

STATE OF NEW JERSEY
DEPARTMENT OF CONSERVATION AND DEVELOPMENT
ATLAS SHEET No. 33

SHEET 33
DIVISION OF GEOLOGY AND TOPOGRAPHY
HENRY B. KÜMMEL, State Geologist

ORIGINAL SURVEY, 1884
PRINCIPAL FEATURES REVISED, 1905, 1925, 1936.
EDITION OF 1937

NOTE. The curved lines are level lines drawn on the earth's surface. All points through which they pass are at the same level and their height above sea level is shown by the figures on the lines. The rise or fall from any line to the next is as the figure with three zeros. Figures not on any line show the actual elevation of the point in feet indicated by a small cross. The dotted lines on the blue ground are lines of equal depth water, and the figures accompanying show depth in fathoms or feet.
