

A TOPOGRAPHICAL MAP
OF THE
VICINITY OF CAMDEN
TO BURLINGTON, WINSLOW, ELMER AND SWEDSBORO.

From Original Surveys and Levelings
Based on the Triangulation of the U.S. Coast and Geodetic Survey.

Scale: 1 Mile to an Inch

GEORGE H. COBB, State Geologist, C. C. VERMEULE, Topographer.

1887.

NOTE: The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The rise or fall from any one level line to the next will show the height of the surface at a point indicated by a small cross. The dotted lines on the blue ground are lines of equal depth of water, and the figures accompanying show depth at mean or half tide.

LEGEND

- TIDE MARSH
- FRESH MARSH
- MARSH BELOW HIGH WATER
- RECLAIMED LAND (Cottages)
- RECLAIMED LAND (Marsh)
- PIKE SWAMP
- CRANBERRY BOGS
