New Jersey Landscape Project Version 3.3

Wildlife habitat mapping for community land-use planning and species conservation

• In the 1986-2007 period, urbanization resulted in the loss of ~5,000 acres of wildlife habitat per year.
• Although this rate slowed significantly from 2007-2012, much of the habitat that remains is less suitable due to habitat fragmentation.

LANDSCAPE PROJECT APPLICATIONS
• Prioritize Conservation Acquisitions
• Environmental Review/Impact Assessment
• Environmental/Natural Resource Inventories
• Regional Conservation Planning
• Land Use Regulation and Management
