RE: OYSTER CREEK NUCLEAR GENERATING STATION - TRITIUM

Transmitted via facsimile to 609-292-7695

Dear Commissioner Mauriello:

Our office recently learned through media reports in both the Asbury Park Press and the Star Ledger of an investigation into the discovery of tritium in a cable vault at the Oyster Creek Nuclear Generating Facility.

It is our understanding that Oyster Creek officials have notified the Nuclear Regulatory Commission (NRC) and that your Department will be assisting in the investigation.

Accordingly, our Delegation is respectfully requesting a report and/or briefing by an appropriate member of your staff on this matter, as soon as your investigation is completed.

Thank you, in advance, for your attention to this request for assistance. We look forward to your Department's report.

Sincerely,
