ATLAS SHEET No. 35

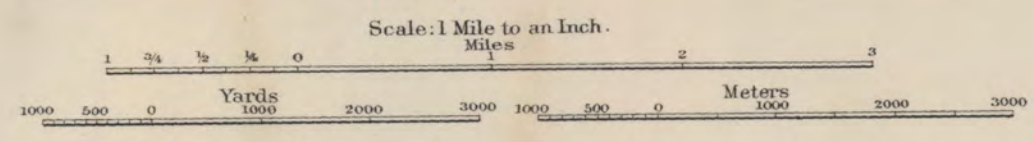

SHEET 35  
DIVISION OF GEOLOGY AND WATERS  
HENRY B. KUMMEL, State Geologist

PRINTED 1916  
ORIGINAL SURVEY, 1886; REVISION, 1917  
C. C. VERMEULE, Topographer

TOPOGRAPHIC ENGINEER  
Department of  
Conservation & Development  
State House Annex, Trenton, N. J.  
  
PERMANENT FILE  
THESE MAPS FOR REFERENCE ONLY

NOTE: The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The rise or fall from any line to the next is shown by the figures (100 feet on the northwestern part and five (5) feet on the remainder of the map. Figures not on any line show the actual elevation of the surface at a point indicated by a small cross. The dotted lines on the blue ground are lines of equal depth of water, and the figures accompanying show depth at mean or half tide.

The shore lines of tide waters, and the triangulation are in part from the United States Coast and Geodetic Survey. The highways, railroads and some other details were revised in 1917. The ground was in 1886.
