

NEVER

leave children in a car
for any amount of time,
for any reason.

Not with the window cracked.
Not because they're sleeping.

Not even for 1 Minute.

Inside your car, temperatures rise quickly.
If the exterior temperature is 80° F,
then inside temperature is:

in 10 min.

in 20 min.

in 30 min.

in 60 min.

On a hotter day a car parked in direct sunlight
could reach 118° F in as little as 20 minutes.
Even with the window cracked!
