## Definition

### **Firewood Dealer**

A Firewood dealer utilizes trees with poor form for the purpose of firewood distribution.

### **Logger**

A logger is a person who fells trees for timber; a lumberjack. Trees are typically felled using chainsaws or larger scale harvesting equipment.

### **Mulch Producer**

A mulch producer is a business that chips branches and less desirable tree parts to make mulch. Tree chippers and tub grinders are typically used in mulch making.

### **Portable Sawmill**

A portable sawmill is a mechanized saw that cuts logs into lumber. The sawmill can be trailered to a site where there are logs.

### **Sawmill**

A sawmill is a facility where logs are sawed into lumber by machine. The logs are trucked from the harvest site to the facility.

### **Tree Farm**

A tree farm is a privately owned forest-land dedicated to the growing of forest crops for commercial purposes. It is protected and managed for continuous production of forest products.

### **Tree expert**

A tree expert is a person skilled in the science of tree care that engages in the business of the treatment, care, or removal of trees.

### **Wood Manufacturer**

A wood manufacturer is a person or company that makes wood products to sell.
