Dear Juvenile Justice Colleague:

I am pleased to present the 2007 juvenile detention statistics prepared by the Compliance Monitoring Unit. Please note that there are two sets of statistics attached. Since May 2003, the population capacity for the Union County Juvenile Detention Center has been capped at 34 residents. Union County male juveniles requiring secure detention have been transferred, as needed, to several neighboring county detention facilities: Middlesex, Morris, Sussex and Atlantic. Additionally, due to overcrowding the Camden County detention facility made arrangements to house females requiring secure detention from August through November 2007 in Burlington and Gloucester County facilities. This arrangement is no longer necessary due to Camden County moving into their new detention facility in December 2007. Also, due to the physical plant limitations of the Bergen County Juvenile Detention Center, a soft cap of 14 was placed on the facility as of January 2006. The County has made arrangements with Morris County to house, as necessary, Bergen juveniles needing secure detention.

Due to these exceptional circumstances, the 2007 detention statistics are presented in two ways. The first set of statistical tables, beginning with Table I, document the actual number of admissions and related child care days for each detention facility. In addition, a set of adjusted tables identified by an "A", beginning with Table I-A (Adjusted), are being provided, where applicable, to depict the figures for Union, Camden and Bergen counties, as well as the counties noted above, had Union, Camden and Bergen Counties been operating under usual circumstances.

The statistics include information on admissions, child care days, average daily population, and average length of stay. Two-year comparisons are provided as well as five-year statewide comparisons, where appropriate. Also, statistics are provided for county juvenile detention facilities which have juvenile detention commitment programs.

Please note that Cape May, Hunterdon, Salem and Somerset counties do not operate juvenile detention centers. These counties send juveniles needing secure custody to neighboring county juvenile detention facilities. In the case of Somerset County, all juveniles needing secure detention are transferred to the Middlesex County Juvenile Detention Center. For statistical purposes, Somerset County's admissions and child care days are listed separately from the Middlesex County figures in adjusted tables I-A through IX-A.

In closing, I hope the statistics are helpful to you and thank you for your interest in this matter.

Sincerely,

Veleria N. Lawson

SUBJECT: Statistics on Juveniles in Detention Facilities - 2007

Attached are the statistics on juveniles placed in detention facilities in New Jersey during 2007, prepared by the Commission's Compliance Monitoring Unit. The data was collected through the completion of forms (Monthly Population Report for Juvenile Detention Facilities) received from each county facility and verified, if necessary, by phone.

The population capacity for the Union County Juvenile Detention Center has been capped at 34 residents since May 2003. After reaching the cap, Union County has transferred male juveniles requiring secure detention to several neighboring county detention facilities. These include: Middlesex, Morris, Sussex, and Atlantic. For operational purposes in 2007, Union County male juveniles were first admitted to the Union County facility and counted as admissions, then transferred to the other detention facilities where the juveniles were again counted as admissions.

Due to overcrowding, the Camden County detention facility made arrangements to house females requiring secure detention from August through November 2007 in the Burlington and Gloucester County facilities. This arrangement is no longer necessary due to Camden County moving into their new detention facility in December 2007. Additionally, due to the physical plant limitations of the Bergen County Juvenile Detention Center, a soft cap of 14 was placed on the facility as of January 2006. The County has made arrangements to house, as necessary, juveniles needing secure detention in Morris County.

Due to these exceptional circumstances, the 2007 detention statistics are presented in two ways. The first set of statistical tables, beginning with Table I, *documents the actual number of admissions and related child care days for each detention facility*. In addition, a set of adjusted tables identified by an "A", beginning with Table I-A (Adjusted), is being provided, where applicable, to *depict the figures for Union, Camden and Bergen Counties as well as the counties noted above, had Union, Camden and Bergen Counties been operating under usual circumstances*.

With regard to Union County, the adjusted tables differ from the regular tables in that admissions and related child care figures for Middlesex, Morris, Sussex and Atlantic counties are lower on the adjusted tables, due to the subtraction of admissions and child care days of juveniles transferred to those counties from Union County. Consequently, the total child care days for those transferred are added to Union's total on the adjusted tables, while Union's admissions remain unchanged. Footnotes to the adjusted tables specify the nature of the differences as compared to the regular tables.

Regarding Camden County, the adjusted tables differ from the regular tables in that admissions and related child care day figures for Burlington and Gloucester counties are lower on the adjusted tables, due to the subtraction of admissions and related child care days of female juveniles transferred to those counties from Camden County. Consequently, the total admissions and child care days for those transferred are added to Camden's total on the adjusted tables.

For Bergen County, the adjusted tables differ from the regular tables in that admissions and related child care day figures for Morris County are lower on the adjusted tables, due to the subtraction of admissions and related child care days of juveniles transferred to Morris County from Bergen County. Consequently, the total admissions and child care days for those transferred are added to Bergen's total on the adjusted tables.

The reports present two-year comparisons as well as five-year statewide comparisons where appropriate. Please note that the statistics in Tables I through VII and Tables I-A (Adjusted) through VII-A (Adjusted) *do not include juveniles admitted to juvenile detention commitment programs*. All statistics in Table X and Table X-A (Adjusted) and thereafter, include all juveniles admitted to detention, predispositional as well as commitment program admissions, for the purpose of presenting a true reflection of the number of juveniles in detention facilities.

Tables XIV and XV present juvenile detention rates for the period from 2003 to 2007. There are several methods of determining juvenile detention rates and for this report we have selected two methods. The first is based on delinquency complaints filed, in each year. The second is based on population figures for statewide estimates of juveniles age 10 -17.

Detention rates based on delinquency complaints filed are calculated by taking the number of juveniles admitted to detention statewide, dividing by the number of delinquency complaints filed in court statewide, and multiplying by 100 for each calendar year 2003 - 2007. Tables XIV and XIV-A (Adjusted) provide the figures for detention rates per 100 delinquency complaints filed.

Detention rates based on population are calculated by taking the number of juveniles admitted to detention statewide, dividing by the estimated number of juveniles age 10-17, and multiplying by 1,000. Tables XV and XV-A (Adjusted) provide the figures for statewide population estimates for juveniles age 10 -17, admissions to detention statewide, and the detention rates per one thousand juveniles age 10 -17.

Please note that Cape May, Hunterdon, Salem and Somerset counties do not operate juvenile detention centers. These counties send juveniles needing secure custody to neighboring county juvenile detention facilities. Cape May, Hunterdon and Salem counties are not listed in the statistical tables as a result. In the case of Somerset County, all juveniles needing secure detention in Somerset County are transferred to the Middlesex County Juvenile Detention Center. For statistical purposes, Somerset County's admissions and child care days are listed separately from the Middlesex County figures in adjusted tables I-A through IX-A.

I would like to thank all the juvenile detention staff for their efforts in providing the data necessary to develop these statistics. Your cooperation is very much appreciated. If there are any questions, please feel free to call me at (609) 341-5056.

*Does not include juveniles admitted to juvenile detention commitment programs.

**Cape May, Hunterdon, Salem, and Somerset counties do not operate juvenile detention centers. These counties send juveniles needing secure detention to neighboring county juvenile detention facilities.

***The Camden County detention facility made arrangements to house females requiring secure detention from August through November 2007 in neighboring county facilities: Burlington, Cumberland and Gloucester. Also, in January 2006, a "soft cap" of 14 was placed on the Bergen Juvenile Detention Center. Subsequently, prior to reaching the "soft cap" Bergen county has transferred juveniles requiring secure detention to Morris County. Table 1, and subsequent non-adjusted tables, document the number of admissions and child care days for youth actually detained in each facility, as a result of those arrangements. As noted in the cover letter, a set of adjusted tables is also provided. Those adjusted tables depict the figures for Camden and Bergen counties as well as the receiving counties, had juveniles not been housed at the neighboring facilities. Due to the complexity of calculations in female admissions and child care days in Camden, minor discrepancies have resulted for Camden and Statewide figures between Table 1 and the adjusted Table 1-A. Additional minor discrepancies are found in subsequent tables with calculations involving female admissions and child care days.

****The population capacity for the Union County Juvenile Detention Center has been capped by the Juvenile Justice Commission at 34 residents since May 2003. Subsequently, after reaching the cap, Union County has transferred male juveniles requiring secure detention to several neighboring county facilities: Atlantic, Middlesex, Morris, and Sussex. In Table 1, those juveniles transferred are counted as Union County admissions and also counted as admissions for the counties receiving them. Additionally, due to the transfer of juveniles from Union County, the number of child care days in Table 1 for the receiving counties is increased, while the Union County child care days are decreased. Therefore, Table 1, and subsequent non-adjusted tables, document the number of admissions (including duplicate admissions) and child care days for youth actually detained in each facility. In contrast, adjusted tables depict the figures for Union County as well as the receiving counties, had there been no transfers from Union County.

2006	10,001	44,966	22.2
2007	9,501	44,381	21.4

* Detention rates were calculated by taking the number of juveniles admitted to detention statewide, dividing by the number of delinquency complaints filed statewide, and multiplying by 100 for each calendar year 2003-2007.

** Includes juveniles admitted to juvenile detention commitment programs.

*** Each year the figures for delinquency complaints filed are obtained from the Family Division of the Administrative Office of the Courts (AOC).

Please note there was an under-reporting of Atlantic County admissions for the years 2002-2005. As a result, the 2003-2005 admission figures have been adjusted.

*The population capacity for the Union County Juvenile Detention Center has been capped by the Juvenile Justice Commission at 34 residents since May 2003. Subsequently, after reaching the cap, Union County has transferred male juveniles requiring secure detention to several neighboring county facilities: Middlesex, Morris, Atlantic and Sussex. Also, in January 2006 a "soft cap" of 14 was placed on Bergen County Juvenile Detention Center. Subsequently, prior to reaching the "soft cap," Bergen County has transferred juveniles requiring secure detention to Morris County. An additional cause for adjustment was the housing of Camden County female juveniles from August through November 2007 in other detention facilities: Cumberland, Burlington and Gloucester. Table I and subsequent *non-adjusted* tables document the number of admissions and child care days for youth actually detained in each facility. All *adjusted* tables depict the figures for Union, Bergen and Camden Counties, as well as the counties noted above, had there been no transfer/alternate housing arrangements.

Adjustments to Table I in regard to Union County are as follows: Admission and related child care figures for Atlantic, Middlesex, Morris, and Sussex counties are lower here as compared with the Table I figures, due to the subtraction of admissions and child care days of juveniles transferred to those counties from Union County. In addition, the total child care days for those transferred are added to Union's total, while Union's admissions remain unchanged.

Adjustments to Bergen County are as follows: Admission and related child care figures for Morris County are lower here as compared with the Table I figures, due to the subtraction of admissions and child care days of juveniles transferred to Morris County from Bergen County. In addition, the admissions and child care days for those housed in Morris County are added to Bergen's total. Adjustments to Table I in regard to Camden County are as follows: Admission and related child care figures for Cumberland, Burlington and Gloucester counties are lower here as compared with the Table I figures, due to the subtraction of admissions and child care days of female juveniles housed in those counties. In addition, the admissions and child care days for those housed in other counties are added to Camden's total.

Overall, the statewide total for admissions is reduced, while the statewide total for child care days remains unchanged. Due to the complexity of calculations in female admissions and child care days in Camden, minor discrepancies have resulted for Camden and Statewide figures between Table I and the adjusted Table I-A. Additional minor discrepancies are found in subsequent tables with calculations involving female admissions and child care days.

**Does not include juveniles admitted to juvenile detention commitment programs.

*** Cape May, Hunterdon, Salem and Somerset counties do not operate juvenile detention centers. These counties send juveniles needing secure detention to neighboring county juvenile detention facilities.

**** For Somerset County, all juveniles requiring secure detention in Somerset County are transferred to the Middlesex County Juvenile Detention Center. For statistical purposes, Somerset County's admissions and child care days are listed separately. Subsequently, admission and child care figures for Middlesex County are lower here as compared with the Table I figures, due to the subtraction of admissions and child care days of juveniles transferred from Somerset County.

*The reasons for adjustments to figures are discussed in first footnote for Table I-A. Adjustments to Table II are as follows: revisions to admissions, average daily population & average length of stay figures for Atlantic, Burlington, Cumberland, Gloucester, Middlesex, Morris, and Sussex counties, as compared with the Table II figures, are due to the subtraction of admissions & child care days of juveniles housed in those counties from Union, Bergen and Camden counties. In addition, the revisions to average daily population & average length of stay for Union county as compared with Table II figures, are due to addition of child care days of juveniles housed in other counties. Union County's admissions remain unchanged. Revisions to Camden County's average daily population and average length of stay are due to the increase of admissions & child care days from the other facilities. Revisions to Bergen County's average daily population and average length of stay are due to the increase of admissions and child care days from Morris County. Finally, the statewide figure for admissions is reduced because of the duplication of Union county admissions, and the statewide figure for average length of stay is increased, while statewide average daily population remains unchanged.

** Does not include juveniles admitted to juvenile detention commitment programs.

***All juveniles requiring secure detention in Somerset County are transferred to the Middlesex County Juvenile Detention Center. For statistical purposes, Somerset County's admissions and child care days are listed separately. Subsequently, revisions to admissions, average daily population and average length of stay figures for Middlesex County, as compared with the Table II figures, are due to the subtraction of admissions and child care days of juveniles transferred from Somerset County.

*The reasons for adjustments to figures are discussed in first footnote for Table I-A. Adjustments to 2007 figures in Table III are as follows: revisions for admission figures for Atlantic, Burlington, Cumberland, Gloucester, Middlesex, Morris and Sussex counties are due to the subtraction of admissions of juveniles housed in those counties from Union, Bergen & Camden counties. Union County admissions remain unchanged, while Camden and Bergen County admission figures are increased due to the addition of admissions transferred to other counties. The calculation of percent of change from 2006 to 2007 for these counties as well as statewide figures is adjusted, as a result.

* The reasons for adjustments to figures are discussed in first footnote for Table I-A. Adjustments for 2007 figures in Table IV are as follows: revisions to average length of stay figures for Atlantic, Burlington, Cumberland, Gloucester, Middlesex, Morris and Sussex counties, as compared with the Table IV figures, are due to subtraction of admissions and child care days of juveniles housed in those counties from Union, Bergen and Camden counties. Revisions to average length of stay figures for Union, Bergen and Camden counties are due to an increase in admissions and/or child care days. The statewide figure for average length of stay is higher than in Table IV. The calculation of percent of change from 2006 to 2007 for these counties as well as statewide figures is adjusted, as a result.

** Does not include juveniles admitted to juvenile detention commitment programs.

***All juveniles requiring secure detention in Somerset County are transferred to the Middlesex County Juvenile Detention Center. For statistical purposes, Somerset County's admissions and child care days are listed separately. Subsequently, revisions to 2007 average length of stay figures and percent change for Middlesex County, as compared with the Table IV figures, are due to the subtraction of admissions and child care days of juveniles transferred from Somerset County.

*The reasons for adjustments to figures are discussed in first footnote for Table I-A. Adjustments to Table V are as follows: average daily population figures for Atlantic, Burlington, Cumberland, Gloucester, Middlesex, Morris and Sussex counties are lower here, as compared with the Table V figures, due to the subtraction of child care days of juveniles transferred to those counties from Union, Bergen & Camden counties. Figures for Union, Bergen and Camden counties are higher here as compared with the Table V figures, due to the addition of child care days of juveniles transferred to above counties. The calculation of percent of change from 2006 to 2007 for these counties is adjusted, as a result. The statewide average daily population remains unchanged.

** Does not include juveniles admitted to juvenile detention commitment programs.

***All juveniles requiring secure detention in Somerset County are transferred to the Middlesex County Juvenile Detention Center. *The reasons for adjustments to figures are discussed in first footnote for Table I-A. Adjustments to Table VI are as follows: the race/ethnicity breakdowns for admitted juveniles to Atlantic, Middlesex, Morris and Sussex counties are revised based on the race/ethnicity of male juveniles transferred to these counties who were previously admitted to Union County. Union's race/ethnicity breakdown remains unchanged, while the statewide breakdown is revised. The race/ethnicity breakdowns for admitted juveniles in Morris County are additionally revised based on the race/ethnicity of male juveniles transferred to Morris County from Bergen County.

**Does not include juveniles admitted to juvenile detention commitment programs.

***All juveniles requiring secure detention in Somerset County are transferred to the Middlesex County Juvenile Detention Center. For statistical purposes, Somerset County's admissions and child care days are listed separately. Subsequently, revisions to race/ethnicity figures for Middlesex County, as compared with the Table VI figures, are due to the subtraction of admissions of juveniles transferred from Somerset County.

*The reasons for adjustments to figures are discussed in first footnote for Table I-A. Adjustments to Table X-A are as follows: average daily population figures for Atlantic, Burlington, Gloucester, Middlesex, Morris and Sussex counties are lower here, as compared with the Table X figures, due to the subtraction of child care days of juveniles transferred to those counties from Union, Bergen and Camden counties. Figures for Union, Bergen and Camden counties are higher here as compared with the Table X figures, due to the addition of child care days of juveniles transferred to relevant counties. The calculations of percent of approved capacity for the above facilities are adjusted as a result. The statewide figures remain unchanged.

**Includes juveniles admitted to juvenile detention commitment programs.

***Although a "soft cap" of 14 was placed on the Bergen County Juvenile Detention Center in January 2006, the approved capacity for the facility remains at 41.

****All juveniles requiring secure detention in Somerset County are transferred to the Middlesex County Juvenile Detention Center. For statistical purposes, Somerset County's figures were listed separately in previous tables. However, for Table X, figures are provided only for those counties which operate juvenile detention centers to determine the percent of approved capacity for each facility.

The calculation of percent of change figures involving 2007 is adjusted, as a result.

**Includes juveniles admitted to juvenile detention commitment programs.

***There was an under-reporting of Atlantic County admissions for the years 2002-2005. As a result, the 2003-2005 admission figures for males, females and state total have been adjusted.

*The reason for adjustments to figures is discussed in first footnote for Table I-A. Adjustments to Table XIV are as follows: the 2007 statewide figure for admissions is lower. The calculation for the 2007 detention rate based on delinquency complaints is adjusted, as a result.

**Detention rates were calculated by taking the number of juveniles admitted to detention statewide, dividing by the number of delinquency complaints filed statewide, and multiplying by 100 for each calendar year 2003 through 2007.

***There was an under-reporting of Atlantic County Admissions for the years 2002-2005. As a result, the 2003-2005 admission figures have been adjusted.

****Includes juveniles admitted to juvenile detention commitment programs.

*****Each year the figures for delinquency complaints filed are obtained from the Family Division of the Administrative Office of the Courts (AOC).
