

NEW JERSEY INTERMEDIATE PROCESSING FACILITIES (SUBSET OF CLASS A RECYCLING CENTERS)

Updated March 2019

While Intermediate Processing Facility (IPF) is not a regulatory term, it typically refers to a type of Class A recycling center that receives, at a minimum, source separated commingled recyclable containers/papers and processes the recyclable materials through mechanical and manual means into their constituent components. The list includes processors of both dual stream and single stream recyclables. Intermediate Processing Facilities are not permitted by the NJDEP; however, they must be included in the County Solid Waste Management Plan for the county in which they intend to operate.

Atlantic County
