COMPONENT I

2018 Pre- and Post-Doctoral Cancer Research Fellowship Awards

Executive Summary

The New Jersey Department of Health – New Jersey Commission on Cancer Research (NJDOH-NJCCR) announces the availability of Fiscal Year (FY) 2018 funds to support pre- and post-doctoral fellows who will conduct original basic, biomedical, behavioral or clinical science research related to the causes, prevention, survival and treatment of cancer.

Applications will be reviewed and scored objectively by a committee of experts. (See page 10 for Review Information.) The total project period is 24 months with a 24-month budget period and an anticipated award date of January 1, 2018.

A Technical Assistance Meeting will be held in October 31, 2017 for all fellows and research institutions that have submitted a Letter of Intent by October 27, 2017. This technical assistance meeting will provide the opportunity for potential fellows to review, clarify and ask questions about the information presented in this RFA. No further technical assistance on the RFA will be provided after this meeting.
The NJCCR funds research projects that focus on the genetic, biochemical, viral, microbiological, environmental, behavioral, socioeconomic, demographic and psychosocial aspects of cancer prevention, causes, development, treatment and palliation. Such research may include studies that relate to fundamental aspects of cancer, but these must include biologic systems, tissues, cells, human subjects and/or other materials that have a direct relationship to cancer.

NJCCR seeks to stimulate fundamental research by early-career scientists and scholars of outstanding promise. These two-year fellowships are awarded to scientists and scholars in recognition of their distinguished performance and unique potential to make substantial contributions to their field.

PURPOSE

The purpose of this granting vehicle is to lessen the burden of cancer in New Jersey. A total of 49,506 cases of invasive cancer diagnosed in 2014 among New Jersey residents were reported to the New Jersey State Cancer Registry (NJSCR), which is slightly lower compared to 50,254 reported cases diagnosed in 2013. During the period 2010-2014, a total of 248,205 cases of invasive cancer were diagnosed among New Jersey residents, comprised of 50.5% women and 49.5% men, which included 82.4% whites, 11.1% blacks, and 3.9% Asians and Pacific Islanders (API). Hispanics of any race accounted for 9.0% of the total cancer cases.

BACKGROUND

The NJCCR, whose members are appointed by the Governor, was established on January 17, 1983, with the passage of the "Cancer Research Act" by the New Jersey State Legislature. A central mission of the NJCCR is to promote significant and original research in New Jersey into the causes, prevention and treatment of cancer. The NJCCR also serves as an important resource to providers and consumers of cancer services in the State.

Funding for the NJCCR fellowships is fueled by revenue generated from the check-off boxes on the New Jersey State Individual Income Tax forms as well as proceeds from the specialty conquer cancer license plate available from the New Jersey Motor Vehicles Commission. The Governor’s FY 2018 State Budget included an allocation of $2 million for cancer research.

Administered through the NJDOH, the NJCCR provides fellowship awards to attract and retain talented young scientists who wish to pursue a career in cancer research in New Jersey. An independent evaluation of the NJCCR Pre- and Post-Doctoral awards programs has indicated that award recipients contribute significantly to their laboratories by identifying new research directions of relevance to cancer and improve opportunities for grants and contracts. Additionally, almost 70% of NJCCR post-doctoral fellows go on to pursue successful research careers in academia and the private sector.
