

SHEET 31.  
DIVISION OF GEOLOGY AND WATERS  
HENRY B. KÜMMEL, State Geologist

ORIGINAL SURVEY, 1886  
PRINCIPAL FEATURES REVISED, 1903, 1925.  
EDITION OF 1925

NOTE.—The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The rise or fall from any line to the next is, as the figures will show, 10 or 20 feet. Figures not on any line show the actual elevation of the surface at a point indicated by a small cross. Figures on Delaware River area indicate the depth of water at mean low tide.

KEY TO ADJOINING SHEETS

	27	28
30	31	32
34	35	36

Scale: 1 Mile to an Inch.

2000 3000 4000 5000

Common Interval: 10,000

Contour interval: 10 feet
