This breathable material (Puntiform material) is a microporous laminated material which is ideal for chemical handling. A zipper storm flap keeps liquids and particulates away from the wearer.

All PartiGuard garments are certified for Chemical and Nuclear Protection.

Aerated Back Coveralls

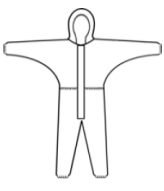

The unique design of the Indutex aerated coverall provides maximum comfort for the user, while providing industry-leading protection against particles and sprays. The combination of the coated Polypropylene front of the garment with a non-coated back make this garment breathable and lightweight.
