1.0 INTRODUCTION

1.1 Purpose

Remington, Vernick & Arango Engineers (RVA), on behalf of the County of Hudson, NJ, prepared the following Phase I Environmental Site Assessment report for the existing site located at 7903-7909 River Road (Block 437, Lots 2.01 & 2.02) in the Township of North Bergen, which is under consideration for potential acquisition by Hudson County.

1.2 Scope of Services

The scope of services for this Phase I ESA consisted of the following tasks:

Records Review

- Reviewing property information to confirm the legal description and location of the Subject Property. This information is included in Appendix A.
- Reviewing environmental record sources including federal and state regulatory databases to identify facilities with past or current regulatory enforcement actions within applicable distances of the Subject Property as defined in the ASTM Standard. The regulatory database search report is presented in Appendix B.
- Reviewing physical setting information sources to identify information about the geologic, hydrogeologic, hydrologic, and topographic conditions in the area of the Subject Property. The U.S. Geological Survey (USGS) 7.5-minute topographic map of the area of the Subject Property is shown on Figure 1.
- Reviewing historical record sources to identify past land use activities at the Subject Property and surrounding properties. Historical information obtained during performance of the Phase I ESA investigation is included in Appendix C. Historical reports that were provided to RVA for review are included in Appendix E.

Site Reconnaissance

- Performing a visual inspection of the Subject Property and surrounding properties to identify potential sources of chemical and petroleum contamination such as above-ground storage tanks (ASTs), underground storage tanks (USTs), potential sources of polychlorinated biphenyls (PCBs), chemicals, and hazardous materials. Surficial evidence of potential Recognized Environmental Conditions (RECs) such as distressed vegetation, stained soils, and/or stained paving was also evaluated. Photographs recorded during the site reconnaissance are included in Appendix D.

Interviews

- Interviewing available individuals with knowledge of current or historical use, storage, or disposal of potentially hazardous materials or other environmentally related activities on or adjacent to the Subject Property. User provided information is included in Section 6.

Report Preparation

- Preparing a report that documents the findings, opinions, and conclusions of the Phase I ESA investigation conducted at the Subject Property, and provides the supporting documentation and references for those findings, opinions, and conclusions (the Report).

Additional Scope Items (Non-ASTM Standard)

- RVA performed a field investigation for underground anomalies using Ground Penetrating Radar (GPR).

1.3 Limitations and Exceptions

RVA performed our services in accordance with the following principles, which are an integral part of the ASTM Standard: (i) No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the Subject Property, and the ASTM Standard recognizes reasonable limits of time and cost; (ii) "all appropriate inquiry" does not mean an exhaustive assessment of a property. RVA performed this Phase I ESA in conformance with the ASTM Standard's principle of identifying a balance between the competing goals of limiting the costs and time demands inherent in performing a Phase I ESA and the reduction of uncertainty about unknown conditions resulting from additional information; (iii) not every property warrants the same level of assessment - the type of property subject to the assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry guided the appropriate level of assessment for this Phase I ESA; and (iv) ESAs must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent Phase I ESAs should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors.

1.4 Special Terms and Conditions

The Phase I ESA includes additional scope items as identified in Section 1.2.

1.5 User Reliance

RVA has prepared this Report at the request of the User for the purpose identified by the User in Section 3.7. Reliance on the information contained in this Report by anyone other than User is permissible only with the prior written authorization to do so from RVA. RVA is not responsible for independent conclusions, opinions, or recommendations made by others or otherwise based on the findings presented in this Report.

2.0 PROPERTY DESCRIPTION

2.1 Location and Legal Description

The Subject Property is located at 7903-7909 River Road, North Bergen, NJ. The Subject Property consists of a vacant lot with no current improvements and is covered with natural and overgrown vegetation. Vehicular access to the Subject Property is via the entrance on River Road. The Subject Property owner is listed as 7903 River Road, LLC, according to information obtained from the chain of title both forwarded from the Hudson County Clerk's Office and obtained by EDR, Inc.

The Subject Property is located on the United States Geological Survey (USGS) 7.5-minute, Central Park, New York topographic quadrangle map from 1995, as shown on Figure 1. A Subject Property Layout Map is shown on Figure 2. The site comprises two individual lots, Lots 2.01 and 2.02, on Block 437 and has a total size of 0.69 acres.

2.2 Site and Vicinity General Characteristics

The property in question is currently a vacant lot consisting of 0.69 acres, with no structure and covered extensively by natural vegetation. At the time of our visual survey, there was some evidence of past public utilities tie-in on the site, such as disconnected electrical service conduits towards the northern end. Prior to gaining access to the subject property, RVA contacted the site owner for approval, who allowed RVA to visit the site unaccompanied.

2.3 Current Use of the Subject Property

The subject property is currently lying vacant and serves no use.

2.4 Descriptions of Structures, Roads, and Other Improvements on the Subject Property

There are no structures, roads or other improvements on the Subject Property.

2.5 Current Use of the Adjoining Properties

The adjoining property uses are described below:

- North – The Subject Property is bounded to the north by a condominium structure and three residential apartment buildings.
- East – The Subject Property is bounded to the east by River Road.
- South – The Subject Property is bounded to the south by an unimproved lot that serves as a temporary parking area for construction work further south along River Road.
- West – The Subject Property is bounded to the west by several unimproved and naturally vegetated lots that are part of the Hudson County Bird Sanctuary.

3.0 USER PROVIDED INFORMATION

The ASTM Standard defines User as the party seeking to use Practice E 1527 to complete a Phase I ESA of the Subject Property (the person commissioning a Phase I Environmental Site Assessment). The ASTM Standard requires the User to provide certain information to the environmental professional. RVA conducted a phone interview with Susan McCurrie of the City Council Office of Hudson County on February 3, 2015, to transfer this information to RVA.

3.1 Environmental Cleanup Liens

RVA representatives asked the User about their knowledge of environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state or local law.

The User responded, "There are no known liens of which I am aware."

3.2 Activity and Use Limitations

RVA representatives asked the User about their knowledge of activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place on the Subject Property or have that been filed or recorded in a registry under federal, tribal, state or local law.

The User responded, "There are no known limitations of which I am aware."

3.3 Specialized knowledge or experience of the user (40 CFR 312.28)

RVA representatives asked the User of this Phase I ESA if they have any specialized knowledge or experience related to the subject property or nearby properties. For example, are they involved in the same line of business as the current or former occupants of the property or an adjoining property so that they would have specialized knowledge of the chemicals and processes used by this type of business?

The User Responded, "Yes, the land to the west and southwest is owned by Hudson County and is used as a bird sanctuary."

3.4 Relationship of the Purchase Price to the Fair Market Value

RVA representatives asked the User if the purchase price being paid for this property reasonably reflects the fair market value of the property.

The User Responded, "We haven't finalized a price yet. We are waiting for the report."

3.5 Commonly Known or Reasonably Ascertainable Information

RVA representatives asked the User if they were aware of commonly known or reasonably ascertainable information about the Subject Property that would assist the environmental professional in identifying

conditions indicative of releases or threatened releases. RVA representatives asked the following questions:

- a) Do you know the past uses of the Subject Property?

The User Responded, "As far as I'm aware, this property has been vacant for quite some time."

- b) Do you know of specific chemicals that are present or once were present at the Subject Property?

The User responded, "No."

- c) Do you know of spills or other chemical releases that have taken place at the Subject Property?

The User responded, "No."

- d) Do you know of any environmental cleanups that have taken place at the Subject Property?

The User responded, "No."

3.6 The Degree of Obviousness or the Presence of Contamination

RVA representatives asked the User if, based on User's knowledge and experience related to the Subject Property, there are any obvious indicators that point to the presence or likely presence of contamination at the Subject Property.

The User responded, "Not that I'm aware of."

3.7 Reason for Conducting ESA

The User indicated that this Phase I ESA is being performed for due diligence in order for Hudson County to potentially acquire the property.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources, Federal and State

RVA retained Environmental Data Resources Inc. (EDR) to perform an environmental regulatory database search of the general area of the Subject Property, which is presented in Appendix B. In accordance with the search requirements of ASTM E-1527-05 Standard, RVA representatives reviewed the federal and state regulatory agency records listed below to identify the use, generation, storage, treatment or disposal of hazardous substances or petroleum products, or release incidents of such materials that might impact the Subject Property. A summary of significant listings (Subject Property and adjacent properties with the potential to impact the Subject Property) presented in the environmental regulatory database report is presented in Table 1. The following is a listing of databases reviewed during the Phase I ESA.

Federal ASTM Standard Databases

Database	Approximate Minimum Search Distance
Federal NPL (National Priorities List)	1.0 mile
Federal delisted NPL site list	0.5 mile
Federal Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) site list	0.5 mile
Federal CERCLIS-No Further Remedial Action Planned (NFRAP) site list	0.5 mile
Federal Resource Conservation and Recovery Act (RCRA) CORRACTS (Corrective Action Report) facilities list	1.0 mile
Federal RCRA non-CORRACTS Treatment Storage and Disposal (TSD) facilities list	0.5 mile
Federal RCRA Generators list	0.25 mile
Federal Institutional Control/Engineering Control Registries	0.5 mile
Federal Emergency Response Notification System (ERNS) list	Subject Property

State and Tribal ASTM Standard Databases

Database	Approximate Minimum Search Distance
State and tribal hazardous waste sites identified for investigation or remediation: NPL – equivalent sites	1.0 mile
State and tribal hazardous waste sites identified for investigation or remediation: CERCLIS – equivalent sites	0.5 mile
State and tribal landfill and/or solid waste disposal site list	0.5 mile
State and tribal leaking storage tank lists	0.5 mile
State and tribal registered storage tank lists	0.25 mile
State and tribal Institutional Control/Engineering Control Registries	0.5 mile
State and tribal voluntary cleanup sites	0.5 mile
State and tribal Brownfield sites	0.5 mile

4.1.1 Subject Property Database Listing

The Subject Property is not listed under any of the database categories.

4.1.2 Off-Site Properties Database Listings

Several off-site properties were included in the database listings reported in the EDR. The surrounding area is heavily industrialized with numerous sites identified in the EDR report, however based on the locations of these sites, the local topography, and observations made at the subject property there is no evidence of impact at the subject property from other sites in the vicinity.

4.2 Previous Reports

RVA was supplied with no historical reports, environmental or otherwise, that relate to the Subject Property.

4.3 Additional Environmental Record Sources

RVA submitted an Open Public Records Act (OPRA) request with the NJDEP, the North Bergen Fire and Construction Code offices, the Hudson County Regional Health Commission, and the USEPA. As of the writing of this report, a response has not been received from the NJDEP. The subject site is not identified as a known contaminated site or a site subject to a deed notice in the NJDFEP on-line database.

4.4 Site Physical Setting

4.4.1 Sources Reviewed

The following sources were reviewed to obtain information on the physical setting of the Subject Property area:

- USGS, Central Park, NY NJ 7.5 Minute Topographic Quadrangle Map, 1995;

- USGS, Weehawken, NJ NY 7.5 Minute Topographic Quadrangle Map, 1995;
- New Jersey Department of Environmental Protection, Internet Resource NJ-GeoWeb, Geology Profile;
- New Jersey Geological Survey, Physiographic Provinces of New Jersey, 2006;
- Topographic Maps and Aerial Photographs provided by EDR (further referenced below); and,
- EDR, The EDR Radius Map™ with Geocheck®;

4.4.2 General Topographic Setting of the Area

The Subject Property is located in the northern section of the Township of North Bergen, very close to North Bergen's boundary with the City of Fairfield in Bergen County. The site is heavily sloped downwards to the southeast and depicted by the Central Park, NY NJ USGS 7.5 Minute Quadrangle to be located at approximately elevation 17 (NGVD 1929), with the northwestern corner located at approximately elevation 40 and the southeastern corner located at approximately elevation 7 (NGVD 1929).

According to the USDA Soil Conservation Service's National Cooperative Soil Survey the major soil component on the Subject Property consists of Boonton and is gravelly loam. Permeability of Boonton soils is moderately rapid or moderate in the surface layer and subsoil; and slow or moderately slow in the substratum. Available water capacity is moderate.

4.4.3 Surface Water and Hydrologic Setting

The Subject Property does not contain any natural waterbodies (ponds/streams/swales). Based on the area topography, the ground water would likely travel towards the southeast to the Hudson River. However, actual ground water conditions may vary, and local, seasonal and tidal fluctuations may occur. The Hudson River discharges to the Atlantic Ocean.

A review of the United States Geological Survey (USGS) 7.5 minute series topographic quadrangle of Weehawken, NJ and Central Park, NY, dated 1995, was performed to observe for evidence of manmade structures, fill areas, and natural features that may have an adverse affect to the environmental condition of the subject property. The review of the Central Park, New York topographic quadrangle did not reveal evidence of significant environmental concern in the immediate area of the subject property regarding topographic features.

The topography of the site indicates heavy sloping downwards towards the southeast. Slope and surface drainage in the site vicinity are to the southeast towards the Hudson River, which is located approximately 0.10 mile to the west. The review of the Weehawken, NJ and Central Park, NY topographic quadrangles revealed the subject property is located in a highly developed area of North Bergen, NJ.

Figure 1 shows the location of the subject property.

4.4.4 Underlying Formation

The subject area falls within the New Jersey Piedmont Physiographic Province. The Piedmont Physiographic Province consists mainly underlain by slightly folded and faulted sedimentary rocks of Triassic and Jurassic age (240 to 140 million years old) and igneous rock of Jurassic age. In the Trenton and Jersey City areas, long the southern margin of the province, there are small bands of highly metamorphosed rocks ranging from Middle Proterozoic to Cambrian that are also included.

4.4.5 Ground Water

According to observations of the local topography made at the time of the property visit and review of the Central Park, NY topographic quadrangle, surface drainage and topographic patterns in the vicinity of the subject property suggests that the direction of surface water run-off and groundwater flow is likely to be towards the southeast to the Hudson River. The actual depth to groundwater within the subject property was not determined.

4.4.6 Migratory Pathways

The physical characteristics of the subject property and surrounding area often indicate migratory pathways through which contaminants are likely to enter onto, or exit from, the subject property. The majority of storm water run-off in the area including the subject property is expected to enter the storm water inlets located along the adjacent River Road, with any storm water run-off from more than one-eighth mile to the west entering storm water inlets along John F. Kennedy Boulevard and avoiding the subject site, and discharge to the Hudson River located approximately 0.15 mile to the southeast of the subject property. Due to heavy slope, the remaining storm water run-off in the area including the subject property is expected to flow to the east and southeast and infiltrate the pervious grass surfaces and subsurface soils across River Road and recharge the underlying water table.

It must be noted the precise flow direction can only be determined through the installation of groundwater monitoring wells. Actual groundwater flow directions can be influenced by such factors as underground structures, seasonal fluctuations, daily fluctuations and domestic and/or production wells.

4.5 Historical Use Information on the Subject Property

4.5.1 Subject Property Historical Use Summary

The subject property currently lays vacant, adjacent to additional vacant lots owned by Hudson County that remain naturally vegetated. According to information obtained from the EDR package, before the current state of the site, the Subject Property was a continually vacant, naturally vegetated site since approximately 2006. Prior to 2006, the far southern end of the site had two small structures located on it, a residential dwelling and a small commercial building, which appears to have been converted from a residential dwelling around 1980. Both residential structures appear to have been in place since the early 1930s. Five additional residential dwellings and outhouses, which are not present on the 1979 Sanborn

map, appear on the property's 1950 and 1936 Sanborn maps, but were not present on the 1928 Sanborn map. It is unknown as to the type of construction these dwellings comprised and when they were demolished. The site was entirely vacant in the 1920s and circa 1900, but three one-story dwellings were present on the south end of the site in the 1910 Sanborn map.

4.5.2 Standard Historical Records

4.5.2.1 Aerial Photographs Review

RVA representatives obtained historical aerial photographs from EDR for the years 1943, 1954, 1966, 1975, 1984, 1995, 2006, 2008, 2009, 2010, and 2011. Historical aerial photographs are provided in Appendix C. The following discussion summarizes observations from the review of aerial photographs.

- In the 1943 aerial photograph, the site is generally unchanged from its current condition although the photograph is too blurry to fully evaluate, with the exception of several small buildings occupying the southern end of the site, approximately 25% of the property. Natural vegetation covers the northern 75% of the property. The most significant difference from current conditions is the surrounding properties to the east, which show a fuel oil tank yard with aboveground tanks and a loading/unloading tank rack and a waterfront marine shipping terminal.
- The 1954 aerial photograph shows the site generally unchanged from the 1943 photograph with the property to the east expanded slightly into the Hudson River and the fuel oil tanks and racks demolished.
- The 1966 aerial photograph shows the site generally unchanged from the 1954 photograph. The adjacent property to the north shows a constructed structure which was not present in 1954.
- The 1975 aerial photograph shows the site generally unchanged from the 1966 photographs, but does show fewer buildings at the southern end of the site. The adjacent properties to the east are significantly changed, as the raised structure has been demolished and the marine terminal has been expanded and filled in with some type of landfill or soil material to create a large rectangular surface area. The property to the northwest shows a residential apartment tower not present in the 1966 photograph.
- The 1984 aerial photograph shows the site generally unchanged from the 1975 photographs, although the photograph is too blurry to fully evaluate.
- The two 1995 aerial photographs show the site generally unchanged from the 1984 photograph, although, the photographs are too blurry and too dark to fully evaluate. The adjacent properties to the east are more developed than the 1984 photograph, with roads and housing units constructed.
- The 2006 aerial photograph shows the buildings at the southern end of the site demolished. The remainder of the site is naturally vegetated and unchanged. The adjacent properties to the north and east have substantial commercial and residential developments compared to the 1995 photographs.
- The 2008 aerial photograph shows the site generally unchanged from the 2006 photograph.
- The 2009 aerial photograph shows the site generally unchanged from the 2008 photograph.
- The 2010 aerial photograph shows the site generally unchanged from the 2009 photograph.

- The 2011 aerial photograph shows the site generally unchanged from the 2010 photograph.

4.5.2.2 Sanborn© Fire Insurance Map Review

RVA representatives requested historical Sanborn© Fire Insurance Maps from EDR. EDR provided Sanborn© Fire Insurance Maps for the site area for the years 1900, 1910, 1922, 1928, 1936, 1950, 1979, 1988, 1991, 1994, 1995, 1999, 2001, 2002, 2003, 2005, and 2006. Applicable information is included in Subject Property Historical Use Summary above. Copies of the maps are provided in Appendix C.

4.5.2.3 Property Tax Files

RVA obtained available tax records for the Subject Property from the Hudson County Clerk's Office website as well as from the EDR report package. A copy is provided in Appendix A. The tax records included information regarding the parcel size, block and lot number, property transfer information, and owner as described in other sections of this report. According to the property detail report obtained from the Hudson County Clerk's Office website, the Subject Property is owned by 7903 River Road, LLC and located at Block 437, Lots 2.01 & 2.02 and zoned as Class: 4A - Commercial.

4.5.2.4 Recorded Land Title Records/Environmental Lien Search

RVA obtained available chain of title records for the Subject Property from EDR. A copy is provided in Appendix B. The Subject Property consists of two lots. No environmental liens were found for the Subject Property. The title records for each lot are as follows.

Block 437, Lot 2.01

Name of Subject Property Owner	From	To
7903 River Road, LLC	09/25/2007	present
The Township of Bergen	Pre-1940	09/25/2007

Block 437, Lot 2.02

Name of Subject Property Owner	From	To
7903 River Road, LLC	09/09/2008	present
Abel Hernandez & Bernabe Cabrera	11/21/2003	09/09/2008
Charles Sepulveda & Mercy Sepulveda	05/14/1998	11/21/2003
D & G Commercial Realty Corp.	10/05/1979	05/14/1998
Michael Lynch & Eileen Lynch	03/04/1974	10/05/1979
Alejandro Vargas & Esther C. Vargas	04/18/1973	03/04/1974
Robert S. Goldfarb & Aida Goldfarb	12/19/1972	04/18/1973
Silvio Perez & Antonia Perez	08/25/1969	12/19/1972

John J Fischetto & Hilda Fischetto	08/20/1953	08/25/1969
Lennart Nylander & Inga O. Nylander	01/29/1953	08/20/1953
The Township of Bergen	Pre-1940	01/29/1953

4.5.2.5 Historical Topographic Map Review

RVA representatives obtained historical topographic maps from EDR for the years 1897, 1900, 1903, 1905, 1940, 1947, 1955, 1956, 1966, 1967, 1979, 1981, and 1995. Historical topographic maps are provided in Appendix C. The following discussion summarizes observations from the review of the topographic maps.

- 1897: This map is the target quad of Harlem and is at a scale of 1:62500. The subject property lies at the far edge of the map and lies near the border between Hudson and Bergen Counties. While many details cannot be identified, it is clear that the Subject Property and the surrounding areas lie on steep cliffs formed by natural erosion by the Hudson River and there are very few waterfront constructed properties.
- 1900: This is an adjoining quad map of Passaic at the scale of 1:125000, so details of the Subject Property could not be identified. However, the surrounding areas have severe topographic changes and are located on steep cliffs adjacent to the Hudson River.
- 1903: This is an adjoining quad map of Paterson at the scale of 1:62500, so details of the Subject Property could not be identified. The surrounding areas remain unchanged beyond minimal natural hydraulic erosion and waterfront development.
- 1905: This is an adjoining quad map of Passaic at the scale of 1:125000, so details of the Subject Property could not be identified. The surrounding areas remain unchanged beyond minimal natural hydraulic erosion and waterfront development.
- 1940: This is an adjoining quad map of Weehawken at the scale of 1:31680, so details of the Subject Property could not be identified. The surrounding areas show no drastic changes in topography along River Road but show significant waterfront development and expansion into the Hudson River.
- 1947: This is an adjoining quad map of Weehawken at the scale of 1:25000, so details of the Subject Property could not be identified. The surrounding areas remain unchanged beyond minimal natural hydraulic erosion and waterfront development.
- 1947: This map is the target quad of Central Park and is at a scale of 1:25000. The Subject Property and surrounding areas have similar topography to the 1897 map, but there is significant waterfront expansion to the east of River Road.
- 1955: This is an adjoining quad map of Paterson at the scale of 1:24000, so details of the Subject Property could not be identified. The surrounding areas remain unchanged beyond minimal natural hydraulic erosion and waterfront development.
- 1956: This map is the target quad of Central Park and is at a scale of 1:24000. The Subject Property and surrounding areas remain unchanged from the 1947 map beyond minimal natural hydraulic erosion and waterfront development.
- 1966: This map is the target quad of Central Park and is at a scale of 1:24000. The Subject Property and surrounding areas remain unchanged from the 1956 map beyond minimal natural hydraulic erosion and waterfront development.
- 1967: This is an adjoining quad map of Weehawken at the scale of 1:24000, so details of the Subject Property could not be identified. The surrounding areas show no drastic

changes in topography along River Road but show minor yet continuous waterfront development and expansion into the Hudson River.

- 1979: This map is the target quad of Central Park photorevised from the 1966 map and is at a scale of 1:24000. The Subject Property and surrounding areas have similar topography to the 1966 map, but there is significant waterfront expansion to the east of River Road with three artificial reclamation structures.
- 1981: This is an adjoining quad map of Weehawken photorevised from the 1967 topographic map and at the scale of 1:24000, so details of the Subject Property could not be identified. The surrounding areas show no drastic changes in topography but show minor yet continuous waterfront development and expansion into the Hudson River.
- 1995: This is an adjoining quad map of Weehawken at the scale of 1:24000, so details of the Subject Property could not be identified. The surrounding areas have similar topography as in the 1981 map but show noticeable changes to the waterfront construction and development along the Hudson River.
- 1995: This map is the target quad of Central Park and is at a scale of 1:24000. The Subject Property and surrounding areas remain unchanged from the 1979 map beyond minimal natural hydraulic erosion and waterfront development.

4.5.2.6 Local Street Directories

RVA representatives obtained local street directories from EDR for the years 1973 through 2013. Copies of local street directories obtained from EDR are provided in Appendix C. The following discussion summarizes observations from the review of the Local Street Directories.

The Subject Property address was listed in the following years:

- 1973: 7903 River Road: S. Perez
- 1983: 7903 River Road: D&G Commercial & Industrial Roofing Corporation
- 1988: 7903 River Road: D&G Commercial & Industrial Roofing Corporation; D&G Sewer Service
- 1992: 7903 River Road: Associated Roofing & Sheet Metal Corporation; D&G Commercial & Industrial Roofing Corporation
- 1995: 7903 River Road: Associated Roofing & Sheet Metal Corporation

4.5.2.7 Building Department Records

RVA submitted a records request to North Bergen Township, and a response was received on February 9, 2015, indicating no record of reported environmental activity on the site.

4.5.2.8 Zoning and Land Use Records

RVA obtained available tax records for the Subject Property from the Hudson County Clerk's Office website. A copy is provided in Appendix A. The tax records included information regarding the zoning for the Subject Property. According to the tax records, the Subject Property is zoned Class: 15 – Public Property.

4.5.2.9 Other Historical Records

RVA submitted an Open Public Records Act (OPRA) request to the NJDEP and Hudson County Health Commission. Responses have been received from both organizations stating they have no records or indication of pertinent information to the Subject Property.

5.0 SITE RECONNAISSANCE

An RVA representative performed a visual assessment of the Subject Property to identify potential sources of chemical and petroleum contamination. The RVA representative assessed surficial evidence of potential impacts such as waste or refuse dumping, distressed vegetation, stained soils, and/or stained paving. Photographs recorded during the site assessment are presented in Appendix D.

5.1 Methodology and Limiting Conditions

Elizabeth Wilson, EIT of RVA performed the Subject Property reconnaissance of the Subject Property on March 19, 2015. The owner permitted unaccompanied access to the Subject Property. The weather was clear and cool. Some areas of the Subject Property were not accessible by foot due to the land slope but were visually observed from close proximity.

5.2 General Site Setting

The Subject Property is located in an area developed with commercial, industrial and residential properties. Adjacent properties to the south and southeast are developed primarily for commercial use and adjacent properties to the east and north consist primarily of residential buildings. The Subject Property and surrounding area is fairly flat in the east and south directions with a significantly steep slope to the west and northwest of the site.

5.2.1 Current Use of the Subject Property

The Subject Property currently lies vacant with overgrown natural vegetation.

5.2.2 Past Use of the Subject Property

According to information obtained from the EDR package, before the site was entirely vacant, the southern portion of the Subject Property was used for several residential dwellings and one commercial structure. This commercial activity was onsite between 1979 and 1998 and appears to have been a roofing and sheet metal shop. Residential buildings with outhouses are visible on the property as early as 1910.

5.2.3 General Description of Structures

There are no current structures on the Subject Property.

5.2.4 Roads

Vehicular access to the Subject Property is via the adjacent lot to the south off of River Road. Pedestrian access is via the sidewalk along River Road along the eastern edge of the Subject Property.

5.2.5 Potable Water Supply

There is no direct water supply to the Subject Property, as determined by the subsurface geophysical investigation. According to the visual survey performed by RVA, there are no on-site wells on the Subject Property.

5.2.6 Sewage Disposal System

There is no evident sanitary sewer service to the Subject Property, as determined by the subsurface geophysical investigation performed by Foresight Locating, LLC, and the visual survey performed by RVA.

5.3 Interior and Exterior Observations

RVA identified current or past uses likely to involve the use, treatment, storage, disposal or generation of hazardous substances or petroleum products, to the extent they were visually and/or physically observed during the Subject Property visit or identified from the interviews or the records review. The substances and approximate quantities, types of containers (if any) and storage conditions are discussed in the following subsections.

5.3.1 Storage Tanks

5.3.1.1 Underground Storage Tanks (USTs)

RVA did not observe any indication of present or past underground storage tanks at the Subject Property during the site visit.

5.3.1.2 Aboveground Storage Tanks (ASTs)

RVA did not observe any indication of present or past above-ground storage tanks at the Subject Property during the site visit.

5.3.2 Odors

RVA did not note any odors of concern during the Subject Property visit.

5.3.3 Pools of Liquid

RVA did not observe any pools of liquid during the Subject Property visit that should pose an environmental concern.

5.3.4 Drums, Hazardous Substance and Petroleum Product Containers

RVA did not observe any storage drums or hazardous product containers during the Subject Property visit that should pose an environmental concern.

5.3.5 Heating/Cooling

There is no structure on the property and therefore no related heating or cooling concerns.

5.3.6 Stains or Corrosion

RVA did not observe any staining of the ground surfaces during the Subject Property visit. There are no pipes or other items on site that would present with corrosion.

5.3.7 Drains and Sumps

RVA did not observe any indication of present or past drains or sump systems at the Subject Property during the site visit.

5.3.8 Pits, Ponds, or Lagoons

No evidence of pits, ponds or lagoons of environmental concern was observed on the Subject Property.

5.3.9 Stained Soil or Pavement

RVA did not observe any staining of the soil and vegetated areas on site during the Subject Property visit.

5.3.10 Stressed Vegetation

RVA did not observe stressed vegetation during the Subject Property visit.

5.3.11 Solid Waste Disposal

RVA did not observe any indication of present or past solid waste disposal at the Subject Property during the site visit.

5.3.12 Waste Water

RVA did not observe any indication of present or past wastewater concerns at the Subject Property during the site visit. In the past, historical wastewater generated included waste water from residential and commercial activities, but as there are no currently visible drains or sewer systems in place, RVA does not anticipate these past uses to pose any environmental concern.

5.3.13 Wells

According to the site inspection and available records, there are no on-site potable water wells on the Subject Property.

5.3.14 Septic Systems

According to the site inspection and available records, there are no on-site septic or sewer systems on the Subject Property.

5.3.15 Other Interior and Exterior Observations

RVA inspected limited portions of the Subject Property as parts along the western edge are too steep for pedestrian access. Given the unchanged topography of the Subject Property over the past century, it is

unlikely that these sections of the site were utilized. RVA did not observe any other adverse environmental conditions at the Subject Property.

5.4 Off-Site Observations

The following two sections discuss the off-site observations, to the extent that the current uses of the adjoining properties were observable during the Subject Property reconnaissance.

5.4.1 Adjoining Properties

Several off-site properties were included in the database listings reported in the EDR. The sole listing that may represent an environmental concern to the Subject Property is the Hudson River PCBs site, but since the Hudson River lies to in the ESE direction of the site, it is not likely to have been significantly affected by this contamination.

5.4.2 Other Surrounding Properties

During the Subject Property visit, there were no conditions observed on other surrounding properties that were likely to indicate an REC for the Subject Property.

6.0 INTERVIEWS

6.1 Overview

The purpose of interviews with past and present owners and occupants is to obtain information to assist in identifying any RECs in connection with the Subject Property. Information obtained through these interviews is discussed in relevant sections of this Report.

6.2 Interview with Owners, Past Owners, Past Operators and Past Occupants

RVA conducted an interview with the current Co-Owner, Mr. Bernabe Cabrera, of 7903 River Road, LLC on March 4, 2015. According to the Co-Owner, there have been no known environmental concerns with the Subject Property. There were no buildings on site and the vegetated land was similar to its current condition at the time of the property sale, and no improvements to the site were made since that time. Mr. Cabrera also stated that no chemicals were or historically currently stored there as far as he knows.

6.3 Interview with Local Government Officials

RVA submitted a request to the Township of North Bergen for available records for the Subject Property. Documentation was received from Ms. Erin Barillas, RMC, Township Clerk for the Township of North Bergen stating their offices had no record of reported environmental activity for the Subject Property.

6.4 Interviews with Others

No other interviews were conducted as a part of this assessment.

7.0 FINDINGS AND CONCLUSIONS

This section identifies the known or suspect RECs, historical RECs, and de minimis conditions identified during the assessment.

7.1 Findings and Opinions

7.1.1 Recognized Environmental Conditions

This assessment has revealed no RECs in connection with the Subject Property.

7.1.2 Historical Recognized Environmental Conditions

An HREC is an environmental condition which, in the past, would have been considered an REC, but which may or may not be considered an REC currently. RVA's rationale for considering these environmental conditions as HRECs is based solely on the information stated herein. Designation as an HREC however, does not preclude the potential for the condition to affect the Subject Property. RVA did not identify any HRECs at the Subject Property.

7.1.3 De Minimis Conditions

De minimis conditions are not recognized environmental conditions. De minimis conditions generally do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. No de minimis conditions were identified.

7.2 Additional Investigation

Additional investigation tasks in Section 8.0 have been identified to evaluate potential for USTs and other subsurface anomalies related to former structures on the property.

7.3 Data Gaps

A Data Failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Some Data Failures may comprise Data Gaps. A Data Gap is defined as the lack of or inability to obtain information required by the ASTM Standard despite good faith efforts by the EP to gather such information. A significant data gap occurs when a data gap impacts the ability of the EP to identify RECs. No data gaps have been identified.

8.0 ADDITIONAL SERVICES

The County of Hudson has requested RVA to provide services in addition to those specified in the ASTM Standard. These additional services include:

- Ground-penetrating radar to determine underground anomalies.

The scopes of these evaluations are provided in the following sections.

8.1 Ground Penetrating Radar

As a good management practice, RVA performed a Geophysical Investigation in the form of a GPR survey at the Subject Property, as requested by the County of Hudson. While there was no indication of any former buried tanks on the Subject Property, the investigation focused in the areas of the previous dwellings and along the eastern property edge adjacent to River Road. This investigation took place on March 19, 2015, and only found underground gas and electrical service lines along the eastern boundary of the Subject Property. The complete investigative report from Foresight Locating, LLC, is provided in Appendix #.

9.0 REFERENCES

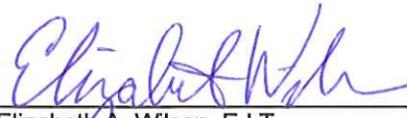

The Report's author annotated the reference sources relied upon in preparing the Phase I ESA in the relevant sections of this Report.

10.0 QUALIFICATIONS AND SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Elizabeth Wilson, EIT, conducted the Subject Property visit and prepared this Report and Thomas Smith, LSRP, served as the Quality Control (QC) reviewer of the Report.

"We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

The EDR Chain of Title Report

EDR Chain of Title Report

The EDR Chain of Title Report tracks a line of successive owners from the present back to 1940 of a particular parcel of property, linked together by recorded transactions which pass title. Available nationwide, this report provides a summary of a property's ownership history and is a valuable source for determining the prior uses of a property.

A network of professional abstractors following established procedures, use client supplied address information to locate:

- Historical Chain of Title;
- Leases and Miscellaneous

Thank you for your business.

DEED

THIS DEED is made on September 5, 2007

000012827 09/25/2007 11:01A
RECEIVED WILLIE L. FLOOD
AND HUDSON COUNTY
RECORDED REGISTER OF DEEDS
DEE Receipt No. 409513

BETWEEN: **TOWNSHIP OF NORTH BERGEN**, A Municipal Corporation of the State of New Jersey, located at 4233 Kennedy Boulevard, North Bergen, NJ 07047, referred to as the *Grantor*,

AND **7903 RIVER ROAD, LLC**, having an address of 224 61st Street, West New York, New Jersey 07093, referred to as the *Grantee*.

The words "Grantor" and "Grantee" shall mean all Grantors and Grantees listed above.

1. **Transfer of Ownership.** The Grantor grants and conveys (transfers ownership of) the property (called the "Property") described below to the Grantee. This transfer is made for the sum of **One Million Sixty Thousand Dollars (\$1,060,000.00)**

The Grantor acknowledges receipt of this money.

2. **Tax Map Reference.** (N.J.S.A. 46:15-1.1) Municipality of North Bergen
Block No. 437 (f/k/a 437A) Lot No. 2.01 (f/k/a 2.A) Qualifier No. _____
Account No. _____

3. **Property.** The property consists of the land and all the buildings and structures on the land in the Township of North Bergen, County of Hudson and State of New Jersey. The legal description is annexed hereto and made a part hereof.

The street address of the Property is 7909-8121 River Road, North Bergen, NJ 07047

BEING premises conveyed to the grantor by Final Judgment dated May 17, 1922 recorded September 25, 1937 in the Register's Office of the County of Hudson, New Jersey, in Deed Book 1909, page 383.

This conveyance is made in accordance with the provisions of the Local Lands & Buildings Law, N.J.S.A. 40A:12-1 et seq., and was authorized by Ordinance No. 1094-07 of the Township of North Bergen adopted on June 16, 2007 in accordance with the provisions of the Open Public Meetings Act, N.J.S.A. 10:4-6 et seq.

4. **Promises by Grantor.** The Grantor promises that the Grantor has done no act to encumber the Property. This promise is called a "covenant as to grantor's acts" (N.J.S.A.46:4-6). This promise means that the Grantor has not allowed anyone else to obtain any legal rights which affect the Property (such as by making a mortgage or allowing a judgment to be entered against the Grantor).

AFFIDAVIT OF CONSIDERATION FOR USE BY SELLER

(Chapter 49, P.L. 1968, as amended through Chapter 33, P.L. 2006) (N.J.S.A. 46:15-5 et seq.)

BEFORE COMPLETING THIS AFFIDAVIT, PLEASE READ THE INSTRUCTIONS ON THE REVERSE SIDE OF THIS FORM.

STATE OF NEW JERSEY }
COUNTY OF BERGEN } SS. County Municipal Code 0908
Municipality of Property Location: North Bergen

FOR RECORDER'S USE ONLY
Consideration \$ As per RTF
RTF paid by seller \$ _____
Date 9-14-07 By VS

† Use symbol "C" to indicate that fee is exclusively for county use.

(1) **PARTY OR LEGAL REPRESENTATIVE** (See Instructions 3 and 4 attached)
Deponent, Brian M. Chewcaskie, being duly sworn according to law upon his/her oath deposes
and says that he/she is the legal representative in a deed dated Sept. 5, 2007
(Grantor, Grantee, Legal Representative, Corporate Officer, Officer of Title Co., Lending Institution, etc.)
transferring real property identified as Block No. 437 (f/k/a 437.A) Lot No. 2.01 (fka 2.A) located at
7909-8121 River Road, North Bergen, NJ and annexed thereto.
(Street Address, Town)

(2) **CONSIDERATION:** \$ 1,060,000 (See Instructions 1 and 5)
(3) Property transferred is Class 4A 4B 4C (circle one). If Class 4A, calculation in Section 3A is required.

(3A) REQUIRED CALCULATION OF EQUALIZED VALUATION FOR ALL CLASS 4A COMMERCIAL PROPERTY TRANSACTIONS: (see Instructions 5A and 7)

Total Assessed Valuation ÷ Director's Ratio = Equalized Assessed Valuation
\$ _____ ÷ _____ % = \$ _____

If Director's Ratio is less than 100%, the equalized valuation will be an amount greater than the assessed value. If Director's Ratio is equal to or in excess of 100%, the assessed value will be equal to the equalized value.

(4) **FULL EXEMPTION FROM FEE:** (see Instruction 8)
Deponent states that this deed transaction is fully exempt from the Realty Transfer Fee imposed by C. 49, P.L. 1968, as amended through C. 66, P.L. 2004, for the following reason(s). Mere reference to the exemption symbol is insufficient. Explain in detail. Grantor is municipal corporation of the State of New Jersey

(5) **PARTIAL EXEMPTION FROM FEE:** (see Instruction 9) **NOTE:** All boxes below apply to grantor(s) only.
ALL BOXES IN APPROPRIATE CATEGORY MUST BE CHECKED. Failure to do so will void claim for partial exemption.
Deponent claims that this deed transaction is exempt from the State's portion of the Basic Fee, Supplemental Fee and General Purpose Fee, as applicable, imposed by C. 176, P.L. 1975; C. 113, P.L. 2004 and C. 66, P.L. 2004 for the following reason(s): _____

A. SENIOR CITIZEN (see Instruction 9)
 Grantor(s) 62 years of age or over.*
 One- or two-family residential premises.
 Resident of the State of New Jersey.
 Owned and occupied by grantor(s) at time of sale.
 Owners as joint tenants must all qualify.

B. BLIND (see Instruction 9) **DISABLED** (see Instruction 9)
 Grantor(s) legally blind.*
 One- or two-family residential premises.
 Owned and occupied by grantor(s) at time of sale.
 Owners as joint tenants must all qualify.
 Resident of the State of New Jersey.
* IN THE CASE OF HUSBAND AND WIFE/CIVIL UNION PARTNERS, ONLY ONE GRANTOR NEEDS TO QUALIFY IF OWNED AS TENANTS BY THE ENTIRETY.
 Grantor(s) permanently and totally disabled.*
 Receiving disability payments.*
 Not gainfully employed.*
 One- or two-family residential premises.
 Owned and occupied by grantor(s) at time of sale.
 Owners as joint tenants must all qualify.
 Resident of the State of New Jersey.

C. LOW AND MODERATE INCOME HOUSING (see Instruction 9)
 Affordable according to HUD standards.
 Meets income requirements of region.
 Reserved for occupancy.
 Subject to resale controls.

(6) **NEW CONSTRUCTION** (see Instructions 2, 10 and 12) **BK:08335 PG:00078**
 Entirely new improvement.
 Not previously used for any purpose.
 Not previously occupied.
 "NEW CONSTRUCTION" printed clearly at the top of the first page of the deed.

(7) Deponent makes this Affidavit to induce the County Clerk or Register of Deeds to record the deed and accept the fee submitted herewith in accordance with the provisions of Chapter 49, P.L. 1968, as amended through Chapter 33, P.L. 2006.

located at 7909-8121 RIVER ROAD, NORTH BERGEN, N.J. and annexed thereto.
(Street Address, Town)

(2) CONSIDERATION \$ 1,060,000.00 (See Instructions 1, 5 and 11 on the reverse side.)

Entire consideration is in excess of \$1,000,000:

PROPERTY CLASSIFICATION CHECKED BELOW SHOULD BE TAKEN FROM THE OFFICIAL TAX LIST (A PUBLIC RECORD) OF THE MUNICIPALITY WHERE THE REAL PROPERTY IS LOCATED IN THE YEAR THAT THE TRANSFER IS MADE.

(A) When Grantee is required to remit the 1% fee, complete below:

- Class 2 - Residential
- Class 3A - Farm property (Regular) and any other real property transferred to same grantee in conjunction with transfer of Class 3A property.
- Class 4A - Commercial Properties (if checked, calculation on (c) required below)
- Class 4C - Residential Cooperative Unit (4 Families or less)

(B) When Grantee is not required to remit the 1% fee, complete below:

- Property class. Circle applicable class(es): 1 4B 4C **15**
Property classes: 1-Vacant Land, 4B-Industrial Properties, 4C-Apartments (other than cooperative unit), 15-Public Property
- Exempt Organization pursuant to federal Internal Revenue Code of 1986
- Incidental to corporate merger or acquisition and equalized assessed valuation less than 20% of total value of all assets exchanged in merger or acquisition. (If checked, calculation in (C) below required and **MUST ATTACH COMPLETED RTF-4.**)

(C) **REQUIRED CALCULATION OF EQUALIZED ASSESSED VALUATION FOR ALL CLASS 4A COMMERCIAL PROPERTY TRANSACTIONS** (See Instructions 6 and 7 on the reverse side.)

Total Assessed Valuation ÷ Director's Ratio = Equalized Valuation

\$ _____ ÷ _____ % = \$ _____

If Director's Ratio is less than 100%, the equalized valuation will be an amount greater than the assessed value. If Director's Ratio is equal to or in excess of 100%, the assessed value will be equal to the equalized value.

(3) TOTAL EXEMPTION FROM FEE (See Instruction 8 on the reverse side.)

Deponent states that this deed transaction is fully exempt from the Realty Transfer Fee imposed by C. 49, P.L. 1968, as amended through C. 66, P.L. 2004, for the following reason(s). Mere reference to the exemption symbol is insufficient. Explain in detail. THE GRANTOR ON THE DEED IS A MUNICIPAL CORPORATION (TOWNSHIP OF NORTH BERGEN)

(4) Deponent makes this Affidavit of Consideration for Use by Buyer to induce the county clerk or register of deeds to record the deed and accept the fee submitted herewith pursuant to the provisions of Chapter 49, P.L. 1968, as amended through Chapter 33, P.L. 2006.

SELLER(S) INFORMATION (see Instructions, page 2):

Name(s) Township of North Bergen

Current Resident Address 4233 Kennedy Boulevard

City, Town, Post Office North Bergen State NJ Zip Code 07047

PROPERTY INFORMATION (Brief Property Description):

Block(s) 437 (f/k/a 437.A) Lot(s) 2.01 (f/k/a 2.A) Qualifier _____

Street Address 7909-8121 River Road

City, Town, Post Office North Bergen State NJ Zip Code 07047

Seller's Percentage of Ownership 100% Consideration \$1,060,000.00 Closing Date Sept. 5, 2007

SELLER'S ASSURANCES (Check the Appropriate Box) (Boxes 2 through 8 apply to NON-residents):

- 1. I am a resident taxpayer (individual, estate or trust) of the State of New Jersey pursuant to N.J.S.A. 54A:1-1 et seq. and will file a resident gross income tax return and pay any applicable taxes on any gain or income from the disposition of this property.
- 2. The real property being sold or transferred is used exclusively as my principal residence within the meaning of section 121 of the federal Internal Revenue Code of 1986, 26 U.S.C. s. 121.
- 3. I am a mortgagor conveying the mortgaged property to a mortgagee in foreclosure or in a transfer in lieu of foreclosure with no additional consideration.
- 4. Seller, transferor or transferee is an agency or authority of the United States of America, an agency or authority of the State of New Jersey, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, the Government National Mortgage Association, or a private mortgage insurance company.
- 5. Seller is not an individual, estate or trust and as such not required to make an estimated payment pursuant to N.J.S.A.54A:5-1-1 et seq.
- 6. The total consideration for the property is \$1,000 or less and as such, the seller is not required to make an estimated payment pursuant to N.J.S.A. 54A:5-1-1 et seq.
- 7. The gain from the sale will not be recognized for federal income tax purposes under I.R.C. Section 721, 1031, 1033 or is a cemetery plot. (CIRCLE THE APPLICABLE SECTION.) If such section does not ultimately apply to this transaction, the seller acknowledges the obligation to file a New Jersey income tax return for the year of the sale.
- 8. Transfer by an executor or administrator of a decedent to a devisee or heir to effect distribution of the decedent's estate in accordance with the provisions of the decedent's will or the intestate laws of this state.

SELLER(S) DECLARATION:

The undersigned understands that this declaration and its contents may be disclosed or provided to the New Jersey Division of Taxation and that any false statement contained herein could be punished by fine, imprisonment, or both. I furthermore declare that I have examined this declaration and, to the best of my knowledge and belief, it is true, correct and complete.

BEING the same property and premises granted to Grantors by Deed from Charles Sepulveda and Mercy Sepulveda, H/W, dated November 3, 2003, and recorded in the Office of the Hudson County Register on November 21, 2003 in Deed Book 7170 at Page 310.

DEED from Charles and Mercy Sepulveda, H/W had erroneously listed the property as Tax Lot 437 A and Block 2B. This Deed corrects that defect in Deed Book 7170 at Page 310.

GRANTOR Bernave Cabrera's name was not spelled correctly in the Deed from Sepuleveda. His true name is Bernabe Cabrera. This Deed also corrects that defect in Deed Book 7170 at Page 310.

BOTH Grantors are members of the 7903 River Road, L.L.C., a limited liability company duly formed in the State of New Jersey on August 16, 2007. Said Limited Liability Company is in full force and effect.

THIS property has never been used a marital residence by either party.
THIS property is vacant undeveloped land.

NO RECORDING FEE

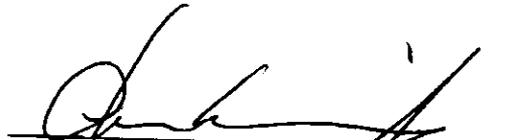

The street address of the Property is:
7903-7907 River Road, North Bergen, New Jersey 07047

4. Promises by Grantor. The Grantor promises that the Grantor has done no act to encumber the Property. This promise is called a "covenant as to grantor's acts" (N.J.S.A. 46:4-6). This promise means that the Grantor has not allowed anyone else to obtain any legal rights which affect the Property (such as by making a mortgage or allowing a judgment to be entered against the Grantor).

5. Signatures. The Grantor signs this Deed as of the date at the top of the first page. (Print name below each signature.)

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: A review of the NPL list, as provided by EDR, and dated 09/29/2014 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>HUDSON RIVER PCBS</i>	<i>NO STREET APPLICABLE</i>	<i>ESE 0 - 1/8 (0.097 mi.)</i>	<i>0</i>	<i>8</i>
<i>QUANTA RESOURCES</i>	<i>ONE RIVER RD</i>	<i>NNE 1/4 - 1/2 (0.361 mi.)</i>	<i>0</i>	<i>8</i>

Federal CERCLIS list

CERCLIS: A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>HUDSON RIVER PCBS</i>	<i>NO STREET APPLICABLE</i>	<i>ESE 0 - 1/8 (0.097 mi.)</i>	<i>0</i>	<i>8</i>
<i>QUANTA RESOURCES</i>	<i>ONE RIVER RD</i>	<i>NNE 1/4 - 1/2 (0.361 mi.)</i>	<i>0</i>	<i>8</i>

Federal CERCLIS NFRAP site List

CERC-NFRAP: A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 4 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Mesozoic
System: Triassic
Series: Triassic
Code: Tr (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOONTON
Soil Surface Texture: gravelly - loam
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class: Not reported
Hydric Status: Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel: MODERATE
Depth to Bedrock Min: > 60 inches
Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	8 inches	gravelly - loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
2	8 inches	30 inches	gravelly - loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 6.00 Min: 4.50
3	30 inches	60 inches	gravelly - sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.20 Min: 0.06	Max: 6.50 Min: 5.60
4	60 inches	72 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.06	Max: 7.30 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: shaly - loam
silt loam
extremely stony - loam
unweathered bedrock
very stony - loam
stony - silt loam
loam

Surficial Soil Types: shaly - loam
silt loam
extremely stony - loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

unweathered bedrock
 very stony - loam
 stony - silt loam
 loam

Shallow Soil Types: cobbly - fine sandy loam

Deeper Soil Types: gravelly - loam
 unweathered bedrock
 gravelly - sandy loam
 gravelly - fine sandy loam
 stratified

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 609-984-2243

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Remington & Vernick Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

FORESIGHT LOCATING, LLC
Po Box 6385
Freehold, NJ 07728
609-259-1244

Foresight Locating, LLC Disclaimer:

Services and resulting interpretations provided by Foresight Locating, LLC, shall be performed with our best professional efforts. The depth of the GPR, EM and/or MAG signal penetration is dependent upon the electrical properties of the material probed. Thus, the resulting interpretations are opinions based on inference from acquired GPR, EM, MAG and/or other data. Foresight Locating, LLC, does not guarantee the desired signal penetration depth, accuracy or correctness of our interpretations. Foresight Locating, LLC will not accept liability or responsibility for any losses, damages or expenses that may be incurred or sustained by any services or interpretations performed by Foresight Locating, LLC or others.

Project Summary:

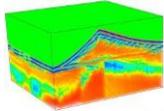

This report contains the findings of a non-intrusive geophysical subsurface investigation performed by Foresight Locating, LLC (FLL) on March 19, 2015 at 7903-7909 River Rd. North Bergen, NJ 07047.

Scope of Work:

Foresight Locating, LLC performed a geophysical subsurface investigation within all accessible areas [See figure 1] of the above mentioned address to find and designate UST's and utilities.

Investigative Procedure:

GPR profiles were completed in a grid pattern in an attempt to delineate subsurface metallic anomalies. FLL investigated the accessible sections of the specified search area using GPR in an attempt to locate subsurface metallic anomalies. The GPR data was collected utilizing a 500 MHz antenna system and data profiles were recorded for subsequent review and post-processing.

FORESIGHT LOCATING, LLC
Po Box 6385
Freehold, NJ 07728
609-259-1244

Investigative Results:

All designated anomalies were marked on-site with spray paint in the following colors; electric, water, communications – pink.

Based on the results of the GPR and TW-6 survey, no anomalies consistent with UST's were found during this survey.

Geophysical Instrumentation:

The following is a list and brief description of the geophysical instrumentation utilized for this investigation:

Metallic Locator

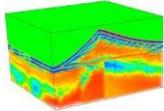

The Fisher TW-6 metallic locator is designed to find pipes, cables, and other metallic objects such as underground storage tanks. The TW-6 transmitter generates an electromagnetic field that induces electrical currents in the subsurface. These currents produce a secondary electromagnetic field that is measured by the TW-6.

Ground Penetrating Radar (GPR)

A Seekers RR500 unit was used for this investigation. Profiles collected on site are digitally recorded for subsequent data analysis and post-processing at the FLL office.

GPR Antenna Systems:

Each GPR antenna operates at a different center band frequency that is measured in megahertz (MHz). The use of different antenna systems is based on the fact that the higher the antenna frequency, the greater the GPR image resolution (ability to detect smaller-sized targets), but at the cost of signal penetration depth. Thus the converse is true: the lower the antenna frequency, the deeper the signal penetration, but at the cost of image resolution. FLL uses a 500 MHz Antenna which is typically used for

FORESIGHT LOCATING, LLC
Po Box 6385
Freehold, NJ 07728
609-259-1244

finding utilities. A 500 MHz Antenna has the capability to penetrate dense wet clay to a depth of 1.8 meters and can penetrate clean dry sand to a depth of 4.4 meters. The 500 MHz Antenna can locate a 4 inch pipe at a depth of 4 meters and a 3/16 inch hose at a depth up to 1.8 meters.

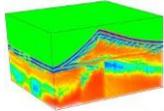

GPR Data Interpretation:

The GPR data profiles recorded at this site are downloaded from the collection unit for storage and analysis. Various computerized post-processing techniques are used in an attempt to improve the data resolution. Each profile is individually reviewed and the findings correlated with data from the other geophysical instruments used in this investigation.

GPR Applications:

GPR data can be collected and used to delineate underground metallic and nonmetallic tanks, drums and utilities. The data can also be interpreted to delineate utility leaks, sinkholes and voids, geologic features such as near-surface consolidated rock and contamination plumes. GPR is the only nonintrusive technique capable of mapping burials within a cemetery. Other applications include the delineation of buried artifacts and historical structures, as well as, use in the structural engineering fields (concrete floor/wall analysis, post-tensioned cable locating).

GPR Anomalies: Typically, subsurface anomalies delineated by GPR could be associated with utilities, isolated debris, foundational remnants, buried concrete, or certain identifiable features such as USTs, septic tanks, drums, buried reinforced concrete, etc.
