**EPA Methane Challenge:** The Methane Challenge is a voluntary program founded by the EPA in collaboration with oil and natural gas companies. The program recognizes companies that make specific and transparent commitments to reduce methane emissions.

**Industry Trailblazing with the TrustWell Program:** NJNG is the first natural gas utility in the nation to purchase independently certified supply under the Trustwell™ Ratings system. The rating evaluates a wide range of risks and impacts, including emissions, leaks and well integrity, and attests a responsible natural gas product for natural gas purchasers and end users.

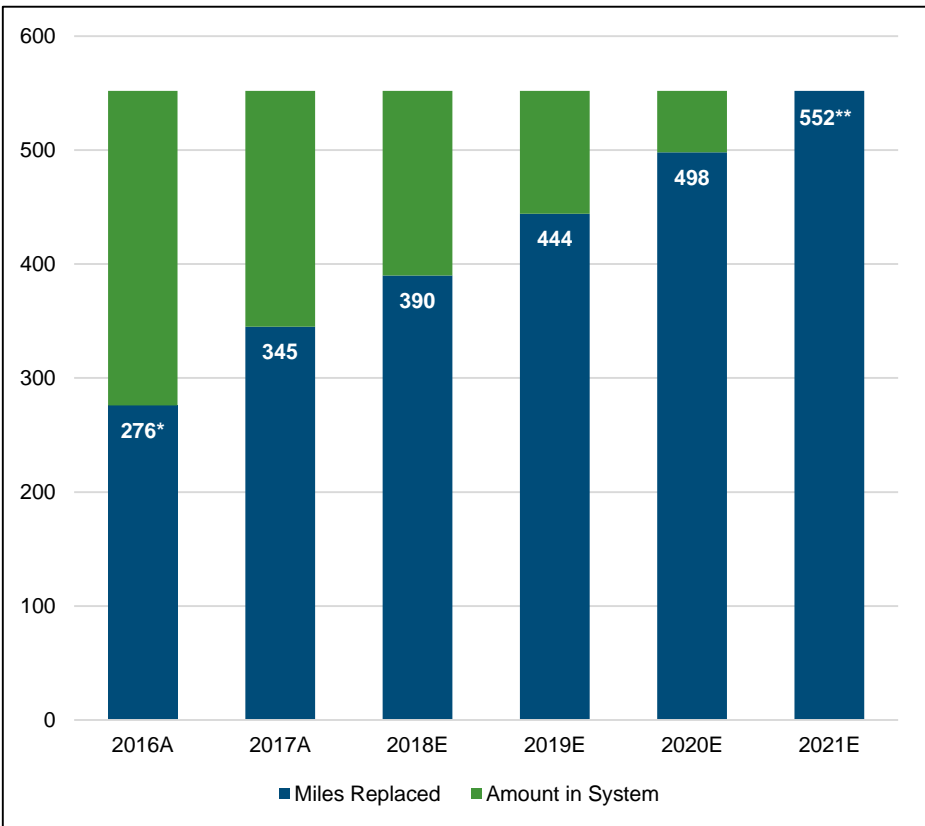

**Going Further as a ONE FUTURE Coalition Member:** Dedicated to voluntarily achieving meaningful reductions in methane emissions up and down the natural gas supply chain. ONE Future focuses on achieving a science-based average rate of methane emission that is equal to 1 percent or less of total natural gas production by 2025.

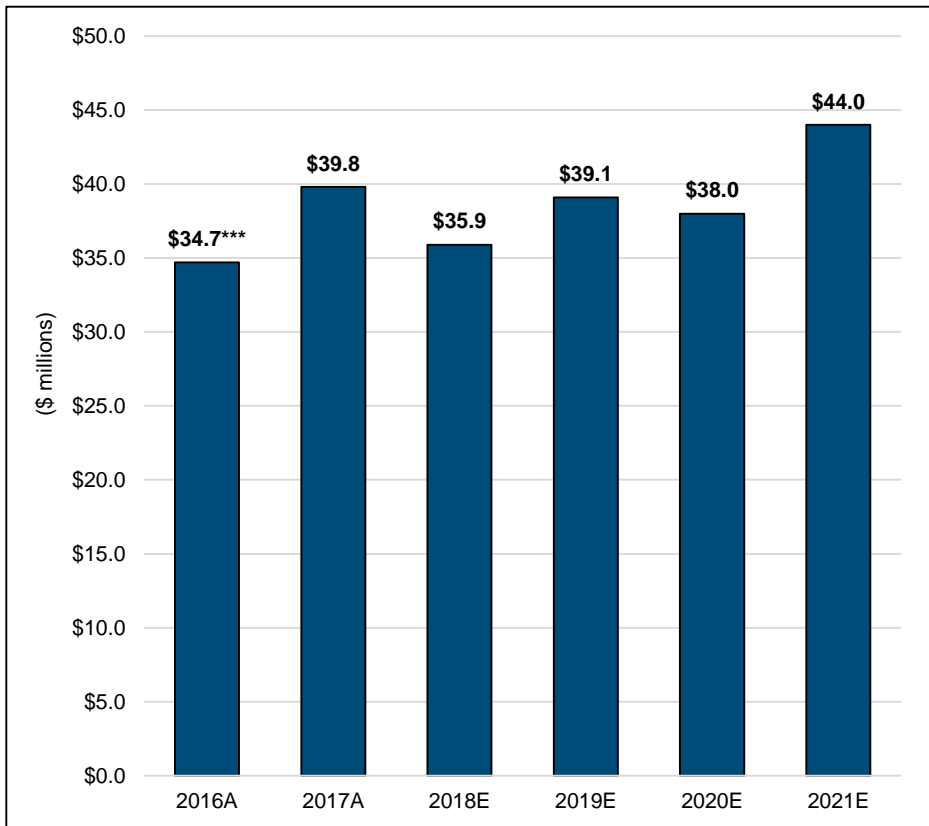

Program	Description	Benefits
<p>The SAVEGREEN Project® (2006)</p>	<p>Encourages investment in energy efficiency equipment and measures through customer incentives</p>	<ul style="list-style-type: none"> <li>▪ Reduces energy usage and emissions</li> </ul>
<p>NJ RISE: New Jersey Reinvestment in System Enhancement (2012)</p>	<p>System strengthening/ reliability projects driven by Superstorm Sandy</p>	<ul style="list-style-type: none"> <li>▪ Improve system resiliency for future major weather events</li> </ul>
<p>SAFE II (2015, preceded by 2009 AIP, 2011 AIP II and 2012 SAFE I)</p>	<p>Replacement of remainder of bare steel main</p>	<ul style="list-style-type: none"> <li>▪ Enhances pipeline safety by replacing aged infrastructure</li> </ul>
<p>CIP: Conservation Incentive Program (2006)</p>	<p>Reconciles usage per customer differences</p>	<ul style="list-style-type: none"> <li>▪ Gas cost savings of over \$390 million through reduced usage</li> </ul>

**Regulatory mechanisms enhance NJNG's ability to provide safe, reliable, competitively-priced service to customers**

## Miles Replaced: 2016A – 2021E

## Capital Investment

**SAFE II is a Five-Year, \$200 million program to eliminate Unprotected Bare Steel Main throughout NJNG’s System. NJNG will be the first company in NJ to achieve this.**

\* Represents total amount replaced at the end of SAFE I  
 \*\* Represents the total amount of unprotected steel in the NJNG system  
 \*\*\* Includes capital invested in SAFE I

Lowest number of leaks per mile of any natural gas utility in New Jersey

## Conserve to Preserve®

helps customers use less energy, save money and preserve our natural resources

- **3.2 million** conservation tips provided by our Call Center
- **143,000** E-Tip subscribers
- **\$390 million** saved by customers through reduced usage since 2006

Allows customers to invest in energy-efficient equipment, whole-house improvements and facility upgrades

Since inception in 2009:

- Invested **\$159 million** in grants, incentives and on-bill repayment program
- Helped **51,000 customers**
- Over **2,600** contractors have participated

Energy efficiency is a growing part of New Jersey's energy future
