

ELLIOTT BRUCE
2391 CHURCH STREET
MANASQUAN, NEW JERSEY 08736

September 13, 2019

Dear Governor Murphy,

New Jersey has the ability to be a national leader on clean energy. First we have to stop making things worse. Please urgently impose a moratorium on all fossil fuel projects while we figure out what our state's clean energy future looks like.

I want a cleaner New Jersey for myself and my family.

Sincerely,

A handwritten signature in black ink, appearing to read 'Elliott Bruce', with a long horizontal flourish extending to the right.

Dear Governor Murphy,

Board of Public Utilities
Attn: Energy Master Plan.

I like 99% of all people want to see, drink,
+ live around Clean Water. We all want
New Jersey to be a national leader on clean
energy. We count on you to not let our
water get any worse.

If there is any chance of keeping fossil fuels to a
minimum and increase Solar + Wind use I am a fan.

I agree with the clean water action for you to
aggressively pursue emission reductions for all climate
pollutants to meet IPCC recommendations by 2030.
Utilize total life cycle economic, social, and health
costs of burning fossil fuels

There is only one Earth so we must do the
right thing to keep our water clean for the
next + next generation of people to enjoy.

Rob Cassner
Wall Twp. N.J

Board of Public Utilities

Attn: Master Plan

Dear Governor Murphy,

New Jersey has the ability to be a national leader on clean energy. First we have to stop making things worse. Please urgently impose a moratorium on all new fossil fuel projects while we figure out what our state's clean energy future look like.

Sincerely,

A handwritten signature in cursive script that reads "Melanie McCarthy". The signature is written in dark ink and is positioned above a horizontal line that spans the width of the page.

Dear Governor Murphy,

The Final Energy Master plan must
aggressively pursue emissions reductions
for all climate pollutants to meet
IPCC recommendations by 2030

Sincerely,

Kelly Ranno

Dear Governor Murphy,

Board Of Public Utilities
Attn: Energy Master Plan

New Jersey has the ability to be a national leader on clean energy. First we have to stop making things worse. Please urgently impose a moratorium on all new fossil fuel projects while we figure out what our state's clean energy future looks like.

Additionally, the final Energy Master Plan must:

- Amend clean energy definition to only include renewables like solar and wind, not fossil fuels
- Aggressively pursue emission reductions for all climate pollutants to meet IPCC recommendations by 2030
- Utilize total life cycle economic, social, and health costs of burning fossil fuels
- Accelerate new jobs in the green economy, especially with job training and a just transition

Governor Philip Murphy

State of New Jersey

Dear Governor,

As a free thinking politician you understand the pressures of groups to politically keep the status quo. Whether it is keeping the party line, or driven by economic gain, change is feared. Often, only a dynamic happening can shake the system.

We have known for years the growth of the human population and the technological advancements have put the natural course of environmental rhythm out of sync. We use resources with no regard to replacement, and at this point it is obvious we have put ourselves in danger. The city of Newark is an example of the needs of the masses being ignored until an essential like water is put in jeopardy.

There are many issues out there. As an intelligent man you are aware of most of them. Life, as we know it, will change in the not so distant future. A new approach is needed by our leaders. Inane plans like "conservation" do not work.

It will cost money and it will require discipline and education, but it must be done. We owe it to the next generations to follow the example of those who care.
