

NOTE: The contour lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The rise or fall from any line to the next is as the figures will show up feet. Figures not on any line show the actual elevation of the surface at a point indicated by a small cross. Figures in blue indicate the depth of water at mean low tide.

KEY TO ADJOINING SHEETS

25	26
28	29
32	33

Scale: 1 Mile to an inch.

Contour Interval: 10 feet
