

Bd. of P. Utilities
Attn: Energy
Master Plan

Gov. Murphy,

I voted for you
and was happy you won
your election.

However, it has been
too long to see any
progress in clean
energy. Please consider
limited bans on
plastics, ie - water bottles,
shopping bags.

Dear Governor Murphy

NY has the ability to be a national leader on clean energy. First we need to stop making things worse. Please impose a moratorium on all new fossil fuel projects while we figure out what our states energy future looks like.

Thank you

King Stewart
