

## Historically Applied Pesticide Technical Guidance

List of Significant changes from Version 2.0 (August 2016) to Version 3.0 (December 2018)

---

1. Cover Page: Changed date from July 2016 to November 2018.
2. Cover Page: Changed Version from 2.0 to 3.0.
3. Minor revisions were made throughout the document in an effort to provide updated links and correct grammar.
4. Section 1 Intended Use of Guidance: Revised to update stakeholder affiliation.
5. Section 2 Purpose: Clarified language regarding the scope of the guidance document; added language to clarify when a property needs to be investigated pursuant to this guidance document and included a link to RAO Notice.
6. Section 4.0: Revised language to include golf courses and renumbered the sections below.
  - a. 4.1.a: Added language, which was previously in section 4.1, to clarify why these locations should be sampled. Added the phrase “in agricultural settings” to differentiate between guidance for golf course and agricultural settings.
  - b. 4.1.b: Added language to clarify sampling depths if fill was brought to the site or the site was regraded.
  - c. 4.1.d: Expanded the list of analytical parameters and clarified with which standards the parameters should be compared. This information restates what is in section 4.0 of the document.
  - d. Section 4.4: Paragraph was restructured for the language on functional areas for clarification and added a reference to golf courses.
7. Section 5 HAP Deferral Process: Clarified that only HAP contamination can be deferred. Restructured first paragraph for clarity. In the second paragraph, added the phrase, “presence of HAP constituents” and removed “results.” A link to the deferral form was added to the third paragraph.
8. Section 6.1: Paragraph was restructured; references to golf courses were included.
9. Section 6.4: Revised language to include references to golf courses.
10. Section 8.1: Included references to Section 5 of the guidance document for HAP contaminated soil that remains on the site. Added a paragraph that references golf courses. Added a paragraph that explains when a deed notice is required.
11. Section 8.2: Revised language to include references to golf courses.
12. Section 8.3: Removed “if possible,” clarifying that contaminated soils should not be brought to clean areas of the site to be blended. revised language regarding trenching equipment.
13. Section 8.7: Changed language when HAP ground water contamination is confirmed, to now follow requirements of N.J.A.C 7:26C-7.3.
14. Appendix F: In Section 4, removed the phrase “and monitoring and maintenance” and replaced it with “and to operate the property as an active agricultural site or as an active golf course as.”
