Subject: Oyster Creek Nuclear Generating Station Primary Containment Drywell Three Dimensional (3D) Analysis

Dear Assistant Commissioner Wittenberg,

In response to your letter dated February 7, 2008, AmerGen Energy Company, LLC (AmerGen) reaffirms its commitment to the US NRC to perform, prior to the period of extended operation, a three dimensional (3D) finite element structural analysis of the primary containment drywell shell. As indicated in AmerGen's January 14, 2008 letter to the NRC, a summary of the analysis will be submitted to the NRC confirming completion of the work. After AmerGen submits the summary to the NRC, authorized personnel including NRC Inspectors and New Jersey BNE staff may request access to review this work at the Oyster Creek site.

If you would like to discuss this matter further, please call me at Oyster Creek at (609) 971-2300, or our Vice President, License Renewal Projects, Mike Gallagher, at (610) 765-5958.

Respectfully,

Timothy S. Rausch  
Site Vice President  
Oyster Creek Nuclear Generating Station
