

GEOLOGICAL SURVEY OF NEW JERSEY

HENRY B. KÜMMEL, State Geologist C.C. VERMEULE, Topographer.

ORIGINAL SURVEY 1887  
RESURVEYED 1898-1903  
REVISED 1908

ATLAS SHEET No. 26

NOTE. The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The rise or fall from any line to the next is, as the figures will show, 10 or 20 feet. Figures not on any line show the actual elevation of the surface at a point indicated by a small circle. Figures on blue ground indicate the depth of water at mean low tide.
