*Traditional & Contemporary Casegoods*

*list prices 1/06*

---

**Arnold Desks** offers four traditional and three contemporary case goods product lines. The **Traditional** lines - Stratford, Georgetown, Covington and Bedford - are shown first in this price book followed by the Contemporary products - Solar, Lunette and Banker collections. Within the Traditional and Contemporary sections the most prestigious product line is presented first, followed by the next more economical, and the most economical priced product line shown last. Two introductory pages precede each collection. Included there is detailed product information (finish/option, material specifications, etc.) pertinent to that product line.

**Arnold Desks** is structured so that we can provide the highest quality, mass produced products as well as the unique custom piece. Working closely with you our customers, we can modify one of our existing product lines or create a completely custom piece to fit a specific need. Many times a customized product is not necessary due to our very extensive standard offering.

Our customer service staff communicates directly with the factory, which allows our customers desires to be more clearly understood by our expert craftsmen. We believe that this makes the level of customer care and service received by our customers far superior than that offered by our competitors. We listen to the customers needs and create products to meet those needs. We believe all our customers are part of the **Arnold Desks** family

# General Information

## Woods/Veneers

All solid woods and veneers used on exterior surfaces are #A select grades. Plain sliced American Walnut, White Oak, Maple, and Cherry, applied in a "reverse slip match" fashion resulting in a balanced appearance, as well as slip match Sapele (Mahogany), are the standard veneers used. Ash Burl, Birdseye Maple, and Crotch Mahogany veneers are standard on selected products only. Anigre veneers are available at an upcharge. Every effort is made to match solid wood and veneer of like color and grain, however, since wood is a natural material, some variation in grain, color, and character may occur. This variation is not considered a defect.

Arnold wood sample color chips are dated, and only chips dated with the current year should be used. If older samples are used, please send the sample used with the purchase order for proper color adjustment.

## About Woods

Arnold Desks would like to take this opportunity to point out to its customers several of the distinguishing characteristics that make wood such a unique material with beauty and charm:

-- No two trees are exactly alike, and as a result, natural variations in color and tone are to be expected

-- Solid woods and veneers accept stain in varying degrees, thereby contributing to slight differences in shading

-- Woods are highly susceptible to color changes from exposure to light, particularly from the ultra violet rays. Cherry is extremely photo sensitive. It is recommended that the end user be instructed to avoid placing wood products in areas with prolonged exposure to direct sunlight. This will help to minimize, though not eliminate, color changes.

-- Properly maintained levels of humidity in the environment where the furniture is placed should also minimize instances of warping, checking, and cracking of veneers and solids. Fluctuations in humidity and temperature may cause panels and solid wood components to expand and contract, and may lead to panel warpage and finish checking or cracking. Prolonged exposure of furniture to dry heat during winter months should be avoided.

A minimum humidity level of 45% in climate controlled buildings is very important for the proper care of natural wood products.

**Note:** Due to the nature of Burl and Crotch veneers, the temperature and humidity of the environment into which the product is placed may cause change to the face veneer. Arnold cannot be held responsible for checking and/or shrinkage that may occur over the course of time.

## Wood Finishes

Arnold Desks offers a substantial number of different stains on White Oak, Walnut, Sapele (Mahogany), Cherry, Anigre and White Maple solid woods and veneers. A "seven step" open pore finish is standard. It is a rich, lustrous, water and alcohol resistant, 50° satin sheen, multi-coat pre-catalized top coating applied over a "hand rubbed" wiping stain. Color consistency is maintained by constant comparisons to "control panels" at every step in the finishing process.

95% Closed Pore (CP) finishes are standard on all traditional and transitional tops for tables and casegoods.
