**ROUND 2 – Technical Guidance Committees**

1. **Off-site source (investigating/documenting)**
  - Guidance will address all media and focus on approaches and information needed to adequately document off-site impact onto a site of interest.
2. **Co-Mingled Ground Water Plumes**
  - Guidance will focus on new technical approaches for ground water characterization, plume forensics and fate and transport. It will not address policy or litigation issues.
3. **Historic Pesticide Use**
  - Guidance will focus on sampling approaches and blending techniques to mitigate historic pesticide contamination. Document will not address policy issues.
4. **Capping**
  - Guidance will focus on technical considerations and options for cap selection and installation. This will also include capping recommendations in Presumptive Remedy Guidance. Document will not address policy or risk related issues.
5. **Performance monitoring of in-situ ground water remedial actions**
  - Guidance will focus on issues related to performance monitoring of in-situ GW remedial actions and identify needed components of a Permit-by-Rule application.
6. **Evaluation of contaminated ground water discharge to surface water**
  - Guidance will focus on the understanding of GW discharges to SW bodies and new advances in GW/SW investigation and sampling approaches.
