

## New Jersey's Species of Greatest Conservation Need (SGCN)

### Proposed Update of the SGCN List

The following table lists New Jersey's 657 Species of Greatest Conservation Need (SGCN), as updated for the 2015 State Wildlife Action Plan (SWAP). All of the state's indigenous wildlife species were evaluated using the best available assessments of conservation status and trends. A species must meet at least one of the chosen assessment criteria described in the table, *Criteria for Selecting Species of Greatest Conservation Need*, in order to be included on the SGCN list. The criteria category or categories met by each SGCN are indicated below.
