

STATE OF NEW JERSEY  
DEPARTMENT OF CONSERVATION AND DEVELOPMENT  
ATLAS SHEET No. 26

SHEET 26  
DIVISION OF GEOLOGY AND TOPOGRAPHY  
HENRY B. KÜMMEL, State Geologist

ORIGINAL SURVEY, 1887, RESURVEYED, 1898-1903  
PRINCIPAL FEATURES REVISED, 1908, 1920-1  
EDITION OF 1932

NOTE—The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The rise or fall from any line to the next is, as the figures will show, in feet. Figures on or away from the line show the actual elevation of the surface at a point indicated by a small cross. Figures on blue ground indicate the depth of water at mean low tide.
