The Division of Fish and Wildlife's Bureau of Wildlife Management has reviewed and analyzed harvest statistics for various upland species, including bobwhite quail and pheasant. A significant portion of the annual game harvest comes from the Commercial and Semi-Wild shooting preserves.

Therefore, in addition to the normal annual report, and to further this research effort, the Division is requesting all Commercial and Semi-Wild permit holders complete this form at the end of each season. This information will be used to better estimate the harvest of native versus stocked game birds in the State. We strongly feel this is an important issue and the results will enable the Division to better serve the citizens of our State.

Please note, failure to submit the Harvest Report with the Annual Report will delay the authorization and/or issuance of a Commercial and Semi-Wild Permit for the upcoming season.

If you have any questions, please feel free to contact the Wildlife Permits Unit at 609-984-6213 or Andrew Burnett, Principal Biologist at 609-748-2058.
