SHEET 26
DIVISION OF GEOLOGY AND TOPOGRAPHY
MEREDITH E. JOHNSON, State Geologist

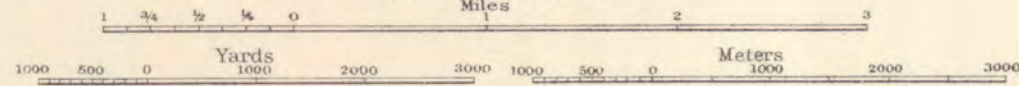

NOTE.—The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The figures on any line show the actual elevation of the surface at a point indicated by a small cross. Figures on blue ground indicate the depth of water at mean low tide.
