

# GEOLOGICAL SURVEY OF NEW JERSEY

HENRY B. KÜMMEL, State Geologist

C. C. VERMEULE, Topographer

ORIGINAL SURVEY 1884  
PRINCIPAL FEATURES REVISED 1913

ATLAS SHEET No. 37

NOTE. The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The rise or fall from any line to the next is, as the figures will show on the left on the northwestern part and the right on the southeastern part of the map. The figures on the right show the profile of the surface of the water. The figures on the left show the profile of the surface of the land. The figures on the right show the profile of the surface of the water. The figures on the left show the profile of the surface of the land.

Scale: 1 Mile to an inch.
