New Jersey Department of Environmental Protection Division of Watershed Management Office of Watershed Education, Estuaries & Monitoring

Cooperative Coastal Monitoring Program

Presented by: Virginia Loftin

NJ Water Monitoring Council Meeting, January 31, 2007

Cooperative Program Between:

NJ Department of Environmental Protection NJ Department of Health and Senior Services County Health Departments

> Monmouth County HD Ocean County HD Atlantic County HD Cape May County HD Middlesex County HD

Local Health Departments

Middletown HD Northeast Monmouth Regional Health Commission Long Branch HD Long Beach Township HD Atlantic City HD

Cooperative Coastal Monitoring Program

- Program began in 1974
- Program revised and State Sanitary Code adopted in 1986
- Responded to public health concerns
- Provided data required for general and site-specific water quality analyses

Activities include:

- Weekly monitoring of bathing beaches for enterococcus bacteria
- Aerial surveillance of coast
- Regular inspections at coastal sewage treatment plants
- Public notification of beach conditions

Complimentary Programs:

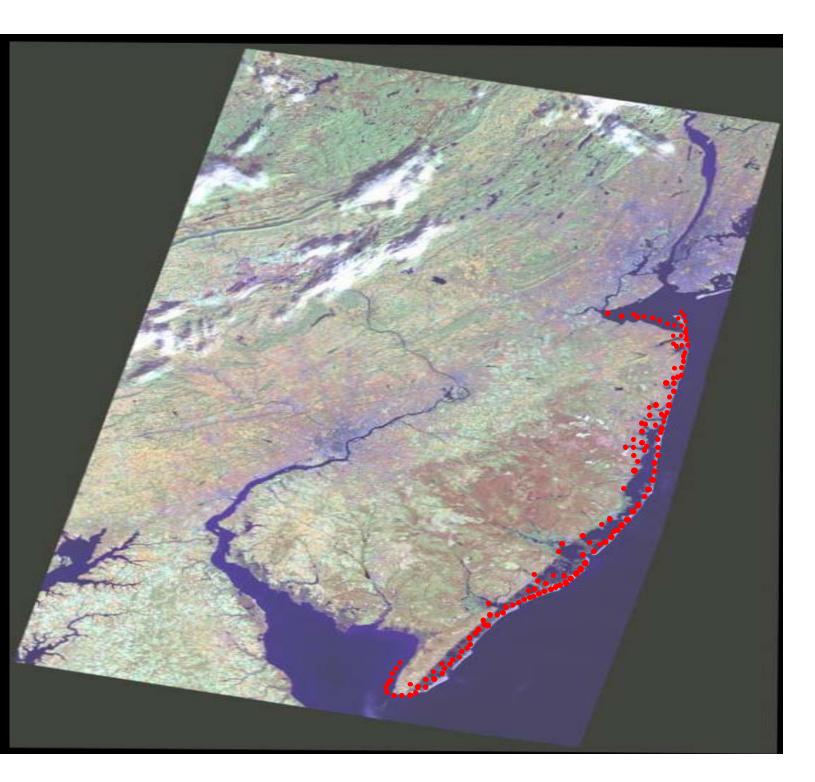

Clean Shores Program, Adopt A Beach Program

186 Ocean stations

Most ocean monitoring stations are associated with potential pollution sources

139 Bay Stations

All bay beaches are monitored

• County and local health departments collect and analyze approximately 5700 water quality samples each summer season

 Beach closings are mandatory for sewage overflows and other pollution events with potential to affect public health

• Monitoring conducted after all pollution events

Current testing method:

EPA Method 1600: Enterococci in water by membrane filtration – results in 24 hours

Future methods?

- qPCR quantitative polymerase chain reaction results in 2 hours
- Predictive modeling

EPA Beaches Environmental Assessment and Coastal Health (BEACH) Act based on New Jersey's Cooperative Coastal Monitoring Program

Provides grant \$ for monitoring water quality and public notification of beach conditions

October 10, 2000

Monitoring begins in mid-May and runs through early September. Samples are collected weekly on Mondays.

Standard is 104 enterococci bacteria per 100 mL of sample

Sources of bacteria include:

Stormwater outfalls on beach

Stream discharge to ocean

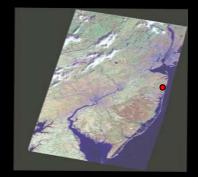

Coastal Lake Discharges

Deal Lake, Loch Arbour

Sylvan Lake, Avon

Monmouth County Health Department Rain Provisional Policy (2002)

Wreck Pond, Spring Lake

...and unusual events

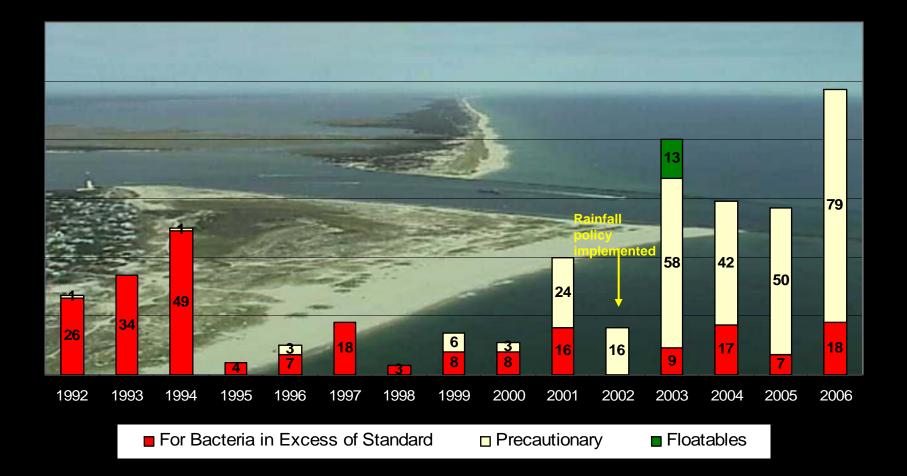

Coastal Sewage Treatment Plant Inspections

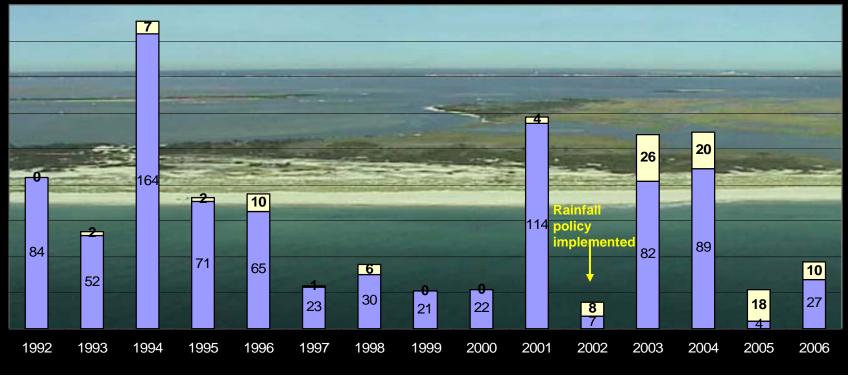

DEP inspects 17 coastal STPs and monitors discharges to coastal waters

Ocean Beach Closings 1992 - 2006

Bay Beach Closings

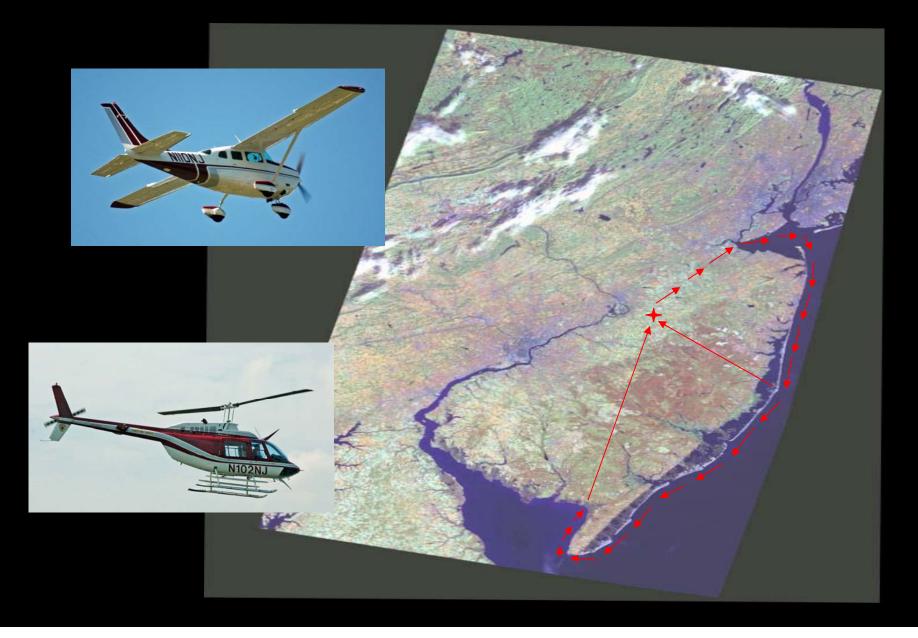

1992 - 2006

☐ for bacteria in excess of standard

precautionary

Aerial Surveillance

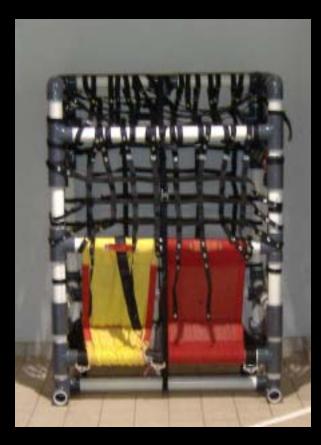

DEP Flight Crew

EPA Water Ditching and Survival Training

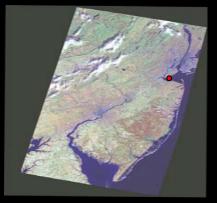

What we're looking for...

Middlesex County Utilities Authority

Raritan Bay outfall ~95-150 mgd

What we usually see...

Web-Based Reporting

Introduced in Summer 2004 Completely paperless system – PDAs distributed to all county field samplers

Field data is downloaded at lab at time of sample drop-off

Web-Based Reporting

NJ Beach Monitoring Solution Laboratory Reports

	Default Entry			6/11/2004	11:00
Save	Location (Station#)	Date Sampled		Date Analyzed	Time Analyzed
	Gary Lake Street Beach (LakeStr2)	6/9/2004 E coli :	Results	6/11/2004 Comments	11:00
V	Gary Lake Street Beach (LakeStr2)	6/10/2004 E coli :	Results	6/11/2004 Comments - Select -	11:00
	Gary Marquette Park Beach (Marquet1)	6/9/2004	Results	6/11/2004 Comments	11:00

- Lab managers enter sample results directly on to web page
- System recommends action for agency officials (e.g. closures)
- Posting determinations are immediately available on NJDEP and Earth 911 websites
- Citizens, lifeguards, media, resorts, other stakeholders receive immediate email alerts of closures/advisories via "opt-in"
- Results are immediately available for EPA BEACH Data Flow.

1-877-WARN DEP

CCMP staff on call 24/7 from early May through late September for all pollution events and reports in tidal waters

DEP staff respond to pollution reports

Clean Shores

Project was initiated in 1989 in response to medical waste and garbage related beach closings in 87-88

Cooperative effort between:

NJDEP Department of Corrections Local Governments

Sources of Floatable Debris

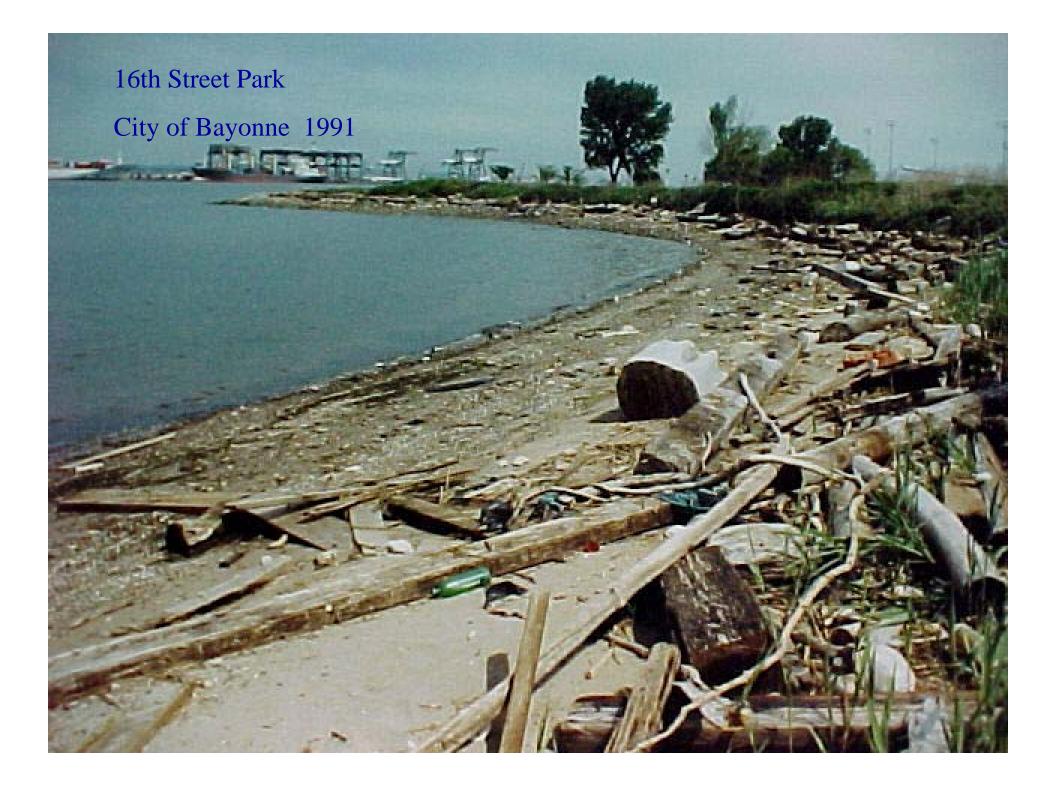

City of Elizabeth

Before

After

From 1989 to 2006: Over 115 million pounds of floatables removed. 1900 miles of shoreline cleaned and re-cleaned.

Equivalent to:

The area of a football field (including end zones) 6 stories high

The ocean shoreline of NJ 15 times over

Disposal

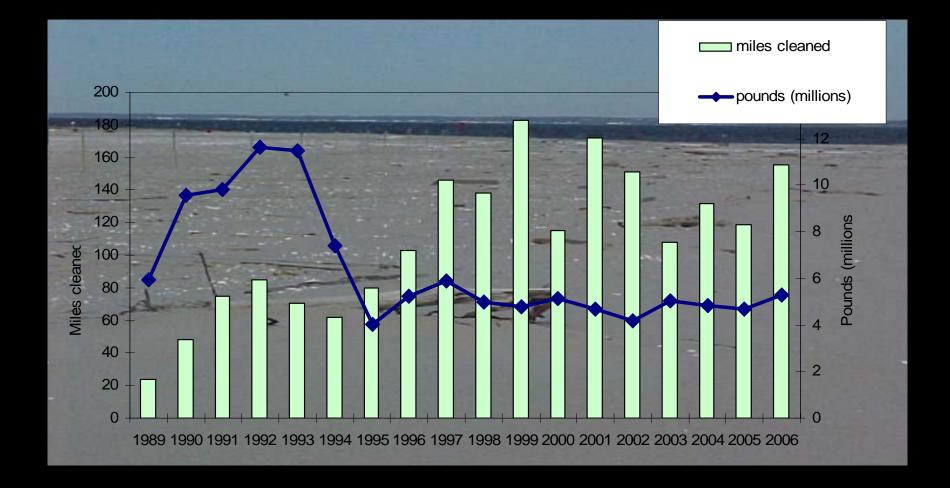

Tree parts and beverage containers are recycled.

Lumber and garbage is landfilled.

Miles and pounds 1989 to 2006

US Army Corp of Engineers

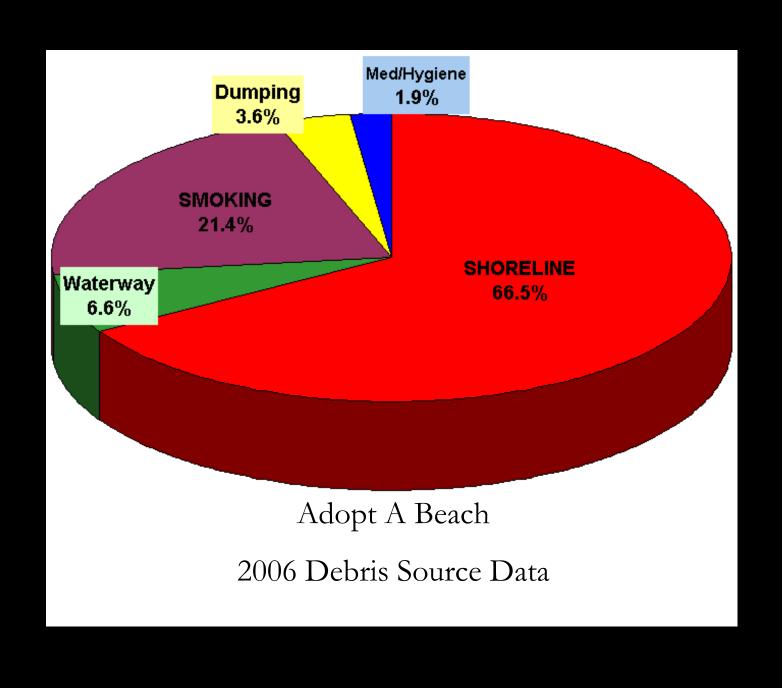

Adopt A Beach

2 beach cleanups each year~ 1000 volunteers/cleanup

Funding Sources

Up to \$200K from the sale of the Shore Protection License Plate

~ 280K each year from annual EPA BEACH grants – 90% is passed through to counties

GOAL

Cooperative Coastal Monitoring

Clean Shores

and

Adopt A Beach:

Clean and healthy beaches!
