

Proposed
FY 2004 TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects

ROUTE/PROGRAM	Project ID Number
Access Management	X153

This is the Department's share of funding for highway improvement projects advanced as a result of development and redevelopment. These funds are to be used when the fair share financial contributions obtained from a developer pursuant to N.J.S.A. 27:7-91h are insufficient to implement the improvement. These improvements will encourage economic development and help create jobs.

ROUTE/PROGRAM	Project ID Number
Access Permit Application Review	X166

The Department of Transportation has traditionally used consultants to assist in the review of access applications and on occasion to participate in the permit process to a greater extent. The Department has insufficient personnel to perform all of the work required within the time frames established by the Commissioner, law, and regulation. The timely issuance of access permits helps the State's economy by saving developers' carrying costs.

Advance Technology Emissions Reduction Program	02355

Executive Order #94 established the Advanced Technology Task Force to define and assist in the implementation of initiatives to increase use of clean fuel and vehicle technologies. The Task Force is chaired by the Commissioner of Transportation, and its members are other state agencies. This program will collect data and match vehicle usage with alternative fuel sources, as well as to expand efforts to use hybrid electric vehicles. The program will initiate, but will not be limited to: hybrid electric shuttle buses; zero emission vehicles; safety upgrades at State vehicle repair facilities; alternative fuel use tracking systems for New Jersey MPO air quality conformity modeling; education programs to promote usage of clean fuels and repairs to environmental friendly vehicles; funding for incremental cost of advance technology and alternative fuel vehicles; outreach to promote private sector use of alternative fuel and advance technology vehicles.

GEOGIS Soil Boring Management System	03302

The Department will complete the development of the GIS Geotechnical Database for the Soil Boring Management System. This effort will be federally funded. A pilot soil boring management system included approximately 250 soil boring logs and their associated soil boring location maps. There are approximately 60,000 hard copy soil boring logs and 1,000 soil boring location plans that remain to be processed. In addition, the remainder of the effort would include the ability to process digital soil boring location plans and soil logs directly from the soil boring contractors and add them to the system. The soil boring logs will be referenced in the State's GIS through GPS coordinates. The completed Soil Boring Management System will require an ongoing data entry of new soil boring logs and soil boring location maps.

MPO	Phase	Fund	Amount
Statewide	EC	STATE	\$1,000,000

ROUTE/PROGRAM	Project ID Number
Historic Bridge Preservation Program	X236

This program will provide funds for minor rehabilitation work intended to prolong the life span of identified historic bridges in yet to be determined counties. It is intended that four separate grants will be distributed in the amount of \$250,000 each. The counties will be solicited for proposals describing the work to be covered by the grant. The county will be responsible for advancing the design work, securing necessary permits, coordinating the work effort with the NJDOT and NJ Historic Preservation Office, and administering the construction contract.

New Jersey Department of Transportation Projects

ROUTE/PROGRAM	Project ID Number
Intelligent Transportation Systems	03305

This program will provide for the design, integration and construction of Intelligent Transportation System (ITS) facilities and expansion of the existing systems throughout the state. Federal participation and full oversight is recommended for the development of contract plans and specifications, investigations and construction of the following: fiber optic communications networks; interagency links to share information in support of the FHWA requirements for ITS architectures: emergency traffic management systems; identification of critical transportation infrastructure for the installation of ITS Homeland Security Systems; improvements to the NJDOT traffic information closed-circuit television web site; Amber Alert Systems; ITS component in the Portway region to facilitate the movement of motorists and increased freight traffic; installation and optimization of traffic signal systems; congestion management; development of software drivers for new ITS devices, central system control, and ITS modeling for deployment studies of ITS components; procurement, testing and installation of ITS technologies; and updates to the State Geographic Information System ITS database.

This program will focus on the following: Portway Region, I-195 link to the NJ Turnpike, I-287, I-78, I-295 extension, I-80 extension to exit 19, Routes 10, 23, 15, 130, 206 (traffic signals), as well as web site revisions.

This program will work in conjunction with the Department's Smart Moves Program for implementation of Traffic Operations Intelligent Transportation System initiatives, but is focused on the engineering and construction aspects of communications infrastructure, hardware procurement and integration, and software development.

Philadelphia Regional Integrated Multi-modal Information Sharing

This three-phase project implements a concept to provide a framework for institutional coordination of ITS in the Delaware Valley. This framework provides the regions stakeholders opportunities to share and disseminate information on travel conditions and coordinate the regional deployment of ITS systems in the region. In the first phase, DVRP will establish and provide staff support for a formal ITS committee composed of the regions ITS stakeholders and will apply a proactive approach to improving the information flow between agencies. Phase II represents a concept that utilizes and focuses the I-95 Corridor Coalition's Information Exchange Network to facilities communications using a computer message/digital message system to notify agencies about incidents or unusual conditions that affect them.

Proposed
FY 2004 TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects

ROUTE/PROGRAM	Project ID Number
Rail-Highway Grade Crossing Program, State	X35A

This program will provide state funding for the elimination of hazards at rail-highway grade crossings by the closure of crossings or the upgrade/improvement of protective warning devices for roads throughout the state. This funding will allow flexibility in allocating monies to the areas in need regardless of their geographic location (MPO) and for emergent conditions. This program will also enable the active pursuing of grade crossing closures without drawing down the federal funds used for grade crossing improvements.

Recreational Trails Program	99409

New Jersey's Recreational Trails Program provides grants to public agencies and non-profit organizations for a variety of trail projects. The program is administered by the NJ Department of Environmental Protection, Division of Parks and Forestry. Under the program, a minimum of 30% of the project funding must be provided for motorized trail projects (ATVs, dirt bikes, snowmobiles), 30% for non-motorized (hiking, biking, horseback riding), and 40% for diverse use, which is any combination of motorized and non-motorized trail user types. New Jersey has established a maximum grant award of \$15,000 for non-motorized and diverse projects. Grantees must match 20% of the total project costs.

Proposed
FY 2004 TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects

ROUTE/PROGRAM	Project ID Number
TRANSMIT Program	00376

TRANSCOM, a multi-agency coalition of operating transportation agencies in the metropolitan New York area, is deploying an Automatic Vehicle Identification (AVI) system, known as TRANSMIT, for traffic management and surveillance applications. TRANSMIT offers the ability to use vehicles equipped with EZ-Pass transponders to serve as vehicle probes within the traffic stream for traffic surveillance purposes. It requires the installation of readers (small 3-foot antennae) with the capability of identifying the vehicles equipped with EZ-Pass transponders, and measuring travel speeds at periodic intervals along the roadway.

Phase I and II were previously installed on major highways, mainly within New York state, through federal earmark money, and has successfully provided a surveillance system capable of detecting incidents. Phase III expands the system in New Jersey along Route 287, the New Jersey Turnpike, and the Garden State Parkway. The benefits of the system include the ability to track incidents for quick response, and provide real-time information to travelers over variable message signs and various media sources.

The FY 2002 federal appropriations provides \$2,500,000 from Intelligent Transportation Systems funds for this project.
