#### SEATING

*Please reference our complete 234-page Community catalog for wood seating and lounge options.*

#### WARRANTY

*Community warrants to the original purchaser that each piece of furniture will be free from defects in workmanship given normal use for five years. Casters are warranted to be free from defects in materials and workmanship for a period of five years. Community will, at its option, repair or replace any defective merchandise within the terms of the warranty. This warranty does not apply to damage resulting from accident, alteration, or misuse.*

# Environmental Mission Statement

COMMUNITY has been an environmentally conscious organization for more than 75 years. Founded in 1929 in a Southern Indiana area settled by skilled German woodcrafters, Community began as a manufacturer of durable, well-crafted chairs. Through the years, as we have grown and expanded our product lines to include office furniture casegoods, tables, and lounge seating products, this heritage and respect for the environment continues. Building a product that will last and not require disposal in a landfill is our focus. Community is committed to “reduce, reuse and recycle” and to the conservation of our environment and its natural resources, as well as the encouragement of our suppliers and customers to do the same. A goal of a “Green Partnership” (supplier, manufacturer and customer) is essential for the long-term protection, preservation and sustainability of our environment for future generations. Our Mission is to continually maximize the use of sustainable raw materials and to search for new materials and processes that will not negatively impact our environment.

## LOCATION

Our Community manufacturing facilities in Southern Indiana and North Carolina are often located within 500 miles of your project location, allowing you possible LEED credits toward Green Building Certification. With our diverse manufacturing capabilities, “one-stop shopping” is attainable, allowing you to conserve our fossil fuels and reduce greenhouse gases.

## PACKAGING

Community places an emphasis on the minimal use of disposable packaging, while still providing adequate protection of the finished product. Our corrugated packaging is 100% recyclable or reusable. The packaging we receive from our suppliers is also reused or recycled. We recycle more than one million pounds of cardboard annually.

## COMPLIANCE

Community employees are trained in compliance with applicable Occupational Safety and Health Administration (OSHA) regulations to exceed all applicable Department of Environmental Management (DEM) and Environmental Protection Agency (EPA) regulations for air emissions, storm water and hazardous waste disposal. Our safety philosophy is a 360-degree circle of safety program which includes home, work and travel. Our manufacturing facilities use the DuPont Safety Training Observation Program (STOP) supervision program for workplace environmental accident prevention and awareness.

## MANUFACTURING FACILITIES

All of our Community manufacturing facilities are geared toward eco-efficiency and are encouraged to continually improve and conserve. Wood not used in the direct manufacturing process is recycled for use in concealed reinforcement cleats and corner blocks. Additional scrap materials are burned in scrubber-equipped boilers to generate steam that is used in the manufacturing process to operate our dry kilns or to heat our manufacturing facility during the winter. This process reduces greenhouse gases, the use of fossil fuels, and the burden of waste placed in landfills. In addition to other energy savings techniques, our manufacturing facilities use high-efficiency lighting, make use of power factor capacitors, and encourage the reduction of energy consumption and water usage. Condensation pumps are used to aid in water savings as well as extending boiler life.

## MANUFACTURING PROCESSES

Community manufacturing facilities utilize finish and assembly processes that best support the furniture requirements and applications. We continually test the latest equipment and materials available to reduce emissions while maintaining the best quality product possible. Finish lines utilize highly efficient spray guns and spray techniques to reduce waste material. Excess finish material, solvents and waste are recycled. Flat line ultraviolet-cured finishing systems enable the excess finish material to be recaptured, recycled, and reused with no post-cure byproducts. Many assembly processes use water-based glues that contain no hazardous ingredients.

## TEXTILES

Many of our fabric options utilize 100% recycled content. A grouping of leather alternatives contain no toxic materials, plasticizers, heavy metals or formaldehyde and have a 100% biodegradable back cloth. Available panel fabric uses a biological nutrient for the soil if discarded. Components – cushion foam, batting and poly-cord – used in upholstered products are recyclable and contain various percentages of recycled content. Excess fabric and leathers not utilized in the upholstery process are supplied to recyclers and local charities for additional use.

## WOOD

Wood is good! It is the most diverse, process friendly, and widely utilized natural resource in mankind’s history. No other natural resource can match the environmental advantages of wood. It is renewable, recyclable, and biodegradable. Utilizing the sun’s energy, trees grow and remove carbon dioxide from the air while giving off oxygen to benefit the entire planet. Harvesting mature trees in a sustainable forest allows the photosynthetic cycle to continue at full optimization. We are proud to use wood as our primary “Green” renewable material resource.

Surprisingly, much of the public has the impression that processing wood involves wasting natural resources and destroying the environment, when just the opposite is true! According to the U.S. Forest Service, each year the U.S. grows about 50 percent more trees than are cut for furniture manufacturing. In fact, since 1952 the amount of commercial hardwood forest stock has increased by 70 percent. The hardwood industry currently utilizes approximately 13 billion board feet of standing timber per year. Current statistics from the Forest Service indicate that there are more than 715 billion board feet of commercial-size timber available for harvest. The United Nation’s 2007 *State of the World’s Forests* report shows that the United States forests are getting larger each year. The United States practices sustainable forestry both in the softwood and hardwood industries.

## MATERIAL OPTIONS

Alternative materials are available for consideration from Community. Solid wood and engineered wood options like Lyptus®, Plyboo®, reclaimed woods, agricultural and post-consumer waste fiber products, soy-based resin bio-composites, Forest Stewardship Council (FSC) certified wood – the list continues to grow – all allow possible LEED credits toward Green Building Certification. These options can be considered for specific applications based on their performance. We support sustainable forestry by purchasing wood products grown in sustainable forest programs.

*Community’s goal is to provide value for our customers and to expand and improve our “Green Partnerships” through process, product and life cycle management.*

# Sherwood Starter/Adder Wood Shelving Specifications

## GENERAL CONSTRUCTION

Sherwood shelving is a modular starter/adder design which allows for easy re-configuration.

## END AND INTERMEDIATE PANELS

The end and intermediate panels shall be constructed of 1"-thick plywood core for excellent dimensional stability. The face veneers shall be Grade "A" quality. All end panels shall be banded on all four sides with an eased  $\frac{1}{8}$ " external band. The inside faces of the end panels shall have two rows of holes bored to accept the shelf pins. The holes shall be 32 mm on center. The end panels shall be grooved to accept the  $\frac{1}{4}$ "-thick back panel.

## CORNICE TOP

The cornice top shall be constructed of 1"-thick plywood core with Grade "A" face veneers. The front edge shall receive a  $\frac{3}{4}$ "-thick x 2"-high valance. The valance shall be recessed  $\frac{1}{8}$ " from the front edge and attached to the top by means of three (3) #10 x 2  $\frac{1}{2}$ " flat head wood screws. The cornice top shall be attached to each of the vertical panels by means of black wood screws passing through an 8  $\frac{1}{2}$ " long Z-shaped bracket, which will pull the top tight to the vertical panels.

## SHELVING BASE

The toe kicks for both single-faced and double-faced shall be 1"-thick by 4"-high and constructed of veneer core hardwood plywood with a minimum of nine plies. The toe kicks shall attach to the end and intermediate panels by means of wood screws passing through a 3"-high L-shaped bracket. The rear base rail on single-faced shelving and the center rail on double-faced shelving shall have the top edge grooved to receive the back panel.

## STANDARD ADJUSTABLE SHELF

The adjustable shelves shall be 1"-thick plywood core with an eased external band on the front edge. The underside of the shelf shall be routed to accept the shelf pins.

## STANDARD MAGAZINE SHELF

The magazine shelves shall be constructed of 1"-thick minimum nine-ply oak or maple hardwood veneer core. The shelf shall have a solid hardwood retaining edge to hold the magazines in their inclined, displayed position. The shelf rests on four adjustable shelf pins pivoting upward on the rear pins to access the flat "adjustable" storage shelf beneath.

## OPTIONAL METAL SHELF

The optional adjustable metal shelf shall be 18-gauge steel. The shelf shall be  $\frac{3}{4}$ "-high with the front and rear edges being square formed. The ends of the shelves shall be notched to accept the shelf pins. The shelves shall be electrostatically painted.

## STANDARD BACK PANEL

The standard back panels shall be  $\frac{1}{4}$ "-thick with a vertical grade laminate face.

## OPTIONAL VENEER BACK PANEL

The optional veneer back panel shall be  $\frac{1}{4}$ "-thick plywood with select rotary cut face veneer on exposed face(s).

## OPTIONAL CONTINUOUS TOPS

The optional continuous tops are available for all shelving units. They shall be  $1\frac{3}{16}$ "-thick and come standard with a  $\frac{1}{2}$ " square internal edge band. The designer edges are available as an option. They are  $1\frac{3}{16}$ "-thick with a  $\frac{3}{4}$ "-shaped internal edge band. The catalog numbers must be called out to indicate this selection.

## OPTIONAL MOBILE BASE

The optional mobile base is available on the double-faced shelving units. The swivel casters shall be bolted to the underside of the shelving unit by means of four metal corner brackets. These brackets shall provide extra bracing by having four bends and attaching to the end panels and shelving base by means of wood screws.

## CORNER FILLERS

The corner fillers shall be constructed of plywood core with a Grade "A" veneer face. Solid hardwood cleats shall be provided for attachment to the shelving run and the wall. The depth and width is to be specified at time of purchase order.

## FACE FILLERS

The face fillers shall be constructed of plywood core with a Grade "A" veneer face. Solid hardwood cleats shall be provided for attachment to the shelving run and the wall. The height and width is to be specified at time of purchase order.

# Sherwood Ordering Information

1. MODEL NUMBER

2. STANDARD WOOD SPECIES: Oak or Maple

3. WOOD FINISH:

**Oak**

- NOO Natural Oak
- GOO Golden Oak
- MOO Medium Oak
- LCO Light Cherry
- MCO Medium Cherry
- MWO Medium Walnut
- MMO Medium Mahogany
- DMO Dark Mahogany

**Maple**

- NMM Natural Maple
- AMM Amber Maple
- LCM Light Cherry
- MCM Medium Cherry
- MWM Medium Walnut
- MMM Medium Mahogany
- DMM Dark Mahogany

4. EDGE DETAILS for designer edge, continuous tops only:

\* Standard Sherwood continuous top edge: 

5. ALL BACK PANELS TO BE ORDERED SEPARATELY.

If melamine, specify back panel color: NOO, MOO, NMM, Black, Almond.

Optional veneer back panel available in any wood finish.

6. TOPS: Wood veneer standard; plastic laminate available on units 48" and lower.

Add (-P) to model number (ex. SD3010BC-S-P).

Select from the following standard laminate choices: Wilsonart, Formica or Pionite.

When ordering please specify manufacturer, color and model number.

7. METAL SHELVES: Add the suffix (-M) to the model number (ex. SD3010BC-S-M).

Call Customer Service for color options.
