

A TOPOGRAPHICAL MAP
OF THE
VICINITY OF CAMDEN
TO BURLINGTON, WINSLOW, ELMER AND SWEDSBORO.

From Original Surveys and Levelings
Based on the Triangulation of the U.S. Coast and Geodetic Survey.

Scale: 1 Mile to an Inch.

GEORGE H. COOK, State Geologist, C.C. VERMELLE, Topographer.

1888.

NOTE. The curved lines are level lines drawn on the earth's surface. All points through which they pass are at the same level, and their height above sea level is shown by the figures on the line. The rise or fall from any line to the next is as the figures will show. Dotted lines on any line show the actual elevation of the surface at a point indicated by a small cross. The dotted lines on the blue ground are lines of equal depth of water, and the figures accompanying show depth at mean or half tide.
