

GEOLOGICAL SURVEY OF NEW JERSEY

HENRY B. KÜMMEL, State Geologist

C. C. VERMEULE, Topographer

ORIGINAL SURVEY 1886

PRINCIPAL CULTURE REVISED 1907

ATLAS SHEET No. 35

NOTE. The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The dots or half dots are as the figures will show feet (10) feet on the northwest part and five (5) feet on the remainder of the map. Figures not on any line show the actual elevation of the surface at a point indicated by a small circle. The dotted lines on the blue ground are lines of equal depth of water, and the figures accompanying show depth at mean or half tide.

Scale 1 Mile to an Inch.
Miles
Yards
Meters

The shore lines of tidal waters, and the triangulation are in part from the United States Coast and Geodetic Survey. The highways, railroads and some other details were revised between 1905 and 1907. The forests are as in 1885.
