#### Disclaimer:

- These maps provide information regarding the location of areas identified to date by the New Jersey Department of Environmental Protection (DEP) as habitat for endangered or threatened wildlife species.
- DEP may identify additional endangered or threatened species habitat at any time if there is sufficient evidence that an area qualifies as threatened or endangered species habitat.
- DEP may determine that an area shown on the maps as threatened or endangered wildlife habitat is not suitable for use as habitat. In that case, the area will no longer be classified as endangered or threatened species habitat.
- The maps will be updated periodically to reflect additional areas identified as threatened or endangered wildlife habitat, and to remove areas determined to be no longer suitable habitat for endangered or threatened wildlife.
- These maps show only areas identified as suitable habitat for threatened or endangered animal species, not threatened or endangered plant species. The DEP's method for identifying threatened or endangered plant species habitat can be found in the Department's Freshwater Wetlands Technical Manual, available from the Department's Office of Maps and Publications at (609) 777-1038.
- Any wetlands boundaries shown on these maps are approximate and are for guidance only. Therefore, these maps are not an accurate indication of whether DEP will classify an area as exceptional resource value wetland under the DEP's freshwater wetlands rules. To obtain a determination of whether or where wetlands are located on a property and the resource value classification of a wetland, contact the DEP and apply for a letter of interpretation under the freshwater wetlands rules, N.J.A.C. 7:7A-3.
