ORIGINAL SURVEY, 1886
PRINCIPAL FEATURES REVISED, 1903, 1934
EDITION OF 1941 CHARLES P. WILBUR, Director

NOTE.—The curve of lines are level lines drawn on the earth's surface. All points through which any given line pass are at the same level and their height above mean sea level is shown by the figures on the line. The rise or fall from any line to the next is, as the figures will show, never 20 feet. Figures not on any line show the actual elevation of the surface at a point indicated by a small cross. Figures on blue ground except at point indicate the depth of water at mean low tide.
