

Dear Governor Murphy,

1 New Jersey has the ability to be a national leader on clean energy. First we have to stop making things worse. Please urgently impose a moratorium on all new fossil fuel projects while we figure out what our state's clean energy future looks like.

Additionally, the final Energy Master plan must:

- Amend clean energy definition to only include renewables like solar and wind, not fossil fuels
- Aggressively pursue emission reduction for all climate pollutants to meet IPCC recommendations by 2030
- Utilize total life cycle economic, social, and health costs of burning fossil fuels
- Accelerate new jobs in the green economy especially with job training and a just transition

It is always good to save the planet.  
We only have one Earth, where else are we going to live?

Sincerely, Phan Lam 481 Tappan Road  
07647

Dear Governor Murphy,

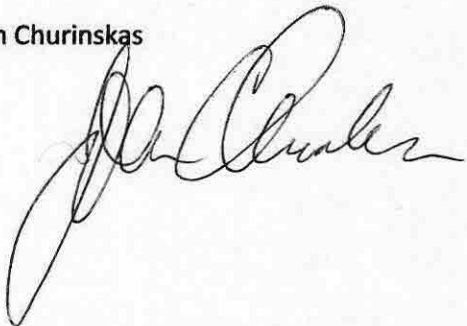

New Jersey has the ability to be a national leader on clean energy. First we have to stop making things worse. Please urgently impose a moratorium on all new fossil fuel projects while we figure out what our state's clean energy future looks like.

Additionally , the final Energy Master Plan must:

- Amend clean energy definition to only include renewable like solar and wind, not fossil fuels.
- Aggressively Pursue emission reductions for all climate pollutants to meet IPCC recommendations by 2030.
- Utilize total life cycle economic, social, and health costs of burning fossil fuels.
- Accelerate new jobs in the green economy, especially with job training and a just transition

This is important to my family and your family as our children's children will inherit what you and everyone in NJ do to the environment and our beautiful state of NJ. Solar and wind are free resources. The capital equipment cost to utilize a free energy source will be paid for in our lifetime. Our children and their children will tank us all for keeping their home a clean and healthy place to live.

Sincerely , John Churinkas

Dear Gov. Murphy,

New Jersey has the ability to be a leader on clean energy. First, we have to stop making things worse. Please immediately impose a moratorium on all new fossil fuel projects in order to figure out what New Jerseys clean energy future looks like.

Additionally, the final Energy Master Plan must:

1. Amend clean energy definition to only include renewables like wind and solar, not fossil fuels.
2. Pursue emission reductions for all climate pollutants to meet IPCC recommendations by 2032.
3. Utilize total life cycle economic, social and health costs of burning fuels.
4. Accelerate new jobs in the green economy, focusing on job training and a just transition.

This is important to me as a citizen not only of New Jersey but of the world and which I and my children have to live.

Sincerely,

New Jersey has the ability to be a national leader on clean energy. The plan must include a moratorium on ~~all~~ new fossil fuel projects until greenhouse gasses are effectively regulated. Other changes I would like to see include:

1. "100% Clean Energy" must be defined as "100% class 1. Renewable Energy"
2. There must be a realistic plan for a just transition for all workers
3. More opportunity for public engagement is needed

Sincerely,

Jacquelyn Mackins

Dear Governor Murphy,

My deepest apologies for writing to you on yellow cardstock! Tonight Clean Water Action knocked on my door and brought up NJ's need to get on board addressing the lead crisis, tackling the climate crisis + <sup>to</sup> stop all new fossil fuel projects.

Everyone has the need for clean air + water!  
NJ needs to ban plastic waste!

I deserve to feel that NJ is doing everything possible to stop global warming!

PLEASE make efforts to get NJ on board with all of these issues.

Thank you for immediate attention!

September 11, 2019

Dear Gov. Murphy

New Jersey has the ability to be a national leader in clean energy. Just we have to stop making things worse.

The Green New Deal must:  
Promote clean energy to renewables like solar, wind & some fossil fuels.

Aggressively pursue emissions reductions for all climate pollutants like your water in plastic jugs & bottles. — develop reusable bags & fill water to use when in need, not bottles.

Utilize total life cycle economics, reduce health costs of using fossil fuel —

Have more thought processes about working to follow on our thought instead of spending water & waste less — as fossil fuel but okay plastic to be made & used —  
Return to using glass not plastic.

Sincerely

Magaret M.

Re ENERGY MASTER PLAN

12 SEPT 2019

Dear Gov Murphy,

I'm writing to urge you to impose a moratorium on all new fossil fuel projects while a clearer vision of NJ's energy future is rendered.

The Final ENERGY PLAN must

- 1) AMEND clean energy definition to include only renewables like SOLAR and WIND, not fossil fuels.
- 2) AGGRESSIVELY PURSUE emission reductions for all climate pollutants to meet IPCC recommendations
- 3) Account for all the health, economic, and social costs of Fossil Fuels in annual State of NJ address, not buried in supplementary documents. Say it out loud.

Toward a future my great grandnieces and nephews can live in, in NJ

Dear Governor Murphy

I am counting on you to see  
the government that I voted for  
to make NJ a clean energy  
leader. So please:

- Impose a moratorium on  
all new fossil fuel projects  
immediately
  - Accelerate new jobs  
working in clean energy
  - Clean Energy Definition  
cannot include fossil  
fuels generated
  - Pursue emissions reduction  
in a strong way which is  
a large part of NJ pollution
  - Apply true cost of fossil fuels  
to include economic, social  
health cost
- Sincerely

Dear Governor Murphy,

NJ has the ability to be a national leader on clean energy.

We must stop making matters

worse + start investing on

new clean energy that benefits

the environment + the people

who live here. Please stop

the use of fossil fuels +

start using renewable resources

such as solar power. This

will help economically + socially.

It is important for us to raise a family in a clean state.

-Marisa Merdia

430 West Ave. Northvale

Dear Governor Murphy,

It is very important  
to me that we amend  
the definition of clean  
energy to only include  
renewables such as solar  
+ wind and NOT fossil fuels  
Also to utilize total life  
cycle economic, social  
+ health costs of burning  
fossil fuels

We must also accelerate  
new jobs in the green  
community, specifically  
job training + transition.

Sincerely

Lisa Carson
