

Clean water

Dear Governor Murphy,
NJ has the ability to be a national leader on clean energy. We have to stop making things worse. Please impose a moratorium on new fossil fuel projects while we figure out what our state's clean energy future looks like.

Please amend a clean energy definition to not only include renewables like solar and wind, not fossil fuels.

Clean water and protecting the environment is important for today's youth.

Sincerely,

Katherine Penn

Dear Governor Murphy,

New Jersey must be a national leader on clean energy. First, we have to stop making things worse. Please urgently impose a moratorium on all new fossil fuel projects while we work on a clean energy future for the state.

Respectfully,
Robert Hufnain

Attn: Energy Master Plan

Dear Governor Murphy,

New Jersey has the ability to be a national leader on clean energy. First we have to stop making things worse. Please urgently impose a moratorium on all new fossil fuel projects while we figure out what our state's clean energy future looks like.

Additionally, the final Energy Master Plan must:

- Amend clean energy definition to only include renewables like solar and wind not fossil fuels
- Aggressively pursue emission reductions for all climate pollutants to meet IPCC recommendations by 2030
- Utilize total life cycle economic, social, and health costs of burning fossil fuels
- Accelerate new jobs in the green economy, especially with job training and a just transition

It is important that we make a difference now and act before it gets to a tipping point of no return. Our children deserve a future with clean water.

Sincerely,

Megan Comer
