that the finding of the County as well as the Office of Administrative Law (OAL), who were the ones that rightfully held the hearing, had all the evidence, listened to and saw hundreds of exhibits, they granted the SSAMP. Now we are getting this final decision from this agency that not only reverses that without a hearing, admittedly you don't have to have a hearing, but again there needs to be a clear abuse or there needs to be arbitrary or unreasonable exercise of discretion by the County or the OAL who heard everything. Now we are hearing that not only was the County wrong, not only was the OAL wrong but we've got these regulations that now we know are going to become effective April 7th, and even though this has been going on for seven years, we are going to apply those regulations to the Brodhecker farm. She stated that even applying the new definitions of complementary and supplementary, we meet them and we can argue that if we need to, but it is concerning again. Hopewell Valley Vineyard can have wine stoppers and wine coasters, but the proposed final decision tells us we cannot have fertilizer. How can we not sell the fertilizer that is produced by the cows and produced by the sheep on our farm? She stated that they went for a SSAMP because there was no AMP and the SADC has been working on that and she appreciates that but we are here for an SSAMP that the County heard, that the OAL heard and that applies directly to us. So now if you're the next CADB, the next farmer, you can sell wine stoppers, wine coasters but you cannot sell wood shavings for horses and you

cannot sell manure that is made from the animals on your farm. That is why we are here today and that is why she submitted the letter. They understand there is a veto period and now she understands that the minutes have been sent forward and if they need to pursue that they will, but like she said they are concerned about the procedure and the impact and therefore they are asking that the SADC reconsider for the reasons set forth in her letter. She would be happy to entertain any questions.

Phillip Brodhecker thanked the Committee members for serving on the Committee. The Committee has significance in agriculture in preserving farmland as well as upholding the Right to Farm Act, just as well as the CADBs. There are a lot of volunteers who put a lot of time into those boards. The Right to Farm Act has been changed and modified over the years, and the SADC recognizes the concerns as far as holding up in court the credibility and viability of it. No farm is the same; every farm has a lot of variation. There are a lot of produce farms and a lot of markets that sell peppers, tomatoes, blueberries, corn and peaches and he thinks that is great that everyone has that stereotypical farm market visual but those retail products go directly to consumers. Our farm is far from that. They raise crops, cattle, pigs, sheep, chickens, manure and feeds that we sell directly to consumers. Their consumers aren't the person who is buying blueberries to put on their table and eat. They are buying feeds and they are buying livestock to continue that process of production. He has quite a few farmers who do produce all these items and have a farm market themselves and they are purchasing seed from him to grow for those markets. There are a lot of other things they are purchasing so they are far from the stereotypical farm market. That is the purpose of the SSAMP. That is the purpose of the county level boards, just as the SADC is. Originally this was requested to come to the SADC but it sent it back to the County saying it has to go through the process, which is a very important thing. The SADC's decision really overturned a lot of significance in the county board's decisions and SSAMP. There is a lot of confusion in that decision and he can point out numerous instances of conflicting information if he had the opportunity, and one fine example was wood pellets. They sell wood pellets -- a soft wood pine pellet for bedding, strictly for livestock bedding. It can also be used as fuel, which he sees that the attorney has pointed out that he said it could be used as fuel. It is not economically viable to use it as fuel. It is not as efficient as the hard wood pellets and that is not what it is produced for or what it is marketed as. The SADC also specified that if a farm has sheds and they are selling sheds because they sell garden stuff and they sell nursery stock then they can sell sheds. He just had a customer come to him yesterday and he has been buying cattle from him for at least five years, and has been buying feed from him for those cattle because he is finishing them off and putting them in his freezer as well as selling them to other people. He said he needs a shed for his hay and his grain because he has been using the seed container and the hay and grain are getting moldy because of the

metal sides. Now you are telling me that I cannot sell my sheds if it's complementary to the products he is purchasing from me.

Mr. Brodhecker stated that there are inconsistencies throughout the document that really jeopardize this whole process. That is why he is requesting, if you are going to overturn a county board, to at least seek factual information and reevaluate the way that it is done. The SADC has the ultimate decision and that is an extremely important decision. This decision is going to have future ramifications on every other decision and every other Right to Farm complaint. He cannot over-emphasize the importance of that decision and that it is done right and proper. No, a hearing is not required, that is correct, but if you are going to overturn, at least seek the facts that those boards and the OAL were afforded. When they went to court in Newark, Hampton Township submitted a stack of papers that was 5 ½ inches tall. He doesn't think that anyone from the SADC looked through 5 ½ inches worth of paper before overturning those decisions. He is pretty sure the Judge did and she did that so that this volunteer board doesn't have to. So there is a process in place and that county board has a function and a service and that is what they did.

Tom Brodhecker stated that there is a question of why they did this. He stated that they could have rolled over, played dead and given up the gazebos and muck boots until the next time a neighbor complained that they were selling something else. They fought this for one reason. This case is going to set a precedent for how other cases are handled. This SSAMP is going to be so important to all the farmers in this state and if it doesn't come out right what is the use of having an SSAMP?

Frank McGovern representing the Township of Hampton stated that he was at the last SADC meeting and the last thing he wants to do is relitigate a case that has been in litigation since effectively 2009. He stated that there has been a lot of material submitted over the years and a lot of opportunity for debate, submissions, clarification and everything on the whole process. The last thing they want to do is to open this all up again and to hear it again. All three sides, counting Mr. Pierson who couldn't be here today, have invested a lot of time and effort into this. Mr. Brodhecker refers to setting a precedent. The precedent has already been set. The SADC has already established standards that are in effect that you are citing from when deciding Hopewell. You were citing back to an old draft AMP from 1994. These things have been in play for years. What you have done, he believes, is you simply applied what was already there to the facts of the case. The idea of there being a statewide impact, his concern is the opposite -- that you start changing the standards and/or re-applying them in a different way. That is going to have a statewide impact. This is a site-specific process and we are dealing specifically with the activities on that farm. Also with regard to the SADC's ability to

look at the proposed regulations that are out there that the SADC has spent years investing to develop, he is sure that those are based upon the SADC's own experiences with its own cases that came before it, from which you developed these particular guidelines. He thought it would be absolutely remiss if the SADC didn't look at those regulations because they are there from the SADC's own experiences and help you to determine how to apply the standards that are out there.

Mr. McGovern stated that the idea of any unfairness that may be implied in the process, that now you are applying a set of rules that are proposed, you have to look back to the very beginning of this process. In Brodhecker's own application, they made a direct reference to the SADC's proposed standards of that time in the 1994 guidelines and actually quoted from them at length in their application. That was all copied into the resolution recommending the AMP for them at that time. These things were out there, they were a known quantity. This was not a surprise. It is something we have all been working with over the years. The idea that there has been no shifting of a burden of proof because perhaps the board has already made its decision somehow without any problems or concerns, again you have to look at your own decision to refresh your memory as to each of the things that the county board had overlooked. A lot of the places they didn't even make an evaluation of some of these very material issues that were in play and then that got compounded at the Administrative Law Judge (ALJ) level as well on the products. The ALJ didn't even start an evaluation. She cited the Hopewell case and then that was it. She didn't go to the next step and say here is how it applies to these facts. But the SADC has done that and when he was here last month it was clear that this has been in discussion for many meetings and there has been a lot of investigation and research done on it by the staff and a lot of thought given to this as well. He would ask that the Committee doesn't take this unusual, extraordinary step of having a re-hearing, and reconsidering this whole issue. There are no more facts to look at and you have made your decision.

Tom Brodhecker stated that the Township spent two days going over with the Judge the products that they sold, item by item. They copied all of the webpages on their website plus the connecting pages that they shift you over to from other providers. They went over each item one by one, whether they should be allowed to sell that or not. The ALJ heard all of that, just about every single item that they sell. She did not say in her final writing that yes, they can sell this or that, because she understands the 49/51 percent rule. In fact, she came out to their farm to see the situation and visited with the farm, the Township and Mr. Pierson, who is their neighbor. She went back and then after looking it over, she found in 100 percent favor of the CADB decision. There was a portion of the CADB's hearing, about an hour or so that didn't get on the recorder and he thought that

was very important to her because the Township also had their expert witness testifying on why they should or shouldn't be allowed to sell these different items. They didn't go into it as extensively as they did with the Judge but they went into it. He thought that the Judge had all kinds of information to make a very fair decision. There was nothing left out or not looked at as far as her decision. He thought if she were sitting here today, you would find that the Township is not putting all the truth out.

Ms. Payne asked Ms. Leo if Brodhecker Farms obtained a copy of the ALJ's transcript. Ms. Leo stated no, that it was just a tape, a CD. She stated that what Mr. Brodhecker was just saying was that from the CADB hearing, there are about four or five transcripts, handwritten transcripts, and there is an hour that is missing from the transcript. Ms. Payne stated that she understands there was a transcript from the CADB's deliberations. Ms. Leo stated the ALJ's is just a disk. Ms. Payne stated so the transcript was not ordered. Ms. Leo stated that is correct.

Mr. McGovern stated to be clear he listened to the entire recording of the ALJ's proceedings and he didn't observe anything missing from that recording. He stated that at the county level he was actually there at the meeting. His recollection was that we are not talking about an hour but maybe five or ten minutes of time when the person operating the recorder realized there was a glitch.

Ms. Leo stated that she wanted to make sure it is understood that the Rutgers Cooperative Extension had two officers who went to the farm and prepared a report and that was part of the CADB decision.

NEW BUSINESS

A. Resolutions for Final Approval: County Planning Incentive Grant Program

SADC staff referred the Committee to two requests for final approval under the County Planning Incentive Grant Program. Staff discussed each request with the Committee and stated that their recommendation is to grant final approval, as presented and discussed.

It was moved by Mr. Germano and seconded by Mr. Siegel to approve Resolution FY2014R3(1) granting final approval to the following application under the County Planning Incentive Grant Program, as presented and discussed, subject to any conditions of said Resolution and subject to the correction to the language in the sixth "Whereas" as related below:

1. The Land Conservancy of New Jersey/Beaver Brook Farm, SADC# 21-0534-PG (Resolution FY2014R3(1))
Block 3400, Lots 400 and 1400; Block 3401, Lot 400, Hope Township, Warren County, 135 Net Easement Acres
State cost share of \$2,787.40 per acre for a total grant need of \$387,587.97, pursuant to N.J.A.C. 2:76-6.11 and the conditions contained in Schedule "C."
Base grant funding in the amount of \$386,301.30 and FY 2011 competitive grant funding in the amount of \$1,286.67 (total of \$387,587.97) will be utilized to cover the SADC cost share.

Discussion: The property is located in the Highlands Planning Area. It includes a 0.65-acre nonseverable exception area restricted to one single-family residence and a 1-acre nonseverable exception area restricted to one single-family residence. The County has requested to encumber an additional 3% buffer for possible final surveyed acreage increases. Therefore, 139.05 acres will be utilized to calculate the SADC grant need. Staff indicated that on the first page of the draft resolution under the sixth "whereas" it stated that the property had no exception areas but in the fifth "whereas" it listed two exceptions. Staff will correct the resolution by revising the sixth "whereas" to say ... "no pre-existing non-agricultural uses outside of the exception areas."

The motion was approved. (Chairman Fisher was absent for the vote.) (A copy of Resolution FY2014R3(1) is attached to and is a part of these minutes.)

Note: Mr. Johnson recused himself from any discussion/action pertaining to the following agenda item to avoid the appearance of a conflict of interest. Mr. Johnson is a member of the Burlington County Agriculture Development Board.

It was moved by Mr. Siegel and seconded by Mr. Germano to approve Resolution FY2014R3(2) granting final approval to the following application under the County Planning Incentive Grant Program, as presented and discussed, subject to any conditions of said Resolution and subject to the clarification regarding access as discussed below:

2. Mary-Ann Thompson and Fred Wright, SADC #03-0382-PG (Resolution FY2014R3(2))
Block 2101, Lot 5, Tabernacle Township, Burlington County, 112.902 Surveyed Acres
State cost share of \$2,141.20 per acre, for a total grant need of \$241,745.76, pursuant to N.J.A.C. 2:76-6.11 and the conditions contained in Schedule "D."

Discussion: The property is in the Pinelands Special Agricultural Production Area. It includes a 3-acre nonseverable exception area restricted to two single-family residences. There are 5.25 Pinelands Development Credits (PDCs) allocated to the property and as a result of the conveyance of the deed of easement to the County, all of the PDCs will be retired. The County is requesting \$241,745.76 from the FY2013 competitive grant eligibility.

Ms. Murphy stated that she had some questions regarding the access because it does appear to be surrounded by State parkland. She stated that at the time of the certification of value staff indicated they would look into that. She wondered if that was looked at and what the outcome was. Brian Wilson from the Burlington CADB stated that it was his understanding that it is a public road through the State forest. Ms. Murphy wanted to make sure there was legal access because things come up and people have what they think is legal access and then it's not and they have to come get access through a State park. Ms. Payne stated that staff will definitely double check to make sure. Ms. Murphy stated that her other question was regarding a provision in the deed of easement that says the land has to remain available for agricultural use. What does that mean for a cranberry farm? Normally that means you have to mow it once a year so it doesn't grow up and turn into a wetland or forest. Ms. Payne felt it would mean that it would not revert to a natural wetlands because if that occurs, and she thinks the period is five years, although she doesn't know if the timeframe is different in the Pinelands, but outside of the Pinelands if a farmer allows a low area, a pasture area, to revert for five years and a wetlands species reestablishes and a wetlands hydrology reestablishes, then the farmer cannot go back in and farm that ground. We would interpret that in the Pinelands as to not let the land revert to natural wetland because she didn't think we would get it back.

The motion was approved. (Mr. Johnson and Ms. Murphy abstained from the vote. Chairman Fisher was absent for the vote.) (A copy of Resolution FY2014R3(2) is attached to and is a part of these minutes.)

C. Attorney/Client Matters

1. Right to Farm – Final Decision
 - a. Hampton Twp. and Pierson v. Sussex CADB and Brodhecker Farm, LLC

Ms. Payne stated that as discussed in closed session the Brodheckers submitted a letter requesting reconsideration of the SADC's final decision in their site-specific agricultural management practice (SSAMP) matter. The Committee has had the opportunity to discuss that with its attorney in closed session to find out what its legal options are. At this point in time it is up to the Committee to make a decision, whether it is going to accept that reconsideration request or not.

Mr. Germano made a motion that the request to reconsider the Committee's decision be denied. Mr. Danser seconded the motion.

Chairman Fisher asked if he was to make a counter-vote what would need to happen. Mr. Siegel stated that Mr. Germano's motion would need to be voted out or it would need to be tabled. Mr. Stypinski stated that was correct.

Chairman Fisher motioned to table Mr. Germano's motion. Ms. Reade seconded the motion to table Mr. Germano's motion. Mr. Siegel stated that the Committee would now need to vote on Chairman Fisher's motion to table Mr. Germano's motion. To vote yes would be to table the motion, which means it goes away and a no vote means that the Committee gets to discuss a vote on his motion. Ms. Payne stated that Mr. Germano's motion is on the table. Chairman Fisher motioned to table that and Ms. Reade seconded it so she stated the Committee needs to vote on the decision to table the resolution and therefore a new motion can be made. Chairman Fisher called for a roll call vote on his motion to table as follows:

| | |
|----------------------------|--------|
| Cecile Murphy | Yes |
| James Requa | Yes |
| Brian Schilling | Absent |
| James Waltman | Absent |
| Denis Germano | Oppose |
| Jane Brodhecker | Absent |
| Ralph Siegel | Oppose |
| Alan Danser, Vice Chairman | Oppose |
| Torrey Reade | Yes |
| Peter Johnson | Yes |
| Douglas Fisher, Chairman | Yes |

Motion passed: 5 Yes Votes; 3 Oppose Votes; 3 Members Absent. Mr. Germano's motion to deny reconsideration is now tabled.

Chairman Fisher motioned to reconsider the Final Decision approved by the Committee at its February meeting. Mr. Johnson seconded the motion. Mr. Danser asked what that means. Does it mean we start all over, because Chairman Fisher didn't suggest a specific piece of it so that means it is a de novo hearing. Mr. Germano stated that as he interpreted the request it is limited to our decision about the items for sale. Mr. Danser stated that the motion was just to reconsider the decision. Chairman Fisher stated he can amend his motion to limit the reconsideration to the decision the Committee made about the items for sale. Mr. Johnson agreed to amend his second to the amended motion.

Discussion: Chairman Fisher stated that he believes, based on information about some of

the items being offered for sale, that the Committee has the opportunity and should discuss it further, perhaps even bringing in transcripts, the items that have been mentioned as for sale in this decision. Mr. Siegel asked who would be paying for these transcripts. Chairman Fisher stated we would. Mr. Danser stated that they are very expensive. Mr. Siegel stated that would be precedent-setting. Everyone who asks for a reconsideration, we are going to fund the production of the transcripts. Mr. Germano asked if Chairman Fisher would consider amending his motion to include that the moving party furnish transcripts, or at least that part of the hearing transcripts that dealt with the items for sale. Chairman Fisher stated he would be agreeable to that. Mr. Johnson stated it would be agreeable to him also as the seconder.

Mr. Siegel asked if this reconsideration would include the receipt of new information or is it going to limit itself to the record that we already have, meaning what we obtain from the ALJ? He stated that this letter from Laddey Clark asks for or implies that there should have been a hearing. Chairman Fisher stated he is not suggesting having a hearing. Mr. Germano stated that he believes the attorney conceded on the record that they are aware that they are not entitled to a re-hearing at this level. Chairman Fisher stated again that his motion is not for a re-hearing or new information. It is based on the transcript of what occurred.

Ms. Payne stated that the motion on the floor is to reconsider the final decision with the obligation to the moving party, which in this case would be the Brodheckers, to supply the transcript of the ALJ's proceedings to the SADC for consideration. Mr. Danser stated it wasn't the moving party, it would be the requesting party. Ms. Payne agreed. Mr. Germano stated that the reconsideration would be limited to the decision about the items offered for sale and because we are limiting our decision to that part, they don't have to produce a whole transcript, but just the transcript that dealt with that portion of the hearing. Chairman Fisher stated that was correct.

Mr. Siegel stated that a reconsideration is supposed to be because of a discovery of a grievous error or a major defect in the record and in his opinion that doesn't exist. Chairman Fisher stated that the only grievous error in his opinion was that the Committee didn't see the record or transcript.

The motion passes: 6 Yes Votes; 2 Oppose Votes; 3 Members Absent.

Ms. Payne inquired about timing and what else would need to be done. Mr. Stypinski stated that he would guess, because he is not familiar with what the agency's timing would be, that you would need to do this within 45 days, as if it were taking another look at the initial decision. That would bring us to the April 25th SADC meeting. Ms. Payne felt that would not give staff enough time. She stated that the furnishing of the transcript, the portion dealing with the items, would be critical for the Committee to meet that 45-day deadline. Chairman Fisher asked if there were extensions possible. Mr. Stypinski stated that there is a new statute and he isn't sure this would apply; he would have to do some research. They amended the Administrative Procedure Act (APA) to require the consent of all parties in more than one extension of 45 days. He doesn't know how this reconsideration interplays with that statute or amendment to the APA. Chairman Fisher stated that right now it stands at 45 days but he would also ask Mr. Stypinski that within a period of 5-10 days, could you find out whether or not it stands at 45 days. They will assume the clock is ticking at 45 days and you will find out if it can be extended because staff has indicated it would be difficult. Once you determine what can be done you will notify all parties if there is an extension.

Ms. Payne stated that the SADC's ability to function within this clock is going to be driven in great part by how quickly we are furnished with the transcript. She doesn't know how long it takes to get a transcript out of the OAL but she doesn't want the SADC caught between a statutory 45-day clock and not having the evidence before us. She wanted everyone to be aware of that.

Mr. Siegel asked Mr. Stypinski what happens at the 45-day clock on a reconsideration as he understands it. Mr. Stypinski stated that he didn't know. Mr. Siegel stated that normally the consideration would be cancelled. Mr. Stypinski responded yes, normally the original decision would stand. Ms. Payne stated that this new law that was passed basically said you need the parties to agree to get extension. Mr. Stypinski stated that he thought it was beyond the first extension so he thought it was the second extension. You could probably get the first extension without the parties and he believes it would be the

second extension but he would have to research it and let staff know.

Mr. Siegel stated that he had a new business item. He stated that a letter should be written to the recipients copied on the Laddey, Clark letter who serve in the Legislature, explaining to them that it has neither been the Committee's procedure nor its practice to conduct hearings on reviewing ALJ matters. The letter creates a very clear impression that this was expected and it is carbon copied to the legislators. Chairman Fisher stated that he and staff will take it under advisement. He stated that he wasn't sure it was our need to set the Legislature straight. Ms. Payne stated that she would support Mr. Siegel's position. The SADC usually doesn't let letters that go to the Legislature about our program go unanswered. We usually send follow-ups regardless. She would be glad to send something. Chairman Fisher stated that he still doesn't know yet and will take it under advisement.
