COLONEL PATRICK CALLAHAN

Acting Superintendent

#### Dear Reader:

During 2016, New Jersey once again saw an increase in fatal motor vehicle crashes. Nationwide, the preliminary data indicate that motor vehicle fatalities increased to a nine-year high. In 2016, New Jersey recorded 570 fatal collisions that resulted in 602 deaths. This is an increase of 48 motor vehicle collisions and an increase of 40 deaths, which equates to 1.65 motor vehicle fatalities per day. The law enforcement community and certain non-profit organizations will remain committed in their respective traffic and public safety efforts. Through enforcement and education of the motoring public, we will continue to work towards the reduction of motor vehicle fatalities on our roadways.

As traffic-related deaths continue to be the leading cause of death in New Jersey and the nation, we must continue our efforts in traffic safety awareness. In 2016, the recorded nationwide death toll on our roadways was 37,461 fatalities. This is an approximate increase of 5.6% from 2015. Although there was an increase in fatal crashes involving intoxicated drivers in 2016, the law enforcement community reaffirms its commitment to enforcing traffic laws to reduce these occurrences

On the following pages, you will find statistics concerning this past calendar year's fatal motor vehicle crashes. The information was compiled by the Fatal Accident Investigation Unit within the Division of State Police. This report constitutes a detailed look at the causes and results of fatal crashes throughout the state during 2016. With the continued efforts and cooperation of the public, and federal, state and local agencies, I am convinced that our traffic safety records will continue to improve in the years ahead.

Sincerely,

Patrick J. Callahan

Colonel
