- - - Model Prediction (second to surface)  
• Data

**Figure 3.3-17 (2)**  
 Observed and Predicted Daily Average Chloride Concentration  
 at USGS Station USGS CHESTER (RM 83)

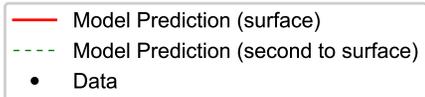

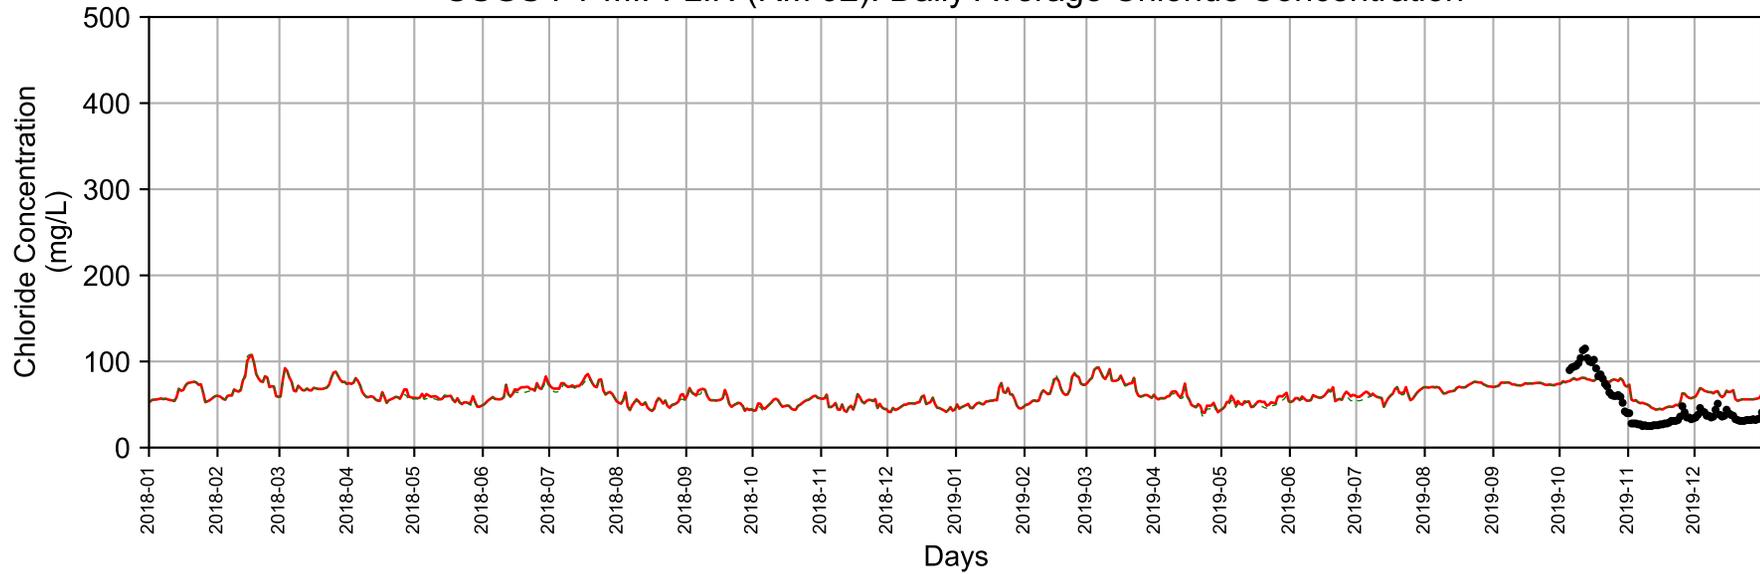

Notes: Chloride concentration were derived from specific conductance.  
 Station ID: USGS01477050, USGS CHESTER (RM 83)

Run ID: EFDC\_HYDRO\_G72\_2020-05-16, GVC, KC =12, Grid 7.2 CTE3=12. Set ocean surface salinity B.C. based on Lewes data.

Hydrograph of USGS 01463500 Delaware River at Trenton NJ

USGS FT MIFFLIN (RM 92): Daily Average Chloride Concentration

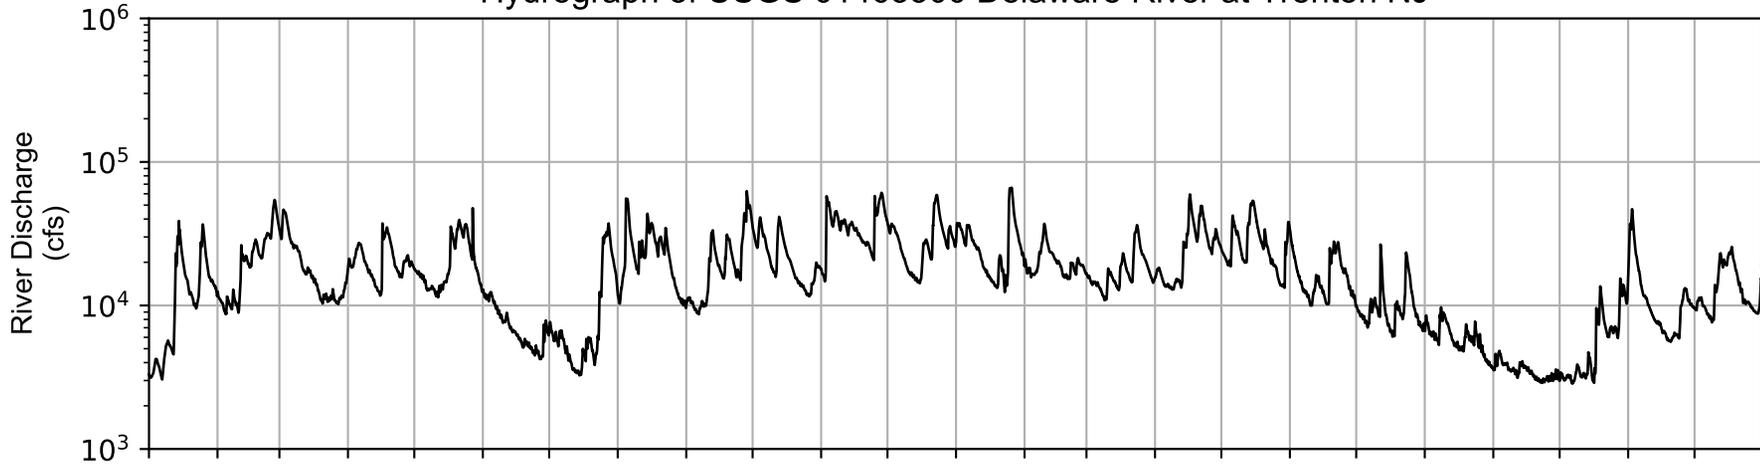

**Figure 3.3-17 (3)**  
Observed and Predicted Daily Average Chloride Concentration at USGS Station USGS FT MIFFLIN (RM 92)

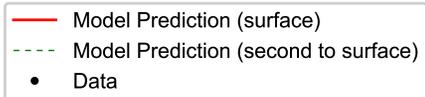

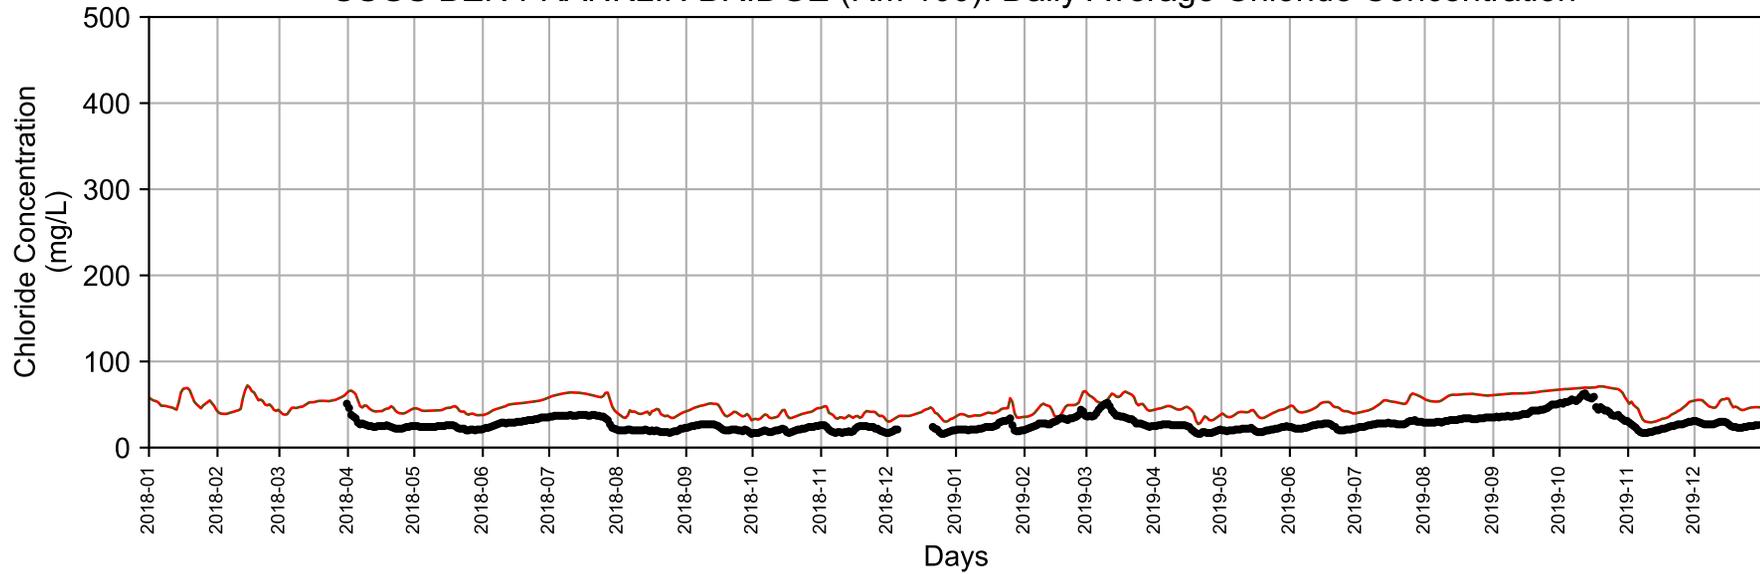

Notes: Chloride concentration were derived from specific conductance. Station ID: USGS01474703, USGS FT MIFFLIN (RM 92)

Run ID: EFDC\_HYDRO\_G72\_2020-05-16, GVC, KC =12, Grid 7.2 CTE3=12. Set ocean surface salinity B.C. based on Lewes data.

Hydrograph of USGS 01463500 Delaware River at Trenton NJ

USGS BEN FRANKLIN BRIDGE (RM 100): Daily Average Chloride Concentration

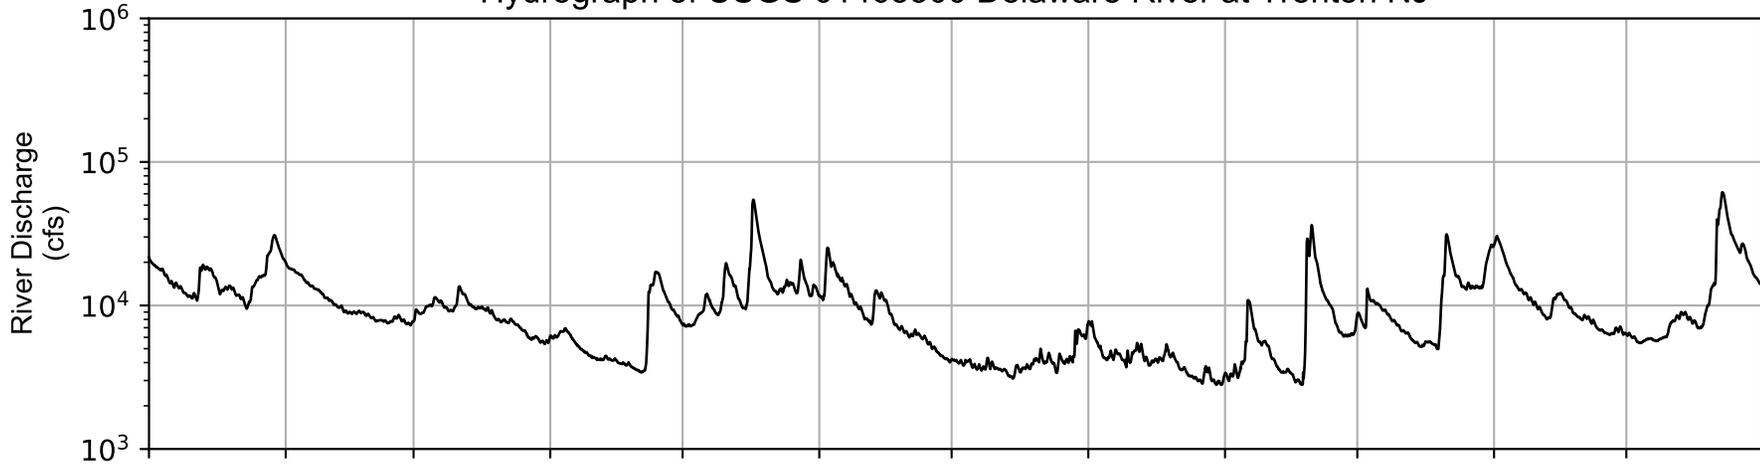

**Figure 3.3-17 (4)**  
 Observed and Predicted Daily Average Chloride Concentration  
 at USGS Station USGS BEN FRANKLIN BRIDGE (RM 100)

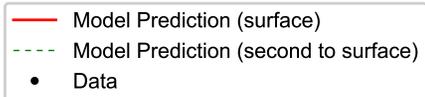

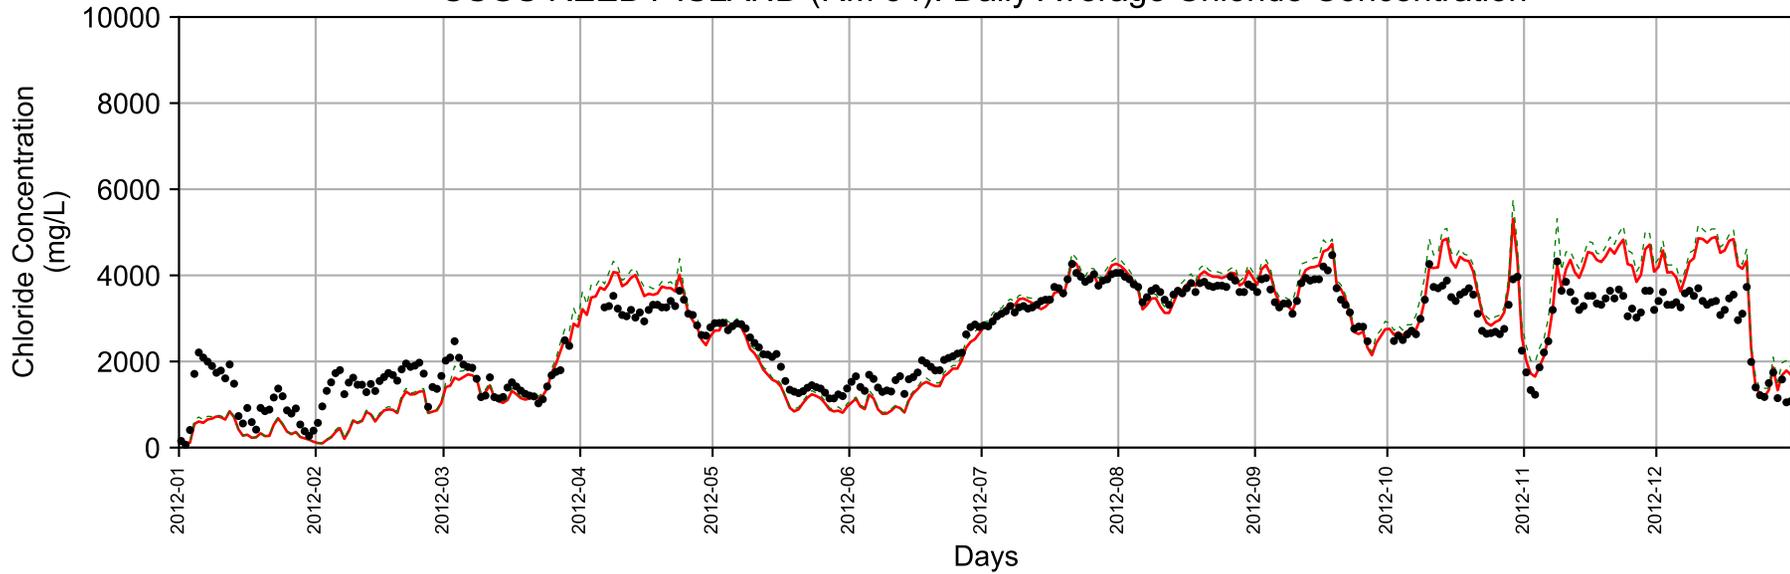

Notes: Chloride concentration were derived from specific conductance.  
 Station ID: USGS01467200, USGS BEN FRANKLIN BRIDGE (RM 100)

Run ID: EFDC\_HYDRO\_G72\_2020-05-16, GVC, KC =12, Grid 7.2 CTE3=12. Set ocean surface salinity B.C. based on Lewes data.

### Hydrograph of USGS 01463500 Delaware River at Trenton NJ

### USGS REEDY ISLAND (RM 54): Daily Average Chloride Concentration

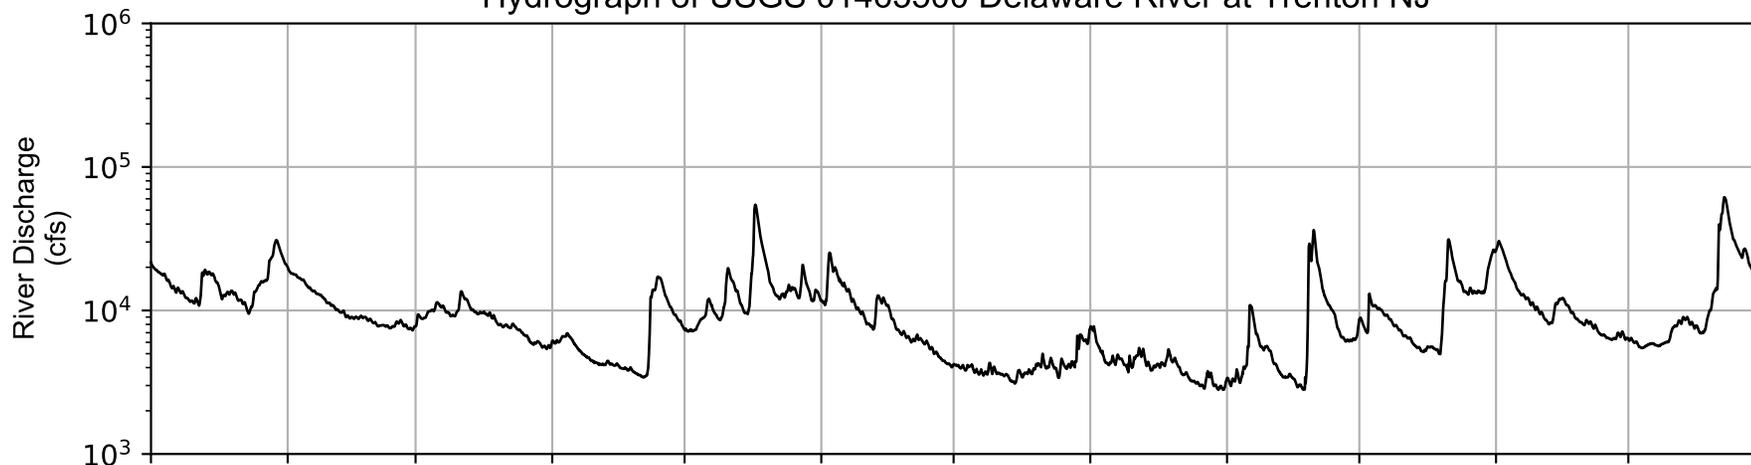

**Figure 3.3-18 (1)**  
 Observed and Predicted Daily Average Chloride Concentration  
 at USGS Station USGS REEDY ISLAND (RM 54)

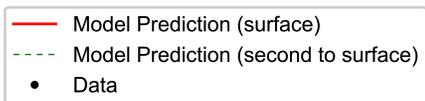

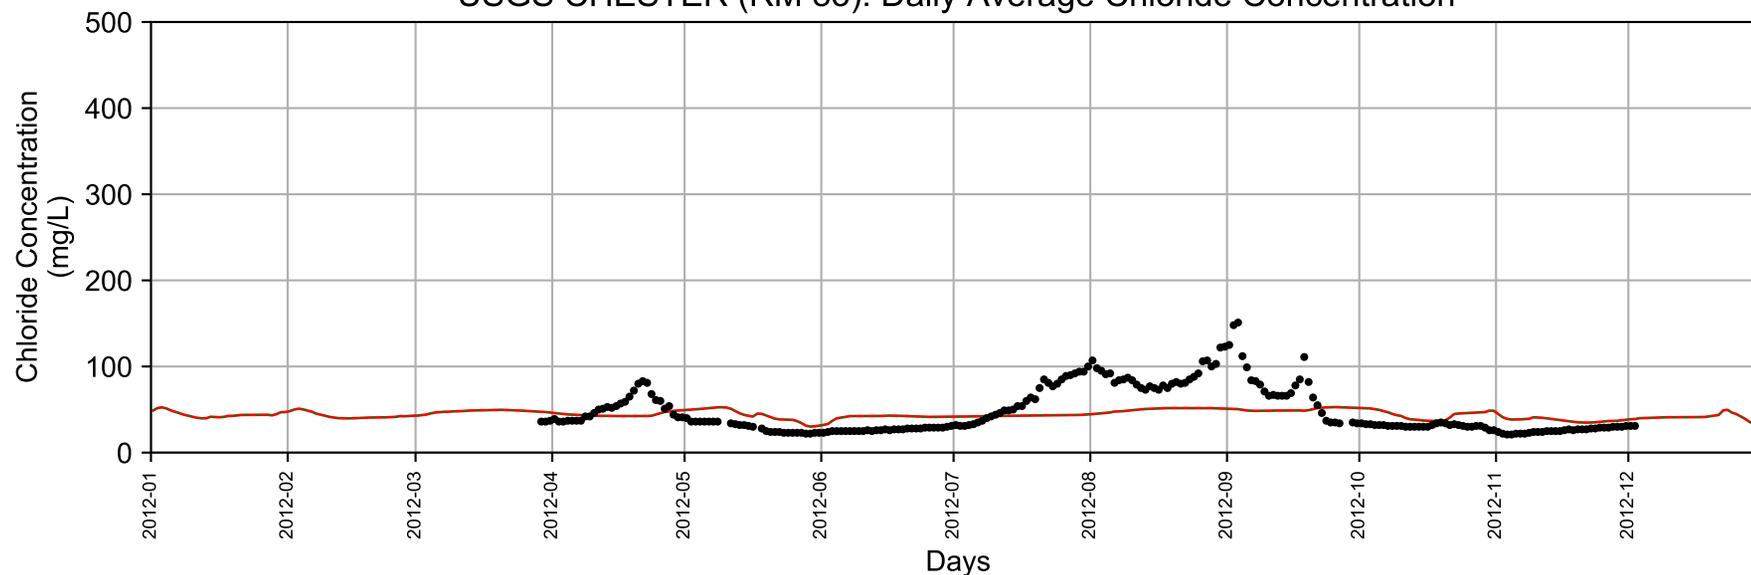

Notes: Chloride concentration were derived from specific conductance.  
 Station ID: USGS01482800, USGS REEDY ISLAND (RM 54)

Run ID: EFDC\_HYDRO\_G72\_2020-07-04, GVC, KC =12, Grid 7.2 CTE3=12. Set ocean salinity B.C. 3 ppt higher than observed salinity at Brandywine.

Hydrograph of USGS 01463500 Delaware River at Trenton NJ

USGS CHESTER (RM 83): Daily Average Chloride Concentration

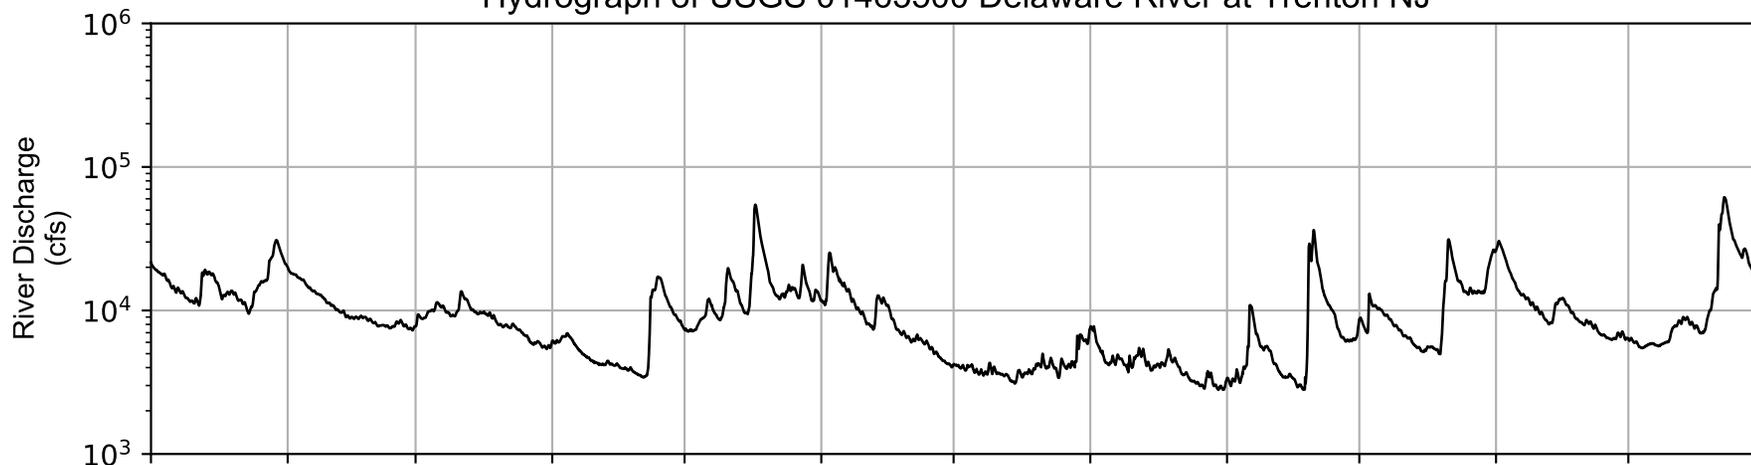

**Figure 3.3-18 (2)**  
Observed and Predicted Daily Average Chloride Concentration  
at USGS Station USGS CHESTER (RM 83)

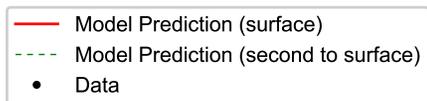

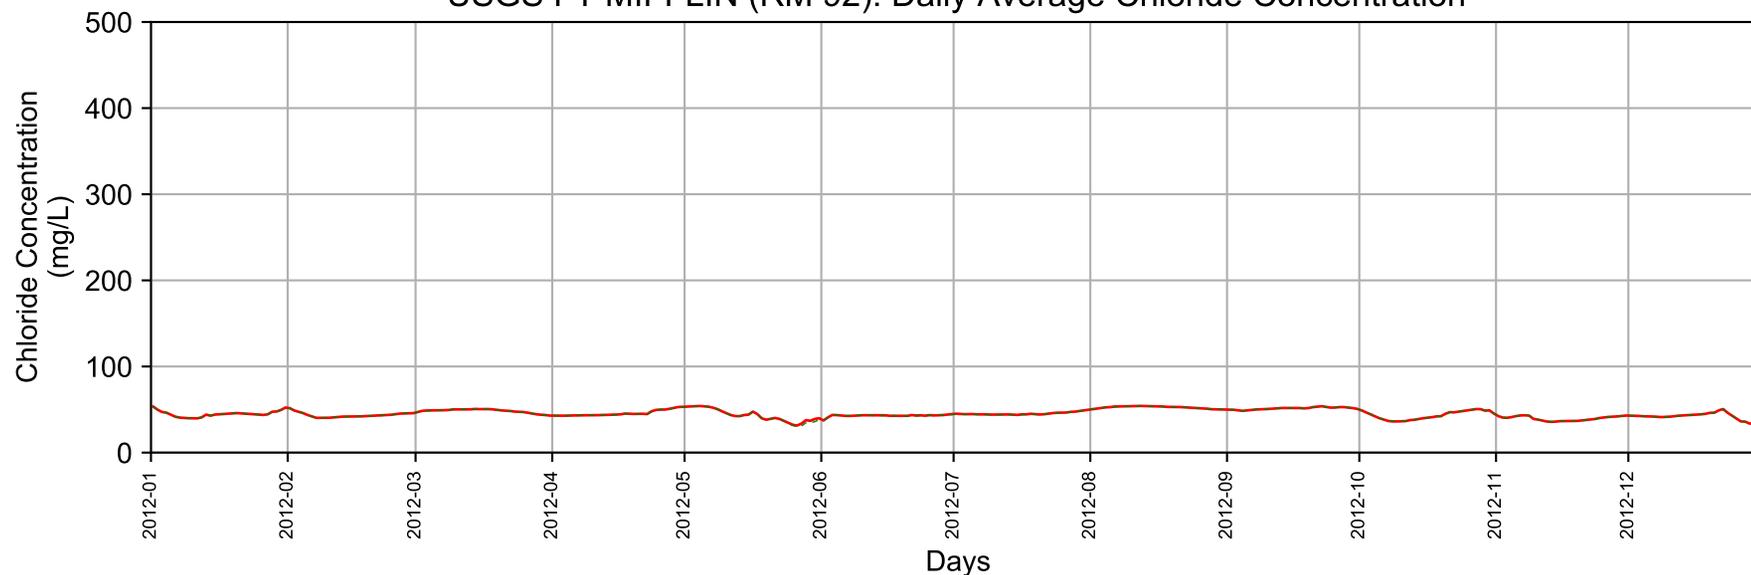

Notes: Chloride concentration were derived from specific conductance.  
Station ID: USGS01477050, USGS CHESTER (RM 83)

Run ID: EFDC\_HYDRO\_G72\_2020-07-04, GVC, KC =12, Grid 7.2 CTE3=12. Set ocean salinity B.C. 3 ppt higher than observed salinity at Brandywine.

Hydrograph of USGS 01463500 Delaware River at Trenton NJ

USGS FT MIFFLIN (RM 92): Daily Average Chloride Concentration

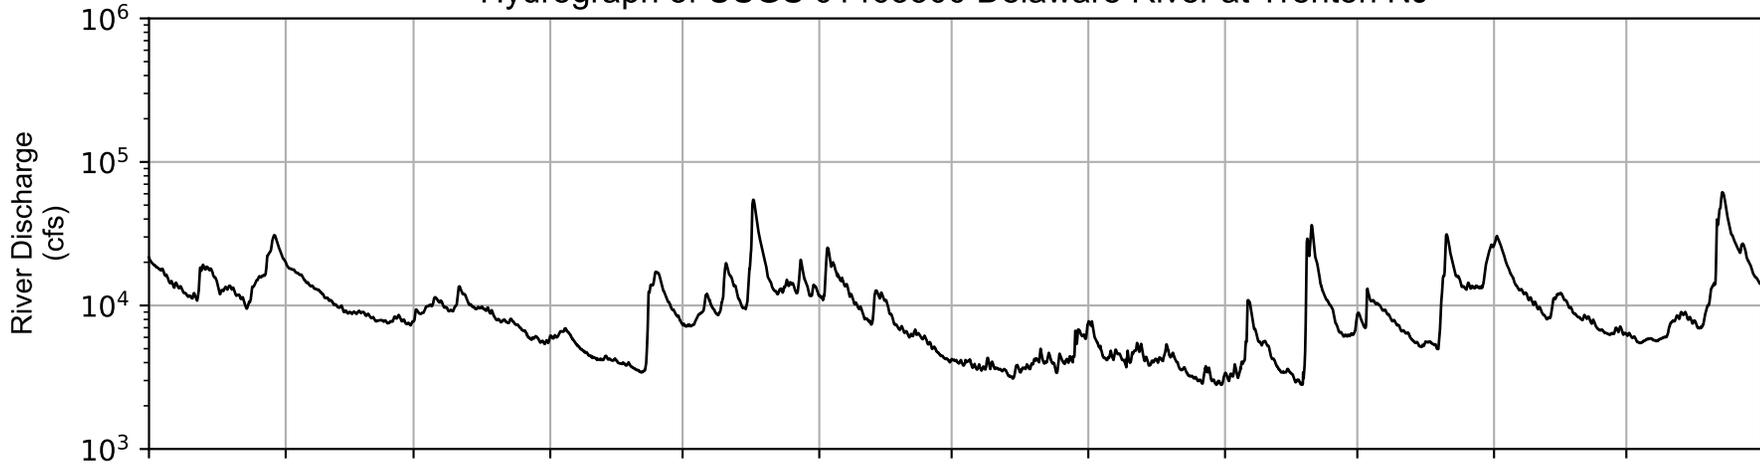

**Figure 3.3-18 (3)**  
Observed and Predicted Daily Average Chloride Concentration  
at USGS Station USGS FT MIFFLIN (RM 92)

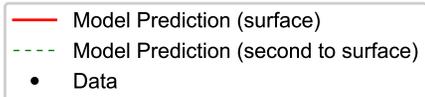

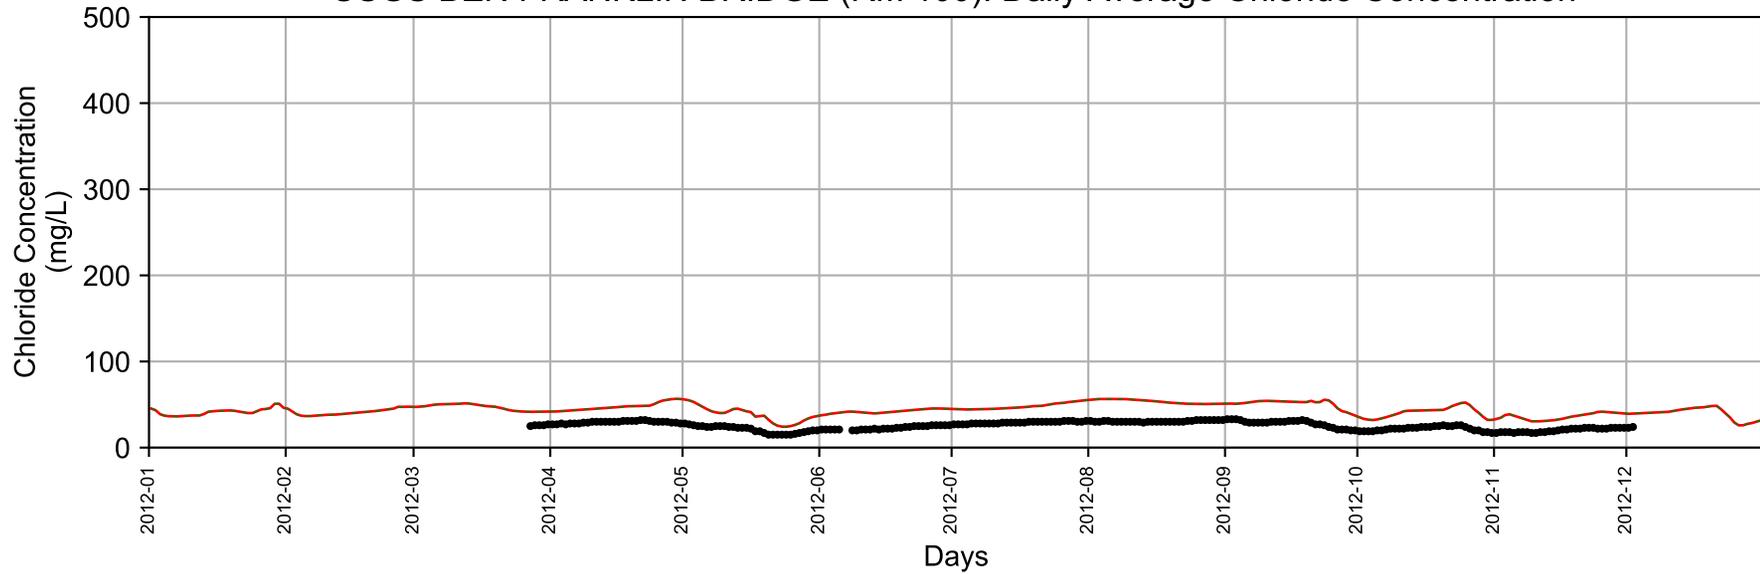

Notes: Chloride concentration were derived from specific conductance.  
Station ID: USGS01474703, USGS FT MIFFLIN (RM 92)

Run ID: EFDC\_HYDRO\_G72\_2020-07-04, GVC, KC =12, Grid 7.2 CTE3=12. Set ocean salinity B.C. 3 ppt higher than observed salinity at Brandywine.

Hydrograph of USGS 01463500 Delaware River at Trenton NJ

USGS BEN FRANKLIN BRIDGE (RM 100): Daily Average Chloride Concentration

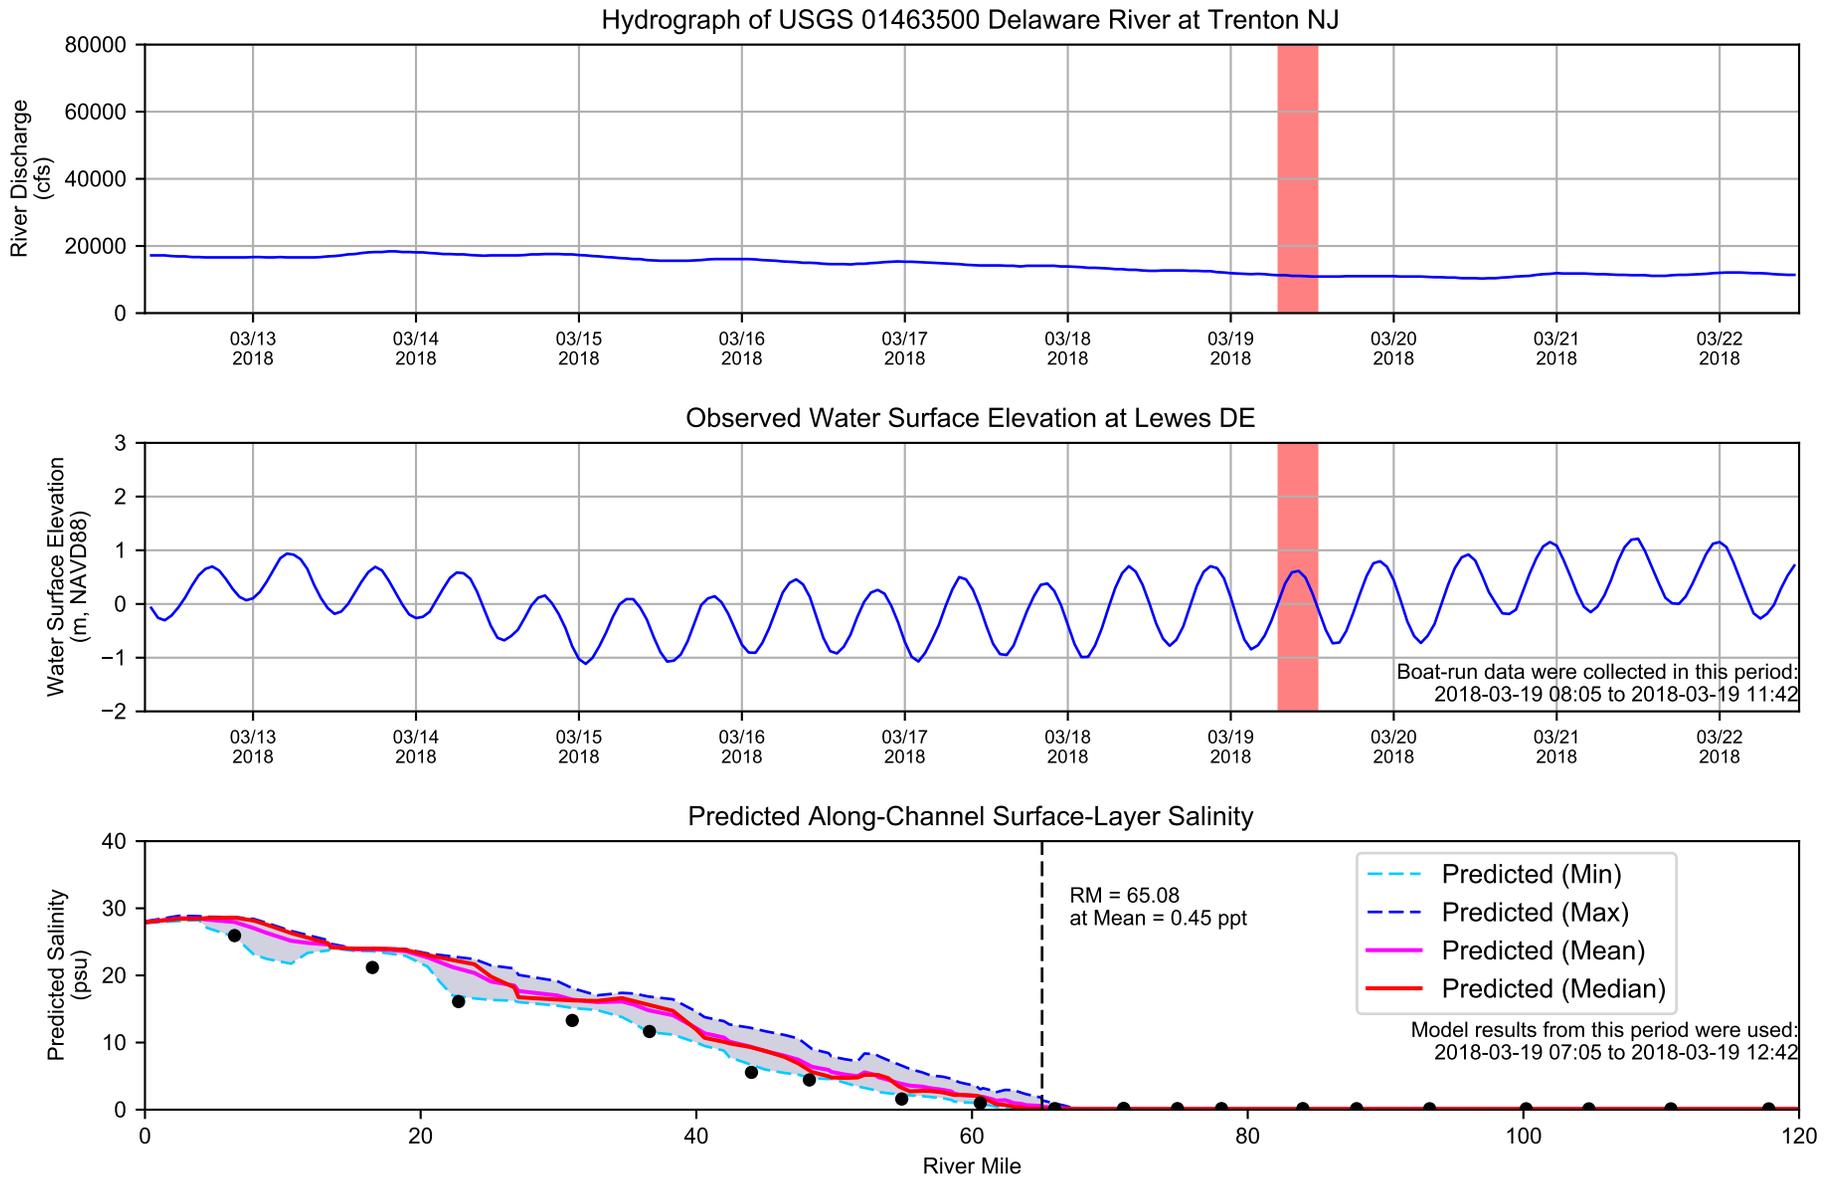

**Figure 3.3-18 (4)**  
 Observed and Predicted Daily Average Chloride Concentration  
 at USGS Station USGS BEN FRANKLIN BRIDGE (RM 100)

Notes: Chloride concentration were derived from specific conductance.  
 Station ID: USGS01467200, USGS BEN FRANKLIN BRIDGE (RM 100)

Run ID: EFDC\_HYDRO\_G72\_2020-07-04, GVC, KC =12, Grid 7.2 CTE3=12. Set ocean salinity B.C. 3 ppt higher than observed salinity at Brandywine.

## Appendix M: Longitudinal profile of salinity in Delaware River and Bay

- Boat-run Data (Salinity, Estimated)
- Boat-run Data (Salinity, Not Detected)

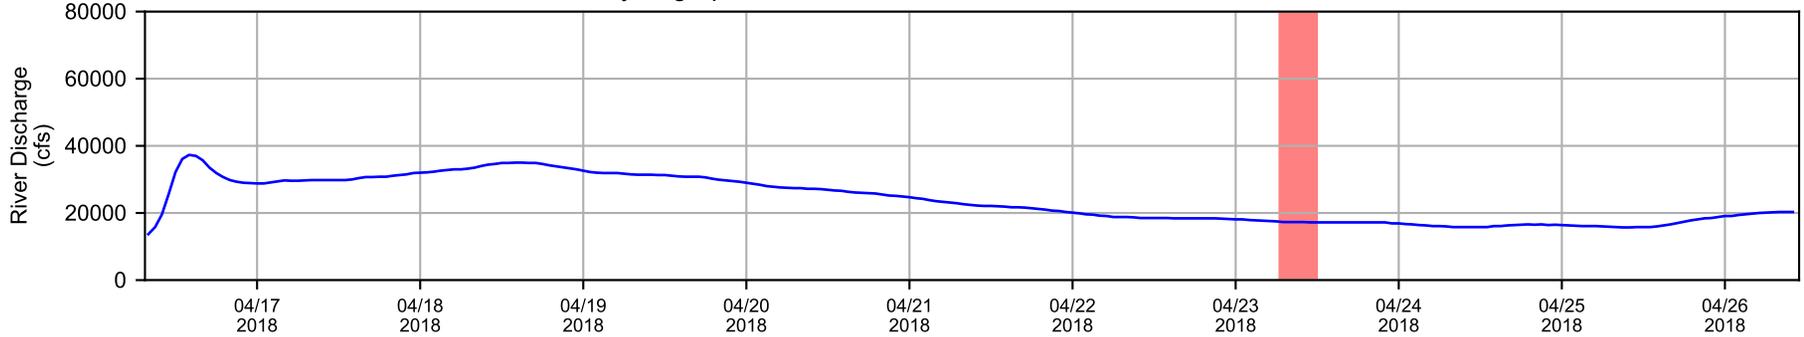

**Figure 3.3-19 (1)**

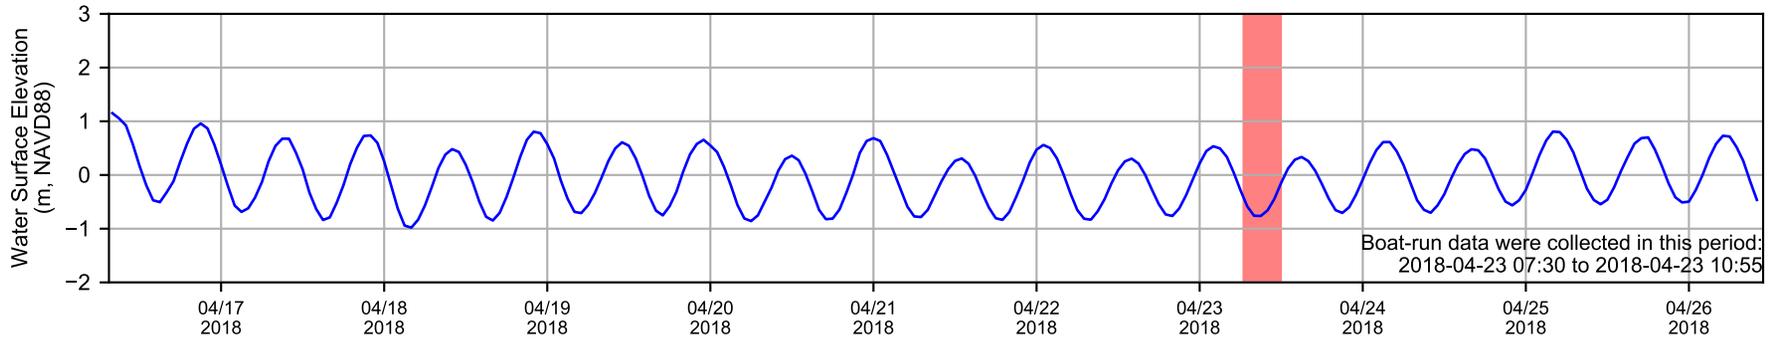

**Longitudinal Profile of Salinity in Delaware River and Bay**

Notes: Salinity and Chloride data collected by boat-run survey were used. Date that under detention limit were set to half of the detection limit. Red shaded area indicates the boat run survey time period: 2018-03-19 08:05 to 2018-03-19 11:42. Model results along the navigation channel during period of 2018-03-19 07:05 to 2018-03-19 12:42 were used in this analysis. Run ID: EFDC\_HYDRO\_G72\_2020-05-16

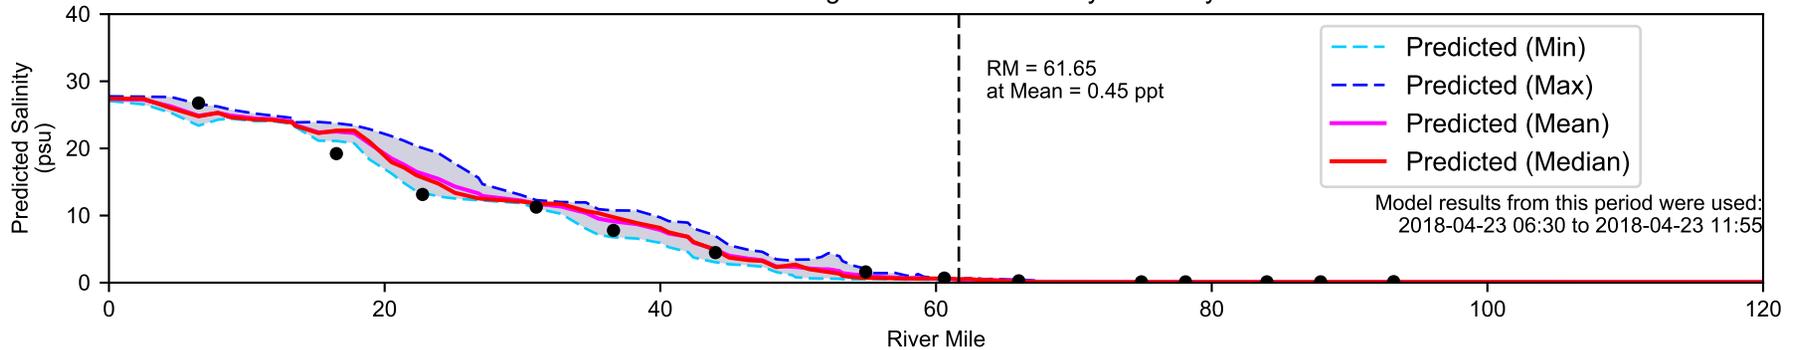

Hydrograph of USGS 01463500 Delaware River at Trenton NJ

Observed Water Surface Elevation at Lewes DE

Predicted Along-Channel Surface-Layer Salinity

- Boat-run Data (Salinity, Estimated)
- Boat-run Data (Salinity, Not Detected)

Figure 3.3-19 (2)

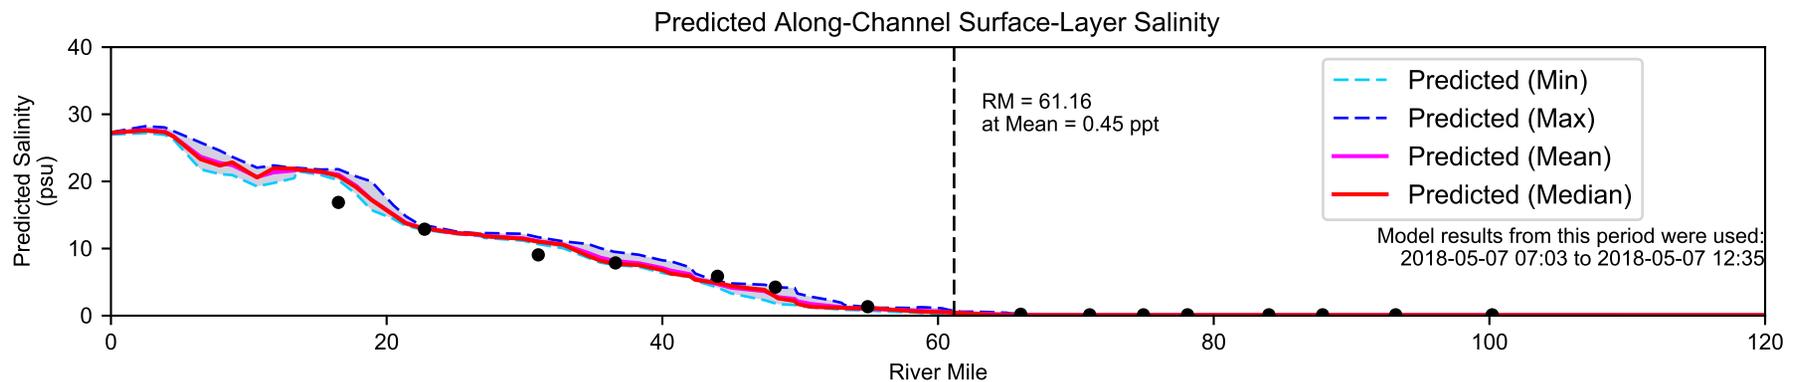

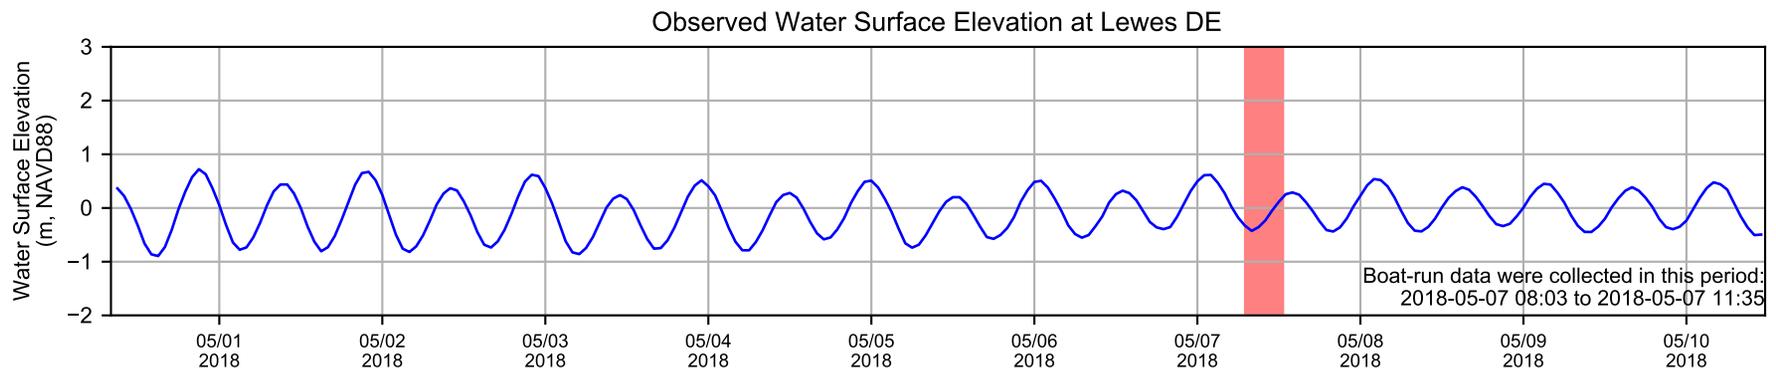

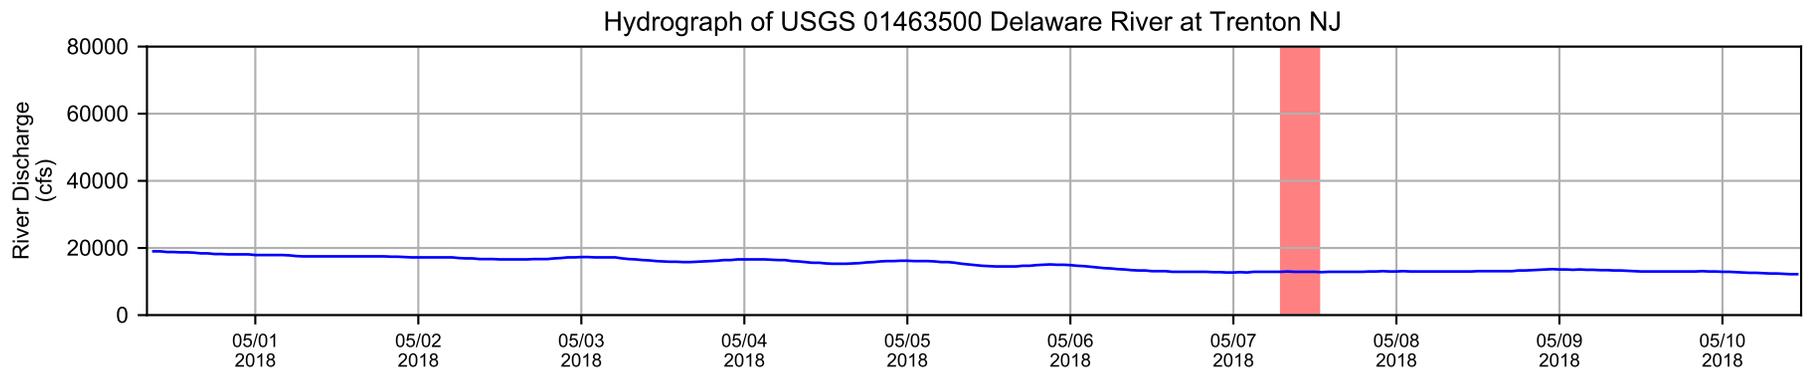

Longitudinal Profile of Salinity in Delaware River and Bay

Notes: Salinity and Chloride data collected by boat-run survey were used. Date that under detention limit were set to half of the detection limit.

Red shaded area indicates the boat run survey time period: 2018-04-23 07:30 to 2018-04-23 10:55

Model results along the navigation channel during period of 2018-04-23 06:30 to 2018-04-23 11:55 were used in this analysis.

Run ID: EFDC\_HYDRO\_G72\_2020-05-16

- Boat-run Data (Salinity, Estimated)
- Boat-run Data (Salinity, Not Detected)

**Figure 3.3-19 (3)**

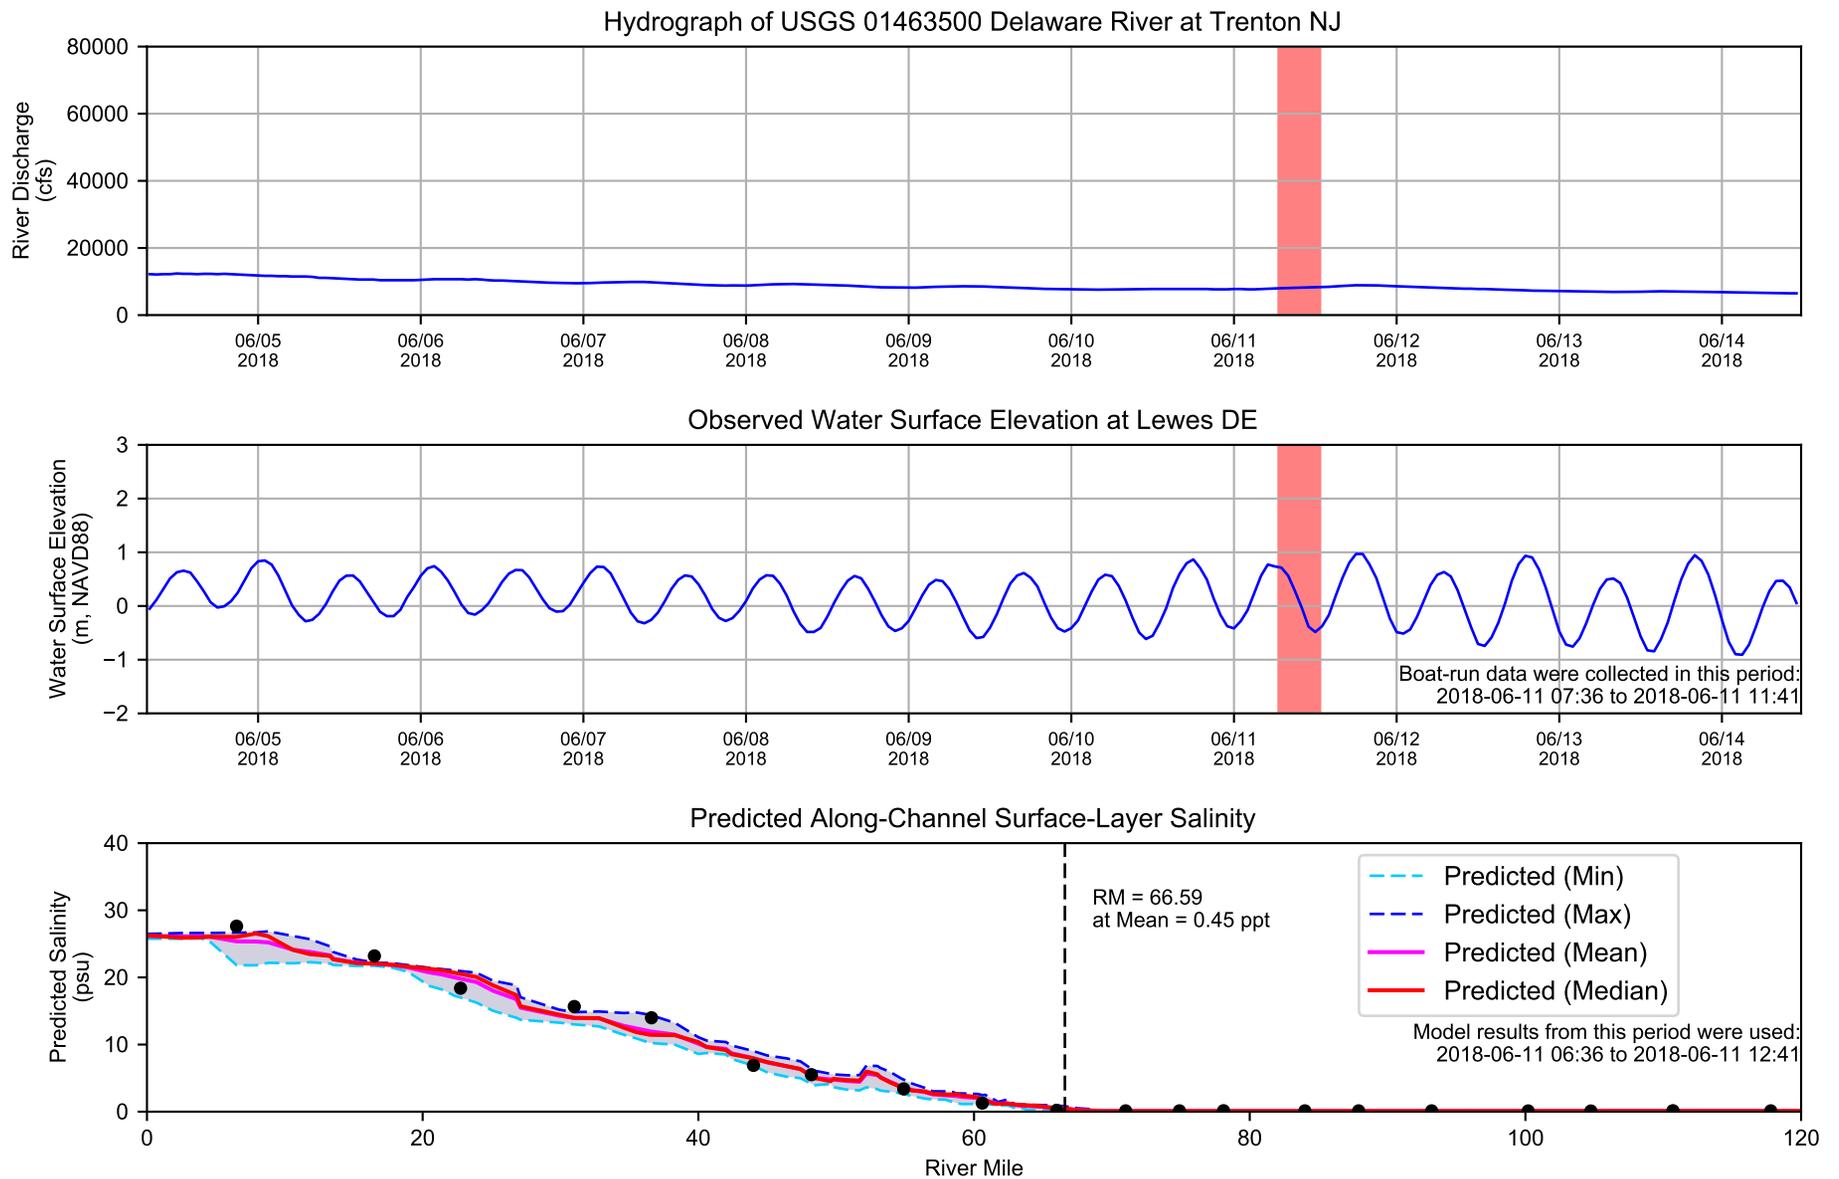

### Longitudinal Profile of Salinity in Delaware River and Bay

Notes: Salinity and Chloride data collected by boat-run survey were used. Date that under detention limit were set to half of the detection limit.

Red shaded area indicates the boat run survey time period: 2018-05-07 08:03 to 2018-05-07 11:35

Model results along the navigation channel during period of 2018-05-07 07:03 to 2018-05-07 12:35 were used in this analysis.

Run ID: EFDC\_HYDRO\_G72\_2020-05-16

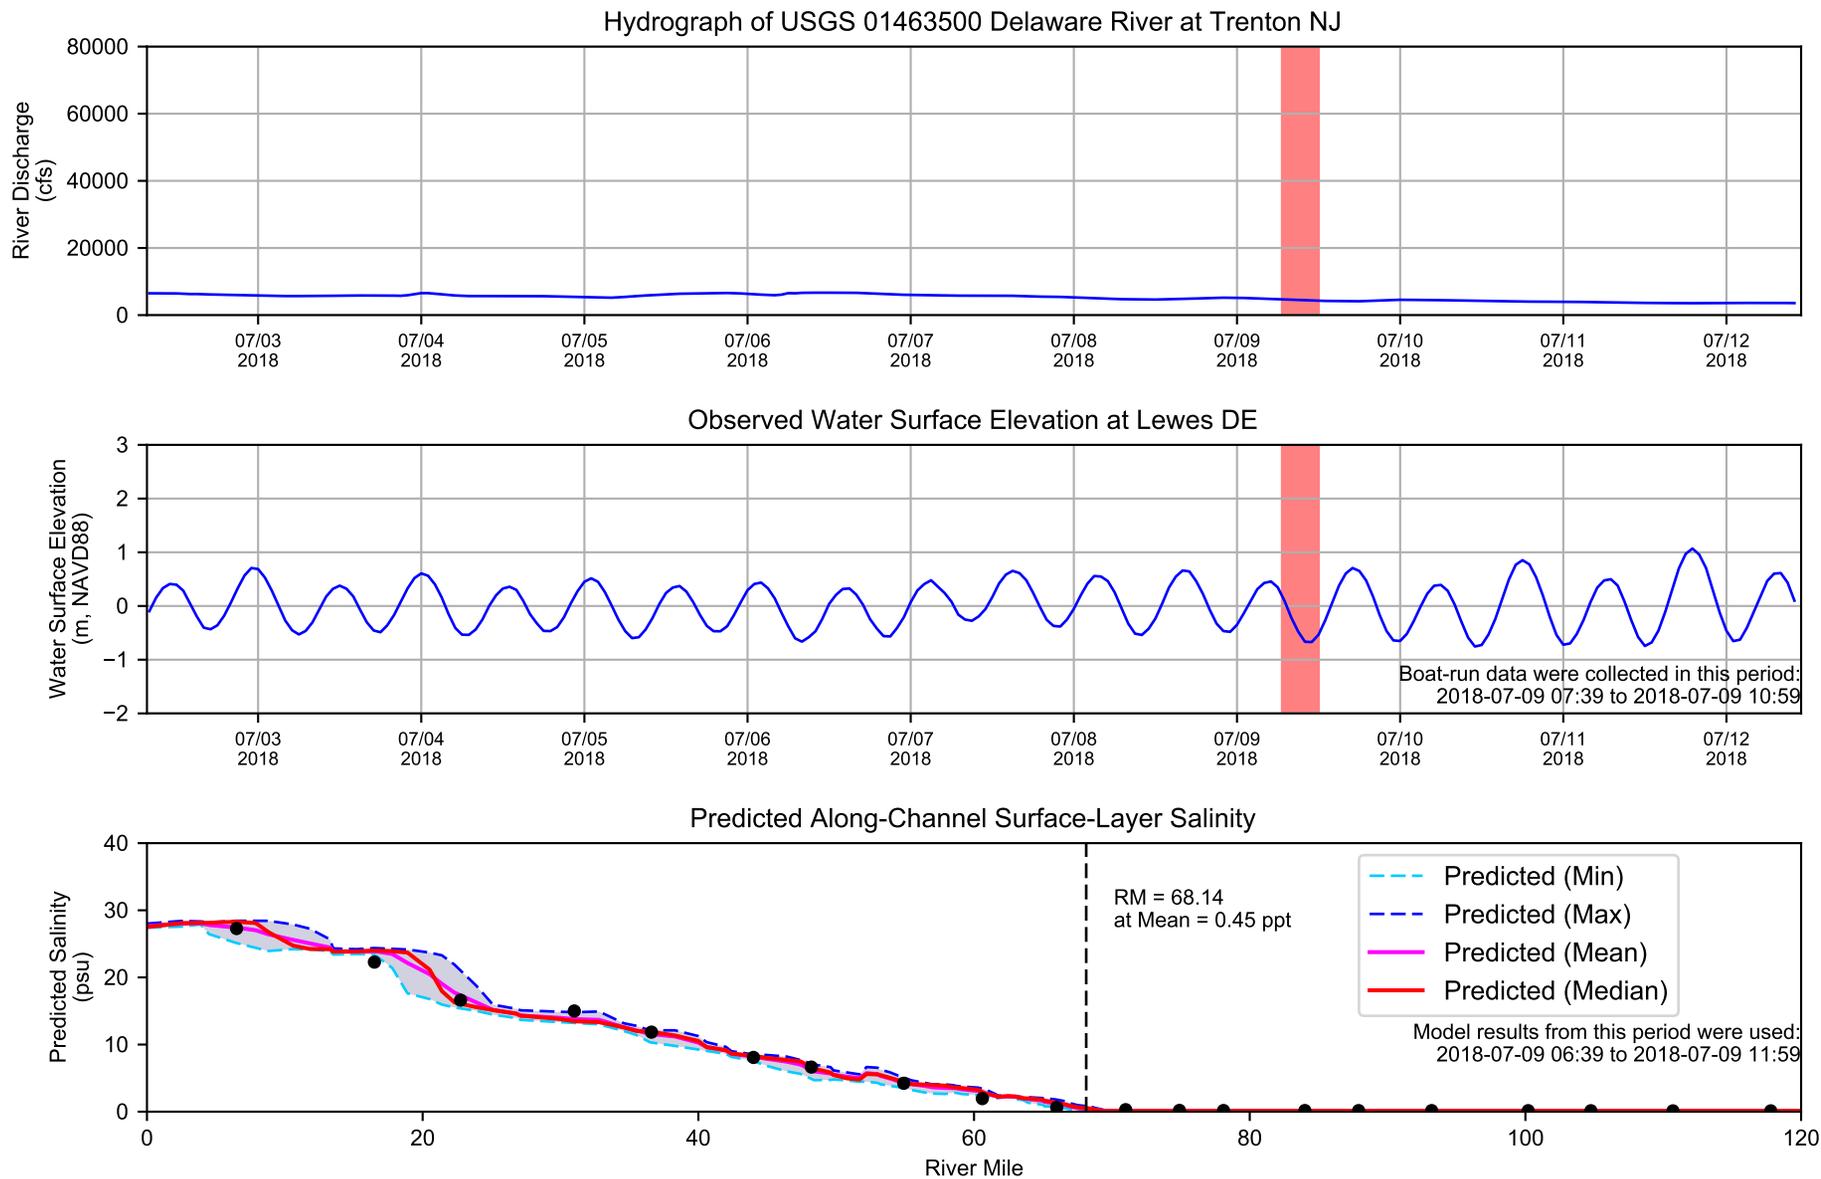

- Boat-run Data (Salinity, Estimated)
- Boat-run Data (Salinity, Not Detected)

**Figure 3.3-19 (4)**

**Longitudinal Profile of Salinity in Delaware River and Bay**

*Notes: Salinity and Chloride data collected by boat-run survey were used. Date that under detention limit were set to half of the detection limit. Red shaded area indicates the boat run survey time period: 2018-06-11 07:36 to 2018-06-11 11:41. Model results along the navigation channel during period of 2018-06-11 06:36 to 2018-06-11 12:41 were used in this analysis. Run ID: EFDC\_HYDRO\_G72\_2020-05-16*

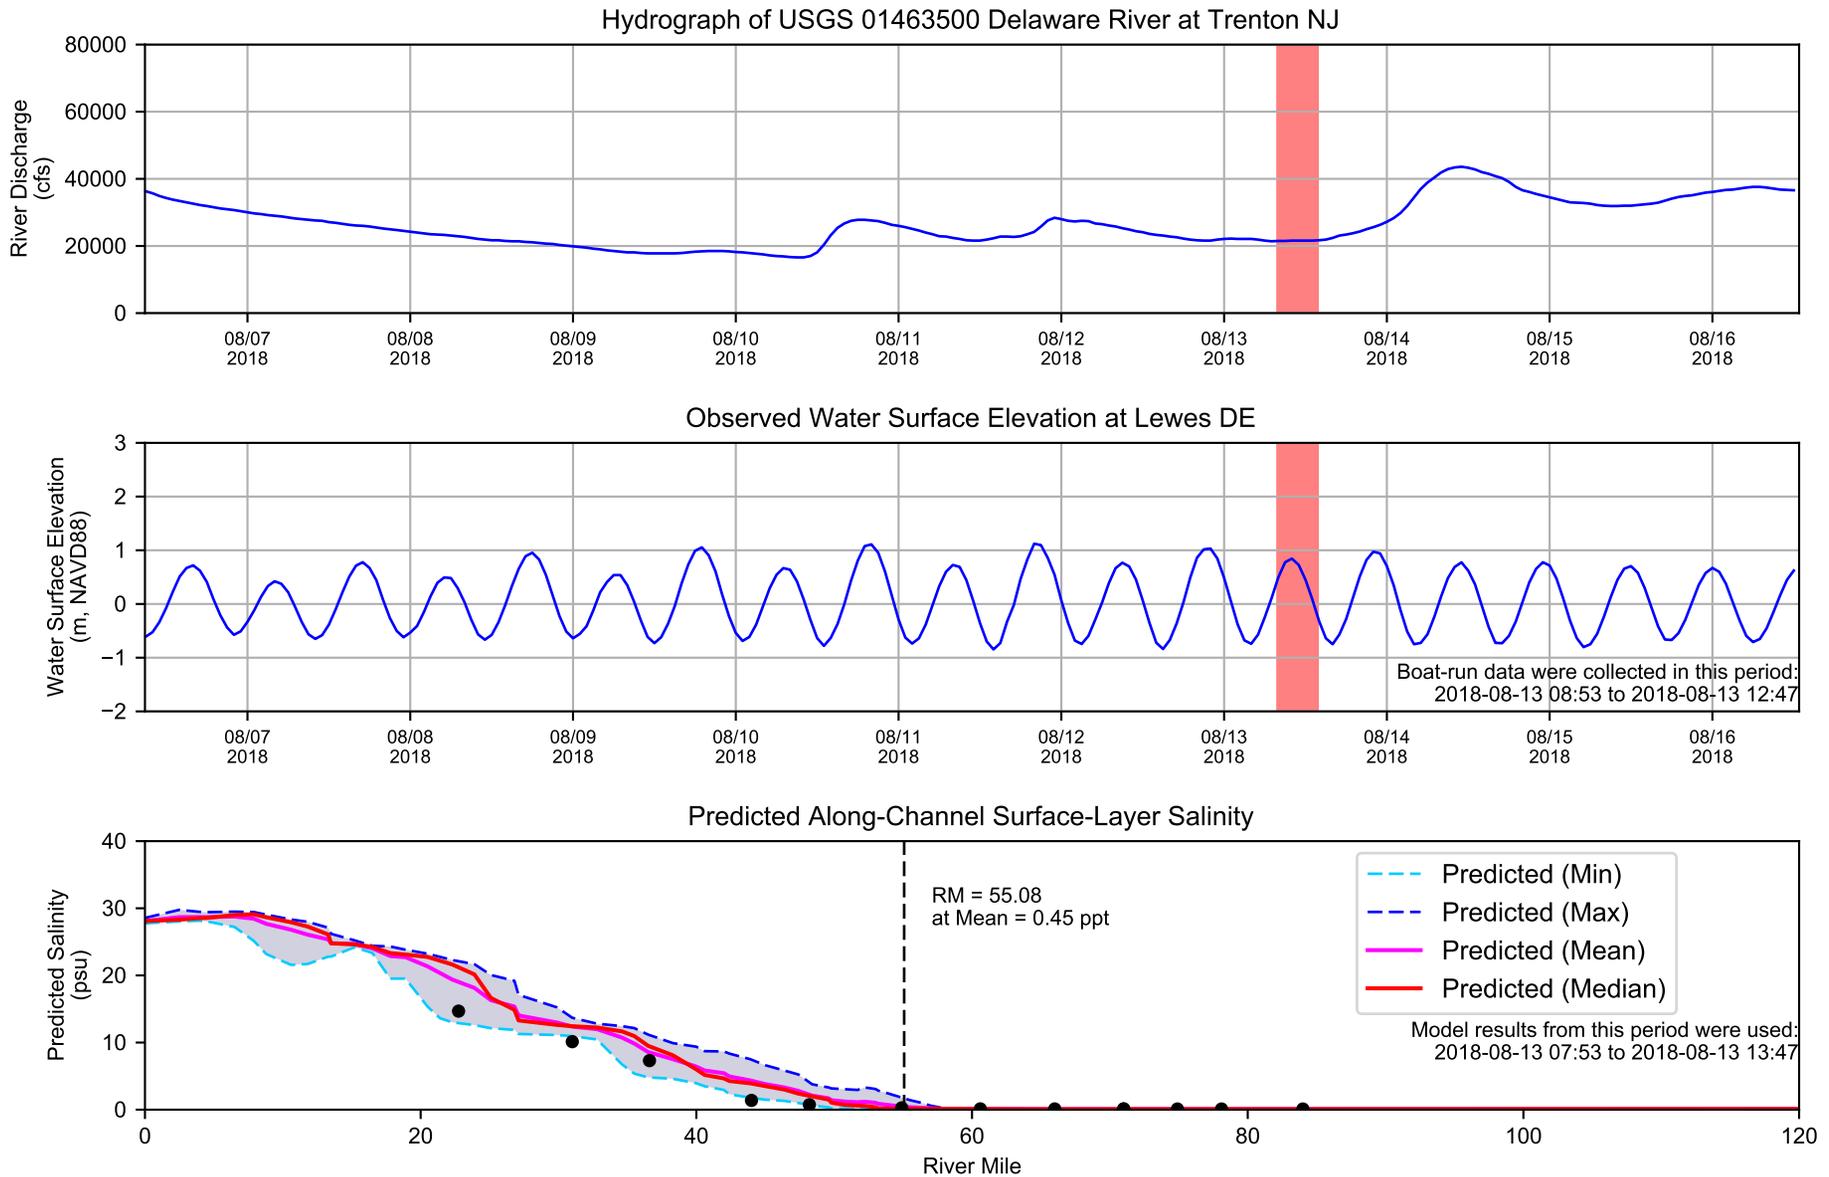

- Boat-run Data (Salinity, Estimated)
- Boat-run Data (Salinity, Not Detected)

**Figure 3.3-19 (5)**

**Longitudinal Profile of Salinity in Delaware River and Bay**

*Notes: Salinity and Chloride data collected by boat-run survey were used. Date that under detention limit were set to half of the detection limit. Red shaded area indicates the boat run survey time period: 2018-07-09 07:39 to 2018-07-09 10:59. Model results along the navigation channel during period of 2018-07-09 06:39 to 2018-07-09 11:59 were used in this analysis. Run ID: EFDC\_HYDRO\_G72\_2020-05-16*

**Figure 3.3-19 (6)**

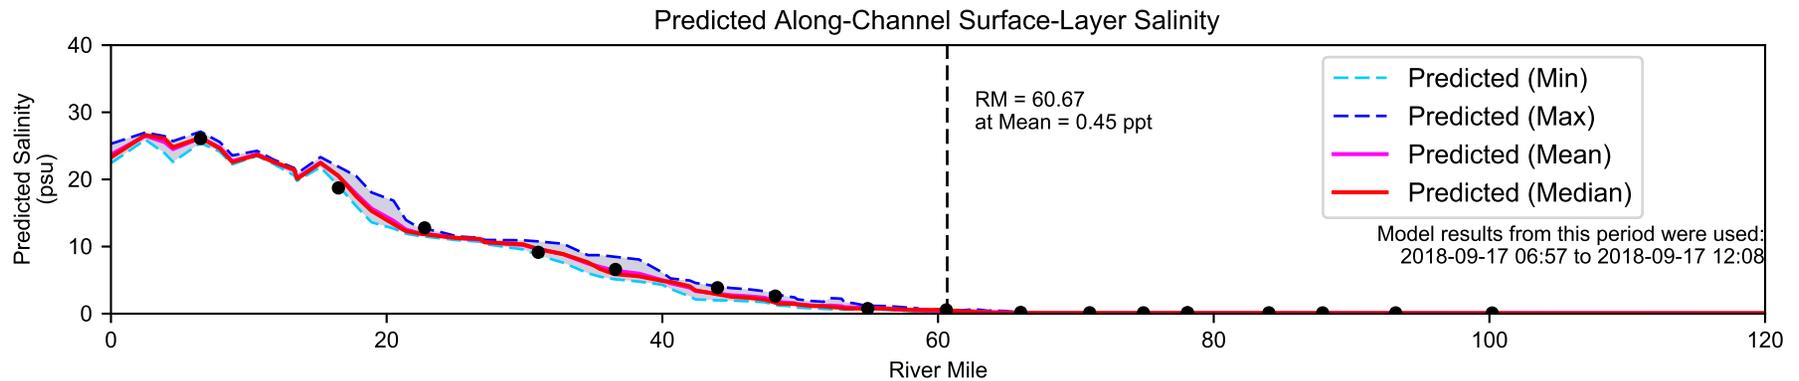

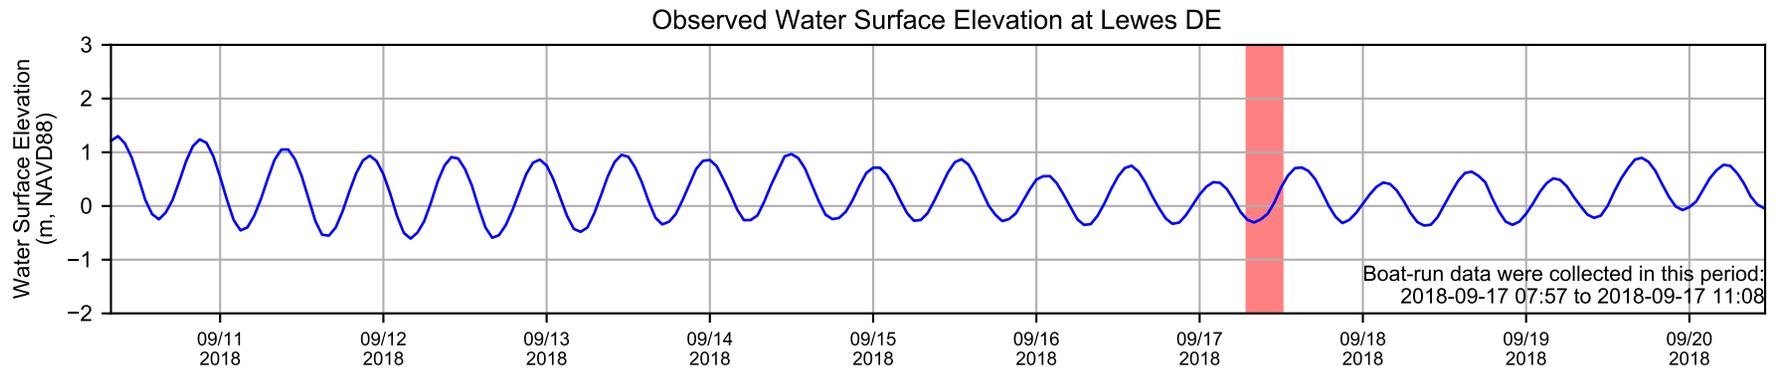

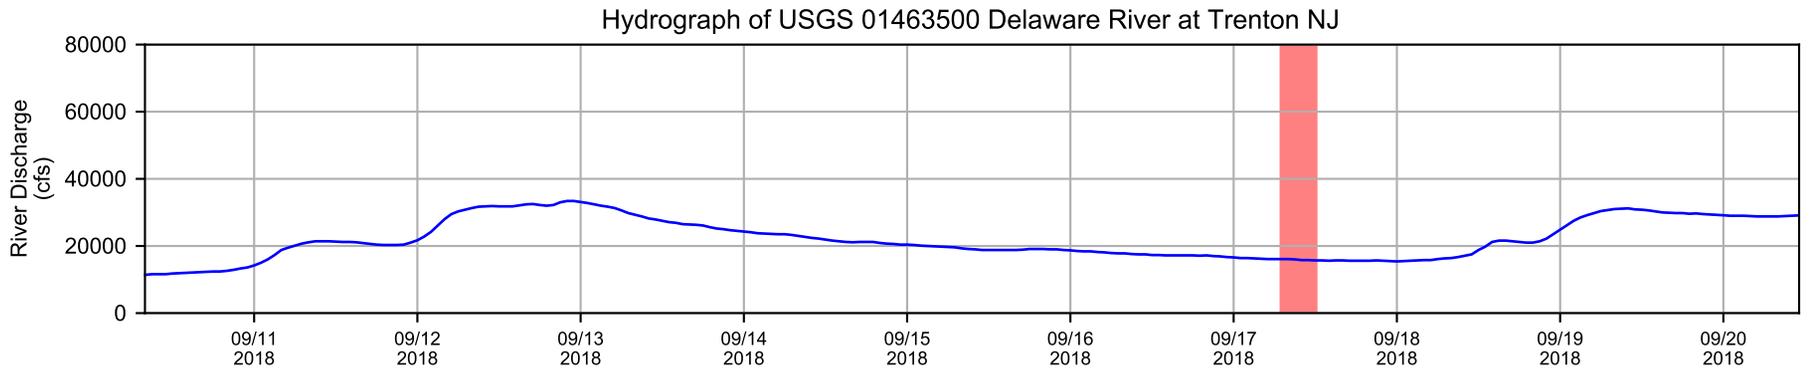

**Longitudinal Profile of Salinity in Delaware River and Bay**

Notes: Salinity and Chloride data collected by boat-run survey were used. Date that under detention limit were set to half of the detection limit.

Red shaded area indicates the boat run survey time period: 2018-08-13 08:53 to 2018-08-13 12:47

Model results along the navigation channel during period of 2018-08-13 07:53 to 2018-08-13 13:47 were used in this analysis.

Run ID: EFDC\_HYDRO\_G72\_2020-05-16

- Boat-run Data (Salinity, Estimated)
- Boat-run Data (Salinity, Not Detected)

**Figure 3.3-19 (7)**

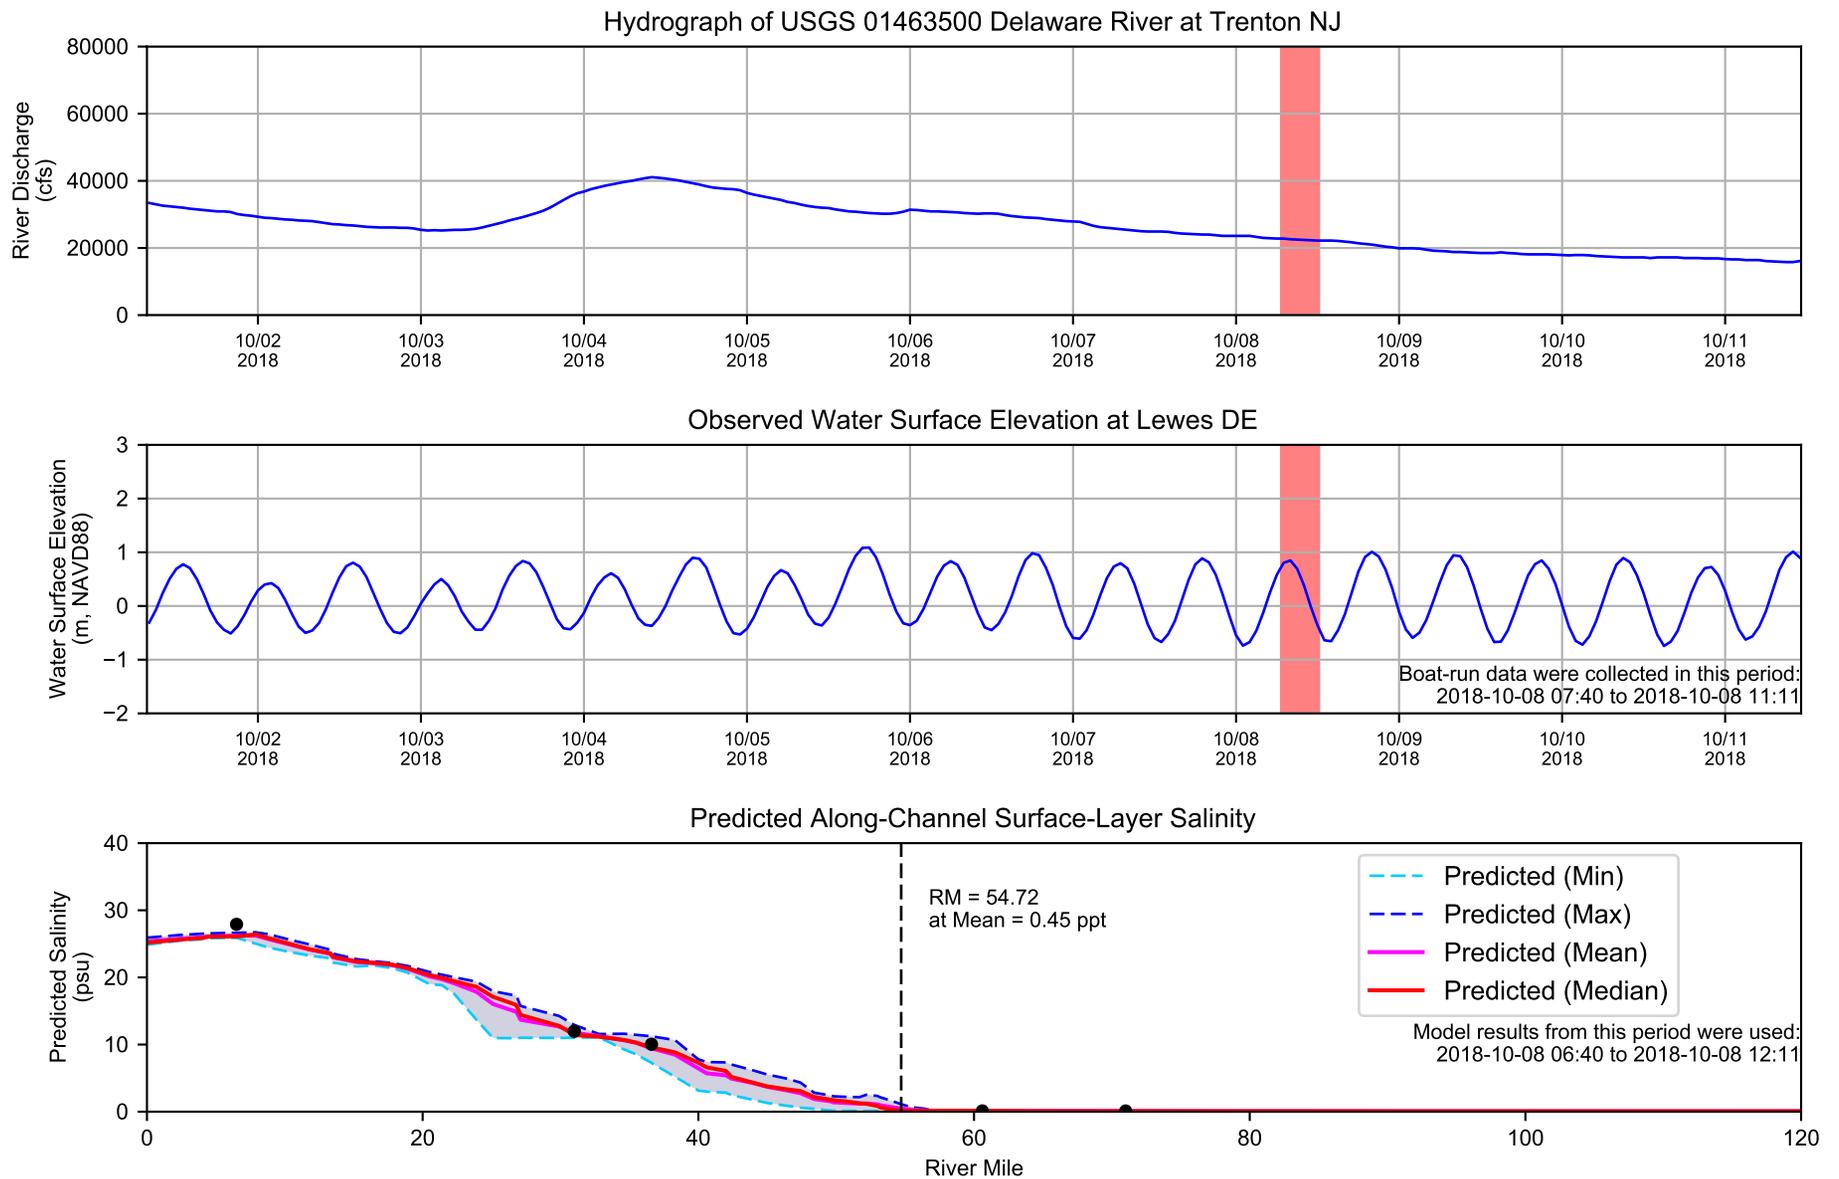

### Longitudinal Profile of Salinity in Delaware River and Bay

Notes: Salinity and Chloride data collected by boat-run survey were used. Date that under detention limit were set to half of the detection limit.

Red shaded area indicates the boat run survey time period: 2018-09-17 07:57 to 2018-09-17 11:08

Model results along the navigation channel during period of 2018-09-17 06:57 to 2018-09-17 12:08 were used in this analysis.

Run ID: EFDC\_HYDRO\_G72\_2020-05-16

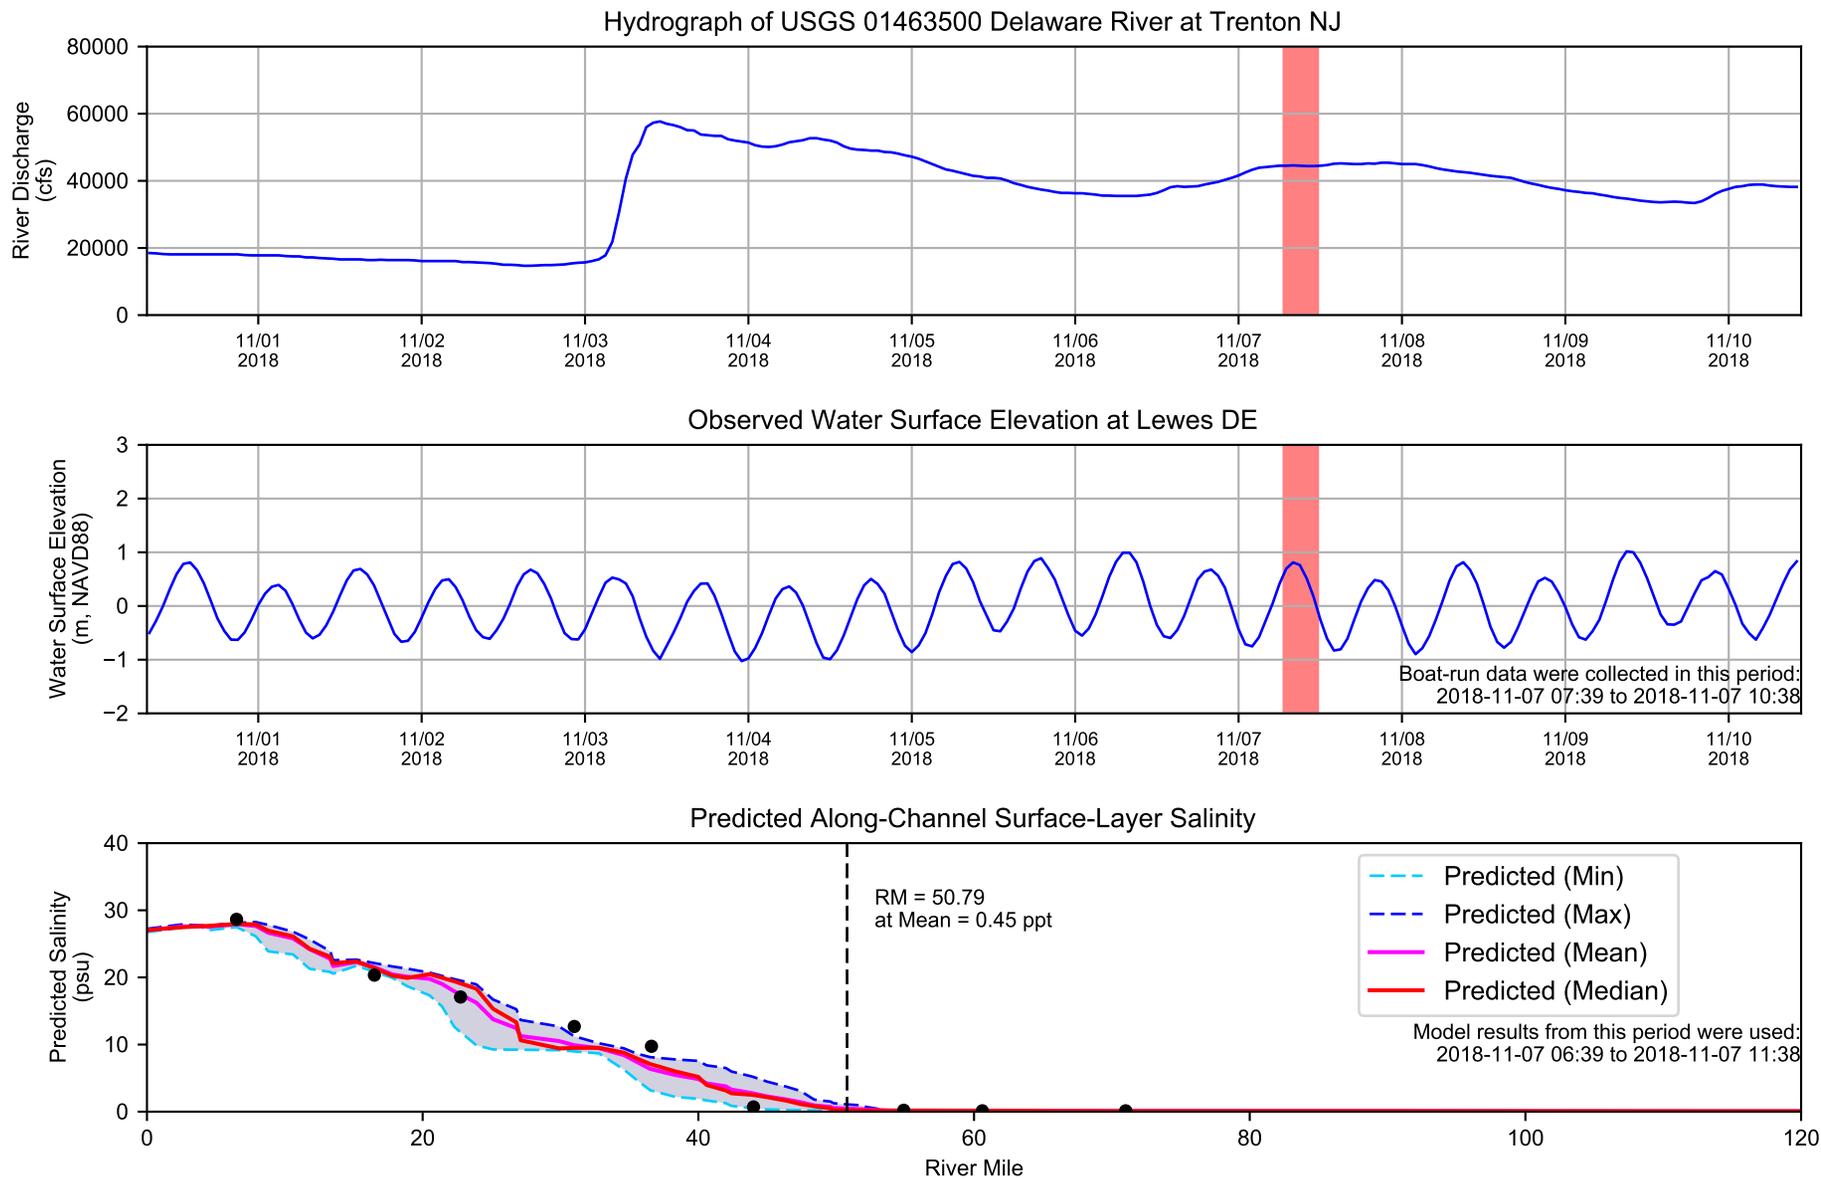

- Boat-run Data (Salinity, Estimated)
- Boat-run Data (Salinity, Not Detected)

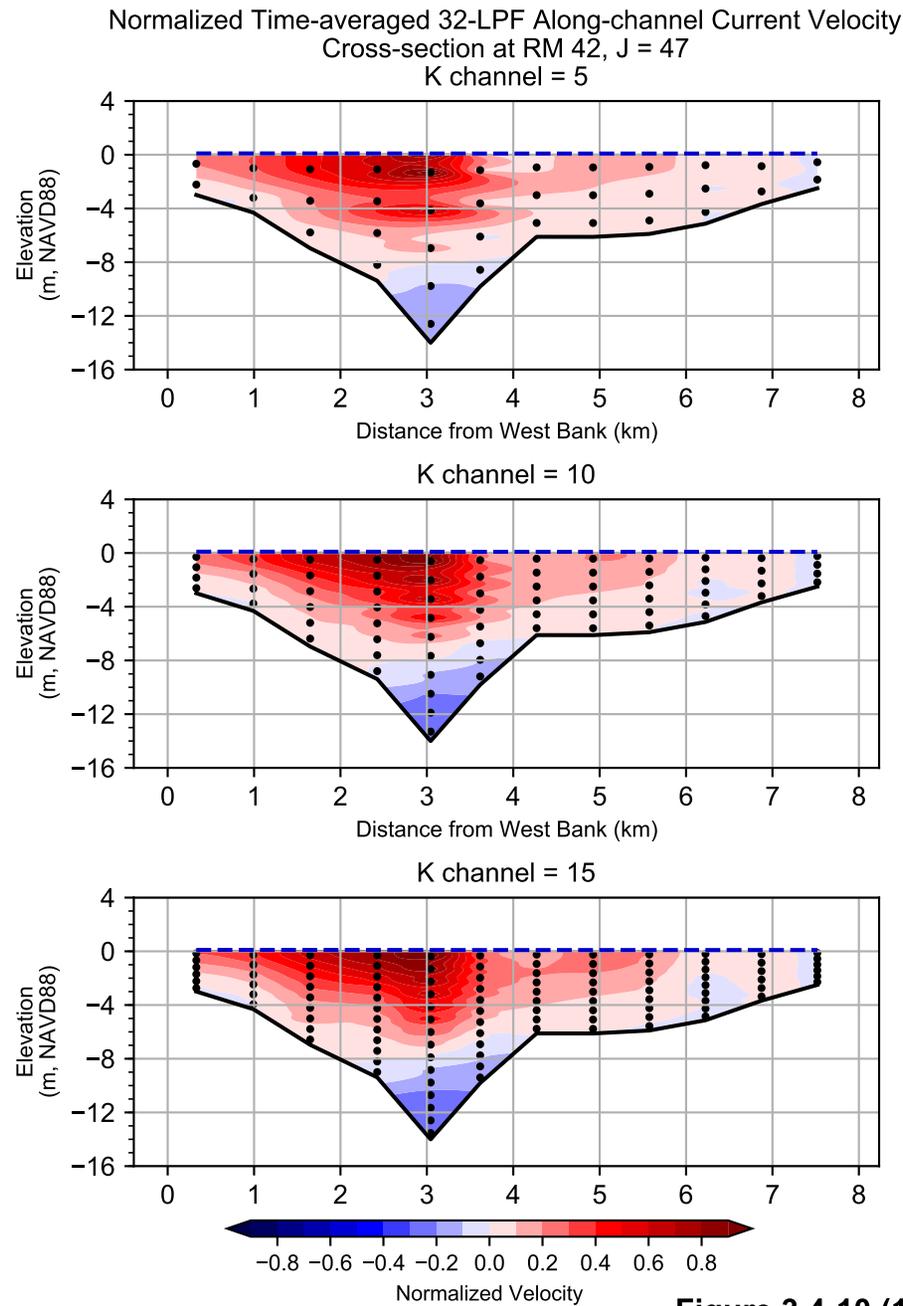

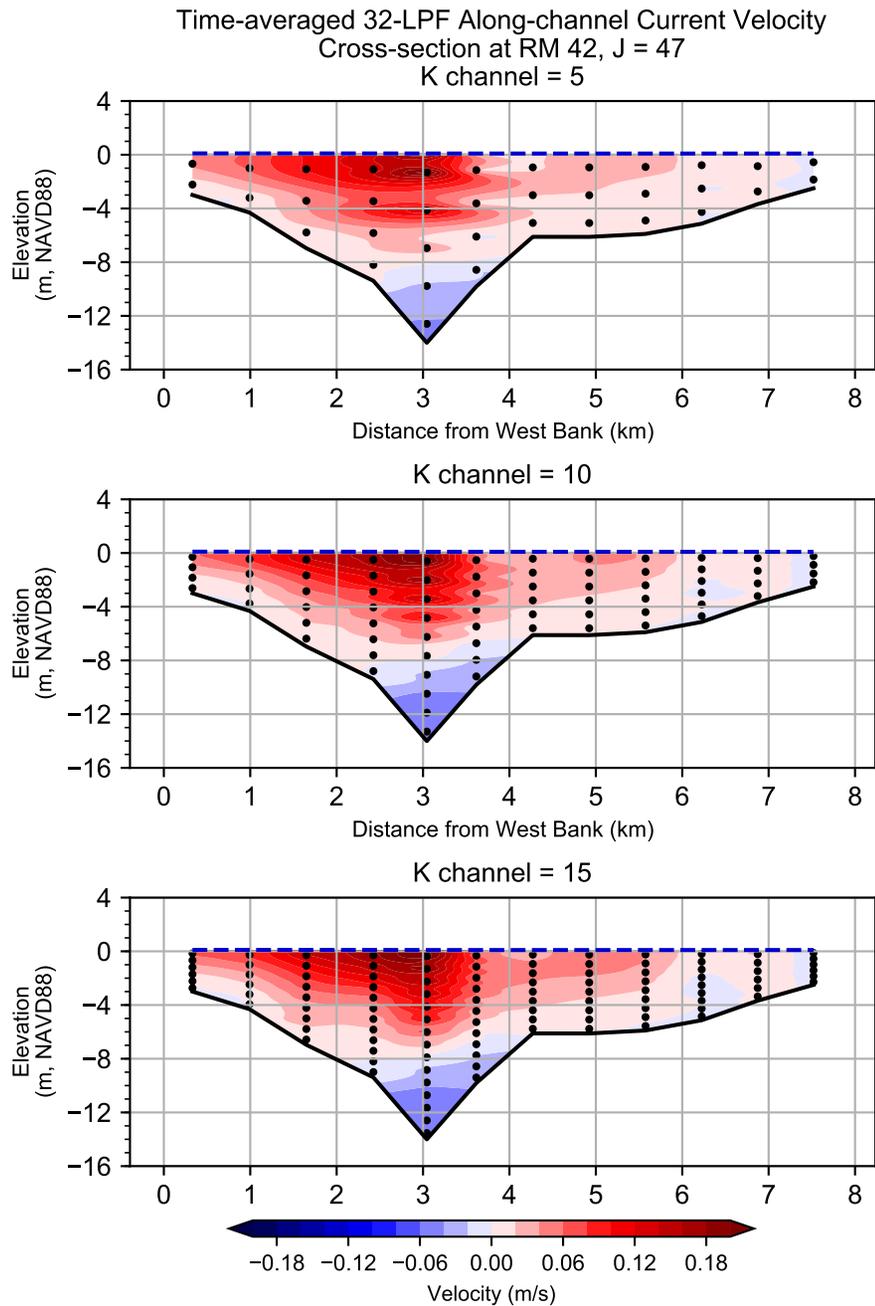

**Figure 3.4-9 (1)**  
Vertical Slide of Normalized Time-averaged 32-LPF Along-channel Current Velocity  
at Cross-section at RM 37, J = 43 during 08-19-2012 to 08-21-2012 Period, Spring Tide

Notes: Positive is moving seaward. Velocity was normalized against the maximum velocity of the cross-section.  
GVC, Grid 7.1, CTE3=8. Grid vertical resolution test.

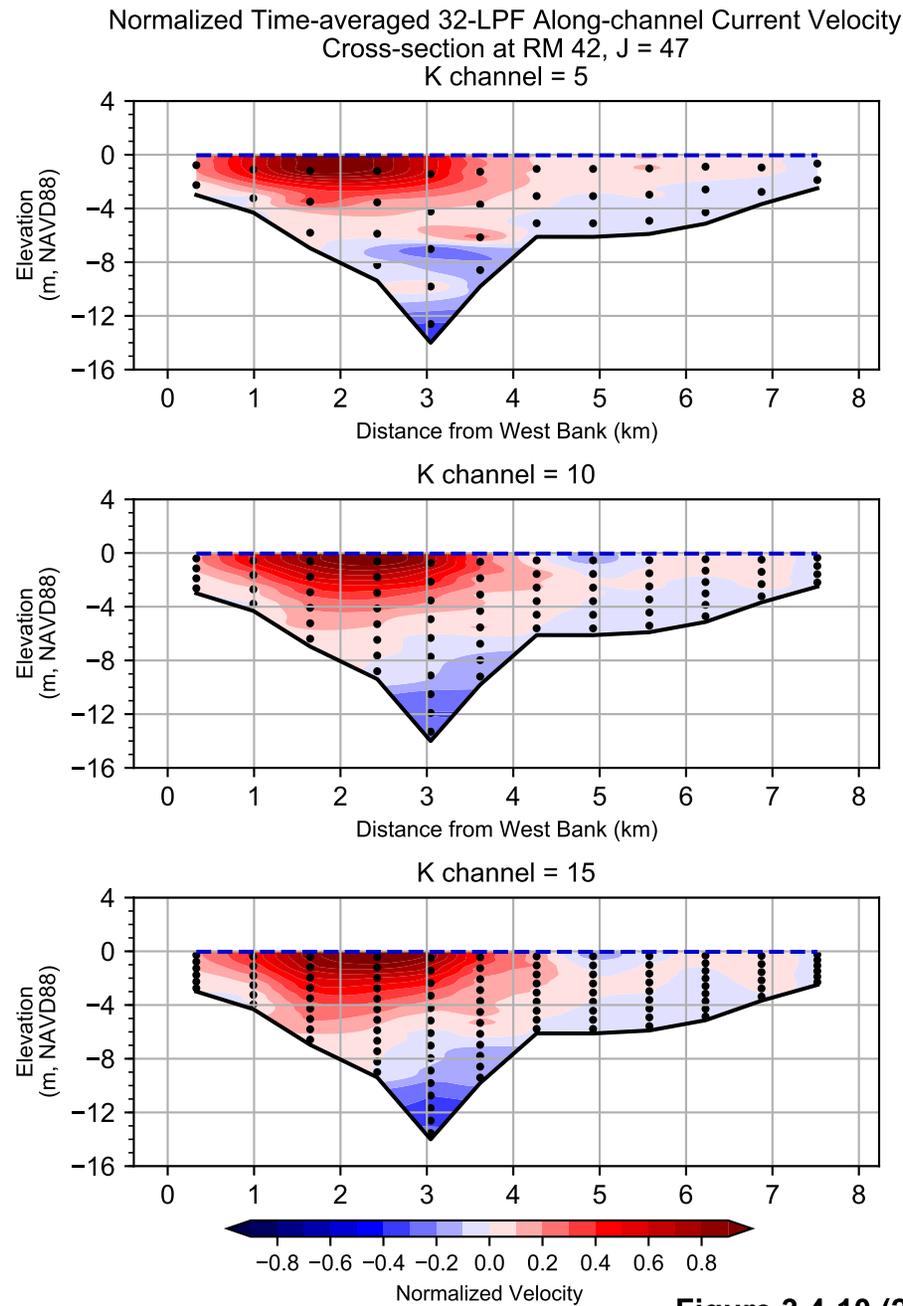

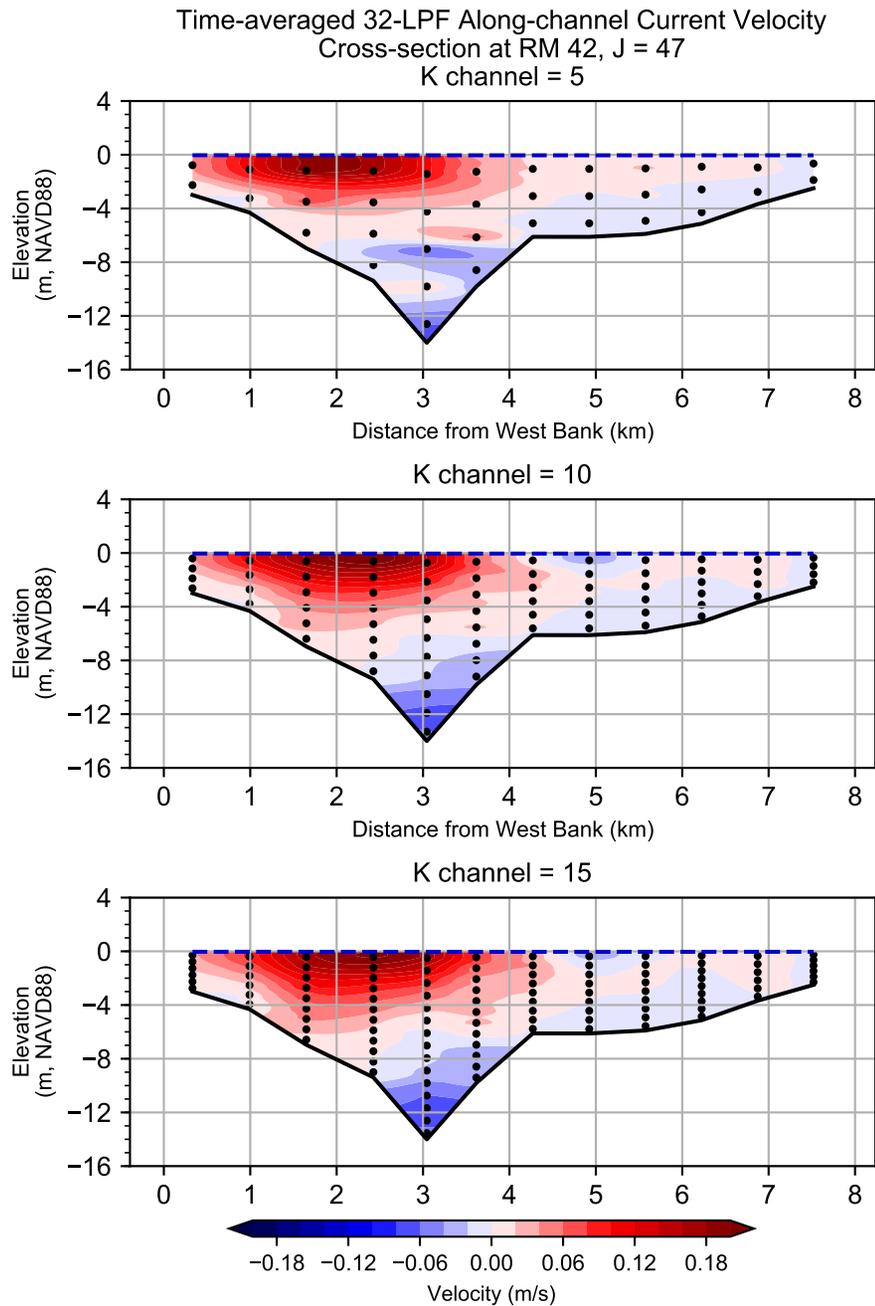

**Figure 3.4-9 (2)**  
Vertical Slide of Normalized Time-averaged 32-LPF Along-channel Current Velocity  
at Cross-section at RM 37, J = 43 during 08-10-2012 to 08-12-2012 Period, Neap Tide

Notes: Positive is moving seaward. Velocity was normalized against the maximum velocity of the cross-section.  
GVC, Grid 7.1, CTE3=8. Grid vertical resolution test.

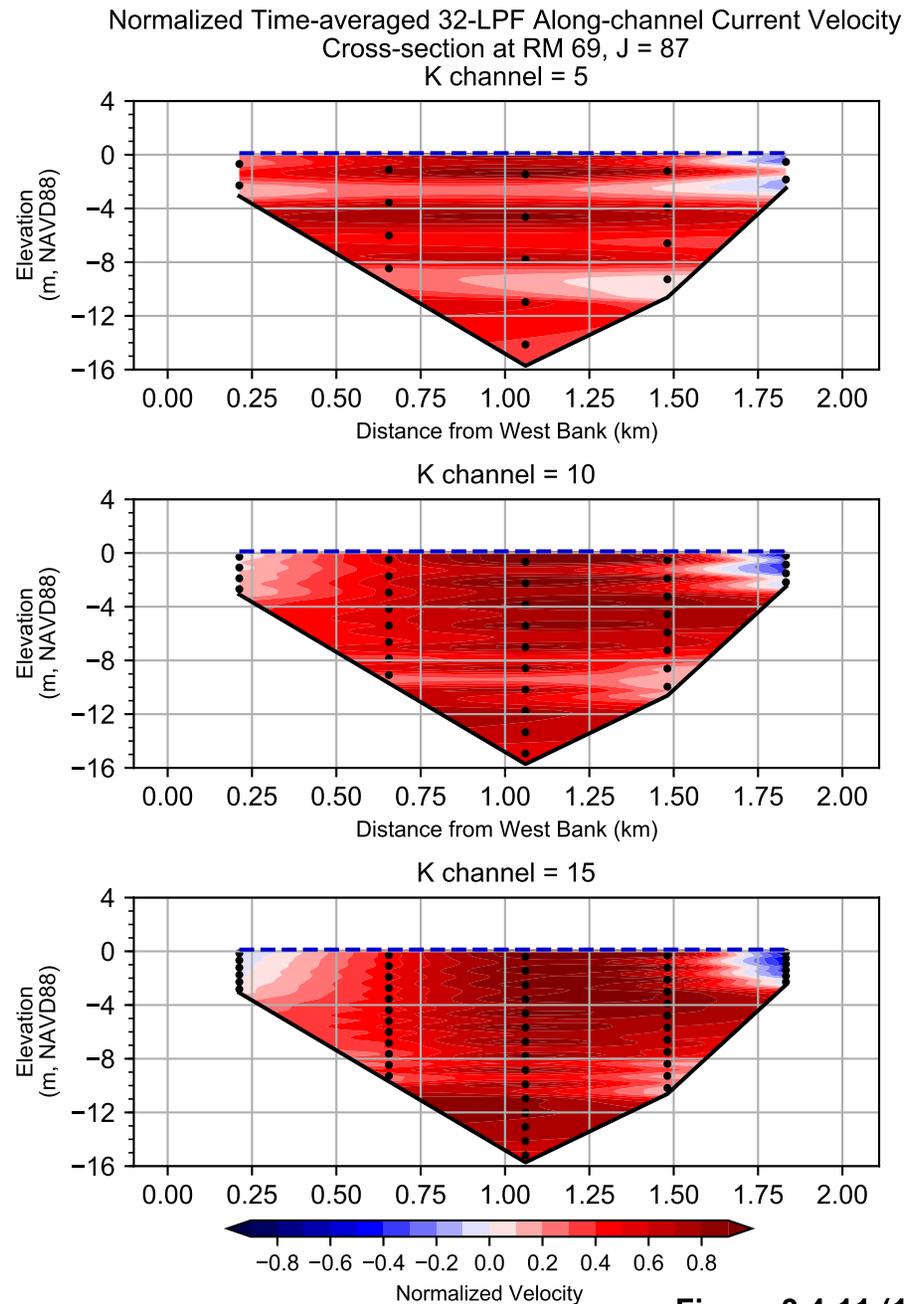

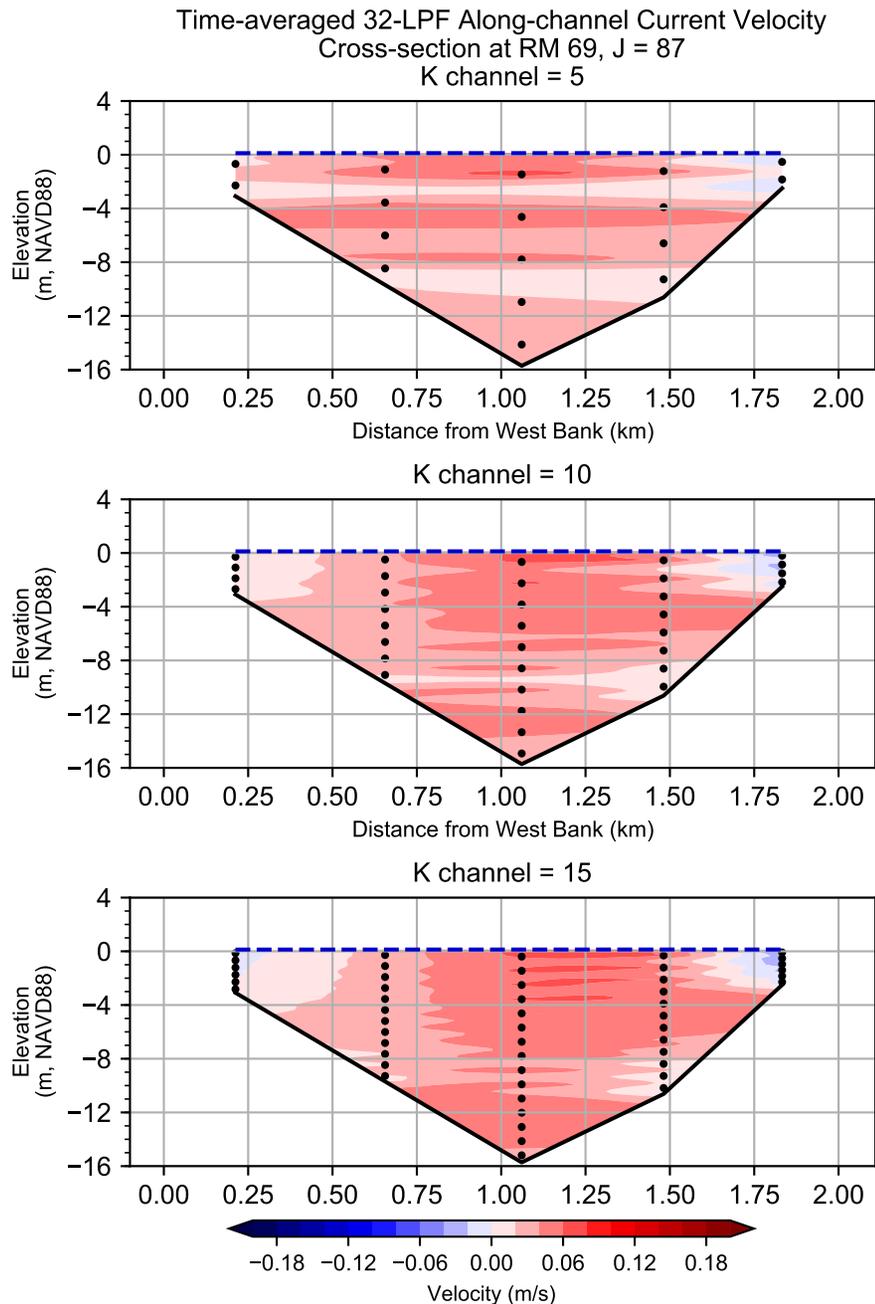

**Figure 3.4-10 (1)**  
Vertical Slide of Normalized Time-averaged 32-LPF Along-channel Current Velocity  
at Cross-section at RM 42, J = 47 during 08-19-2012 to 08-21-2012 Period, Spring Tide

Notes: Positive is moving seaward. Velocity was normalized against the maximum velocity of the cross-section.  
GVC, Grid 7.1, CTE3=8. Grid vertical resolution test.

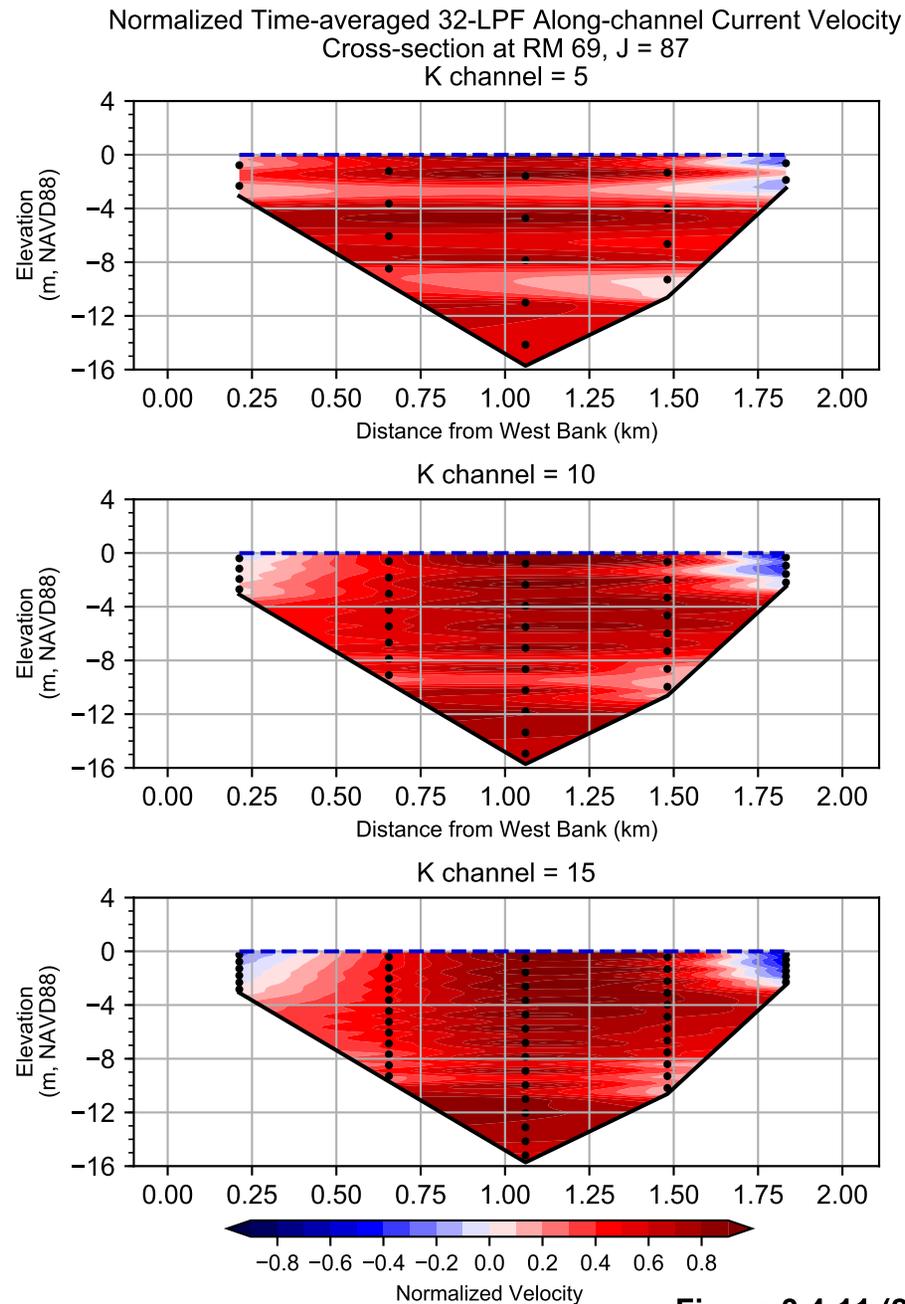

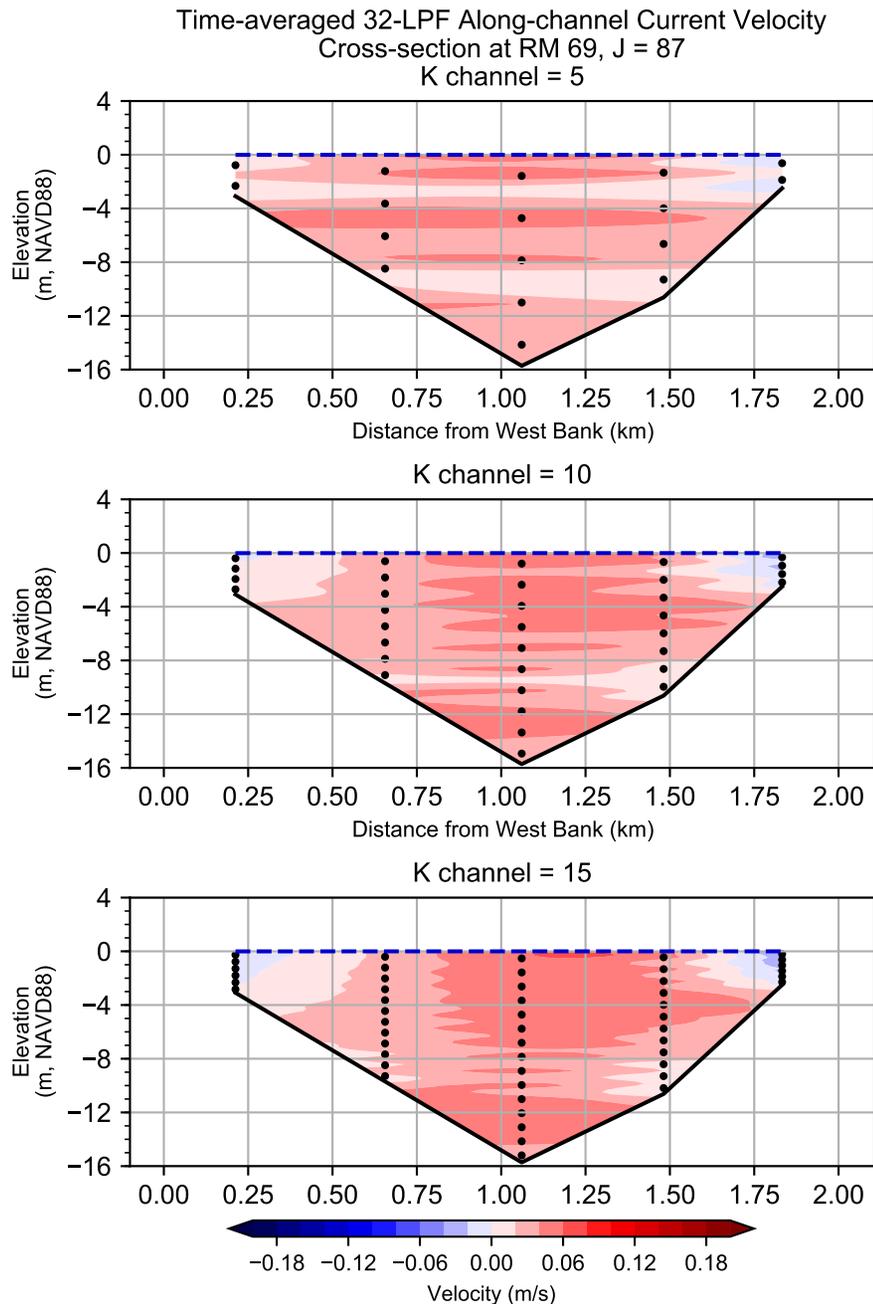

**Figure 3.4-10 (2)**  
Vertical Slide of Normalized Time-averaged 32-LPF Along-channel Current Velocity  
at Cross-section at RM 42, J = 47 during 08-10-2012 to 08-12-2012 Period, Neap Tide

Notes: Positive is moving seaward. Velocity was normalized against the maximum velocity of the cross-section.  
GVC, Grid 7.1, CTE3=8. Grid vertical resolution test.

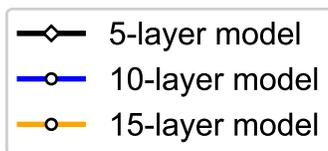

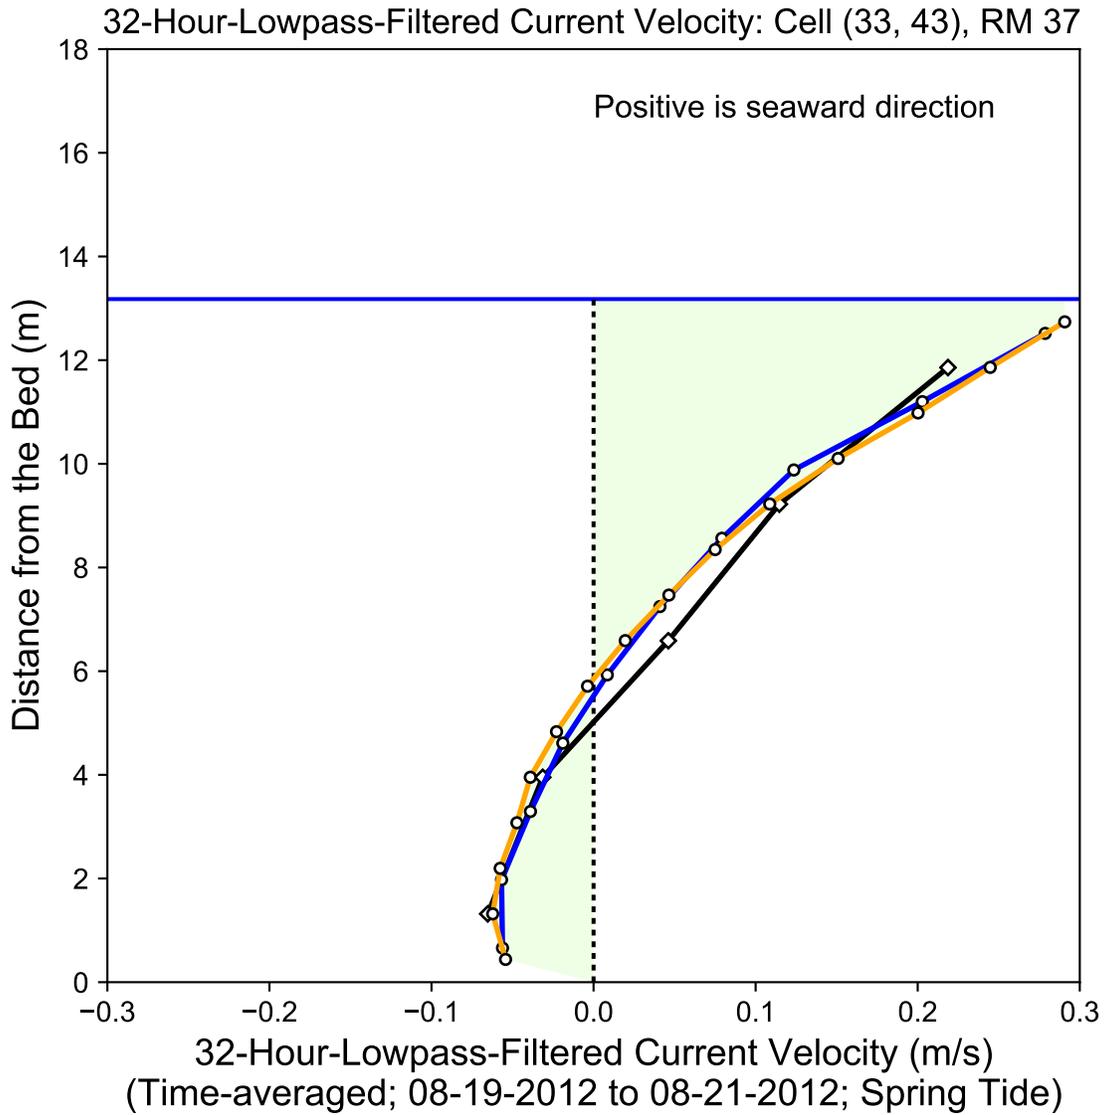

**Figure 3.4-11 (1)**  
Vertical Slide of Normalized Time-averaged 32-LPF Along-channel Current Velocity  
at Cross-section at RM 69, J = 87 during 08-19-2012 to 08-21-2012 Period, Spring Tide

Notes: Positive is moving seaward. Velocity was normalized against the maximum velocity of the cross-section.  
GVC, Grid 7.1, CTE3=8. Grid vertical resolution test.

**Figure 3.4-11 (2)**  
Vertical Slide of Normalized Time-averaged 32-LPF Along-channel Current Velocity  
at Cross-section at RM 69, J = 87 during 08-10-2012 to 08-12-2012 Period, Neap Tide

Notes: Positive is moving seaward. Velocity was normalized against the maximum velocity of the cross-section.  
GVC, Grid 7.1, CTE3=8. Grid vertical resolution test.

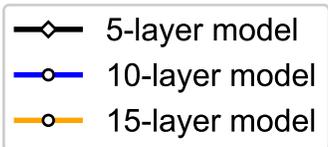

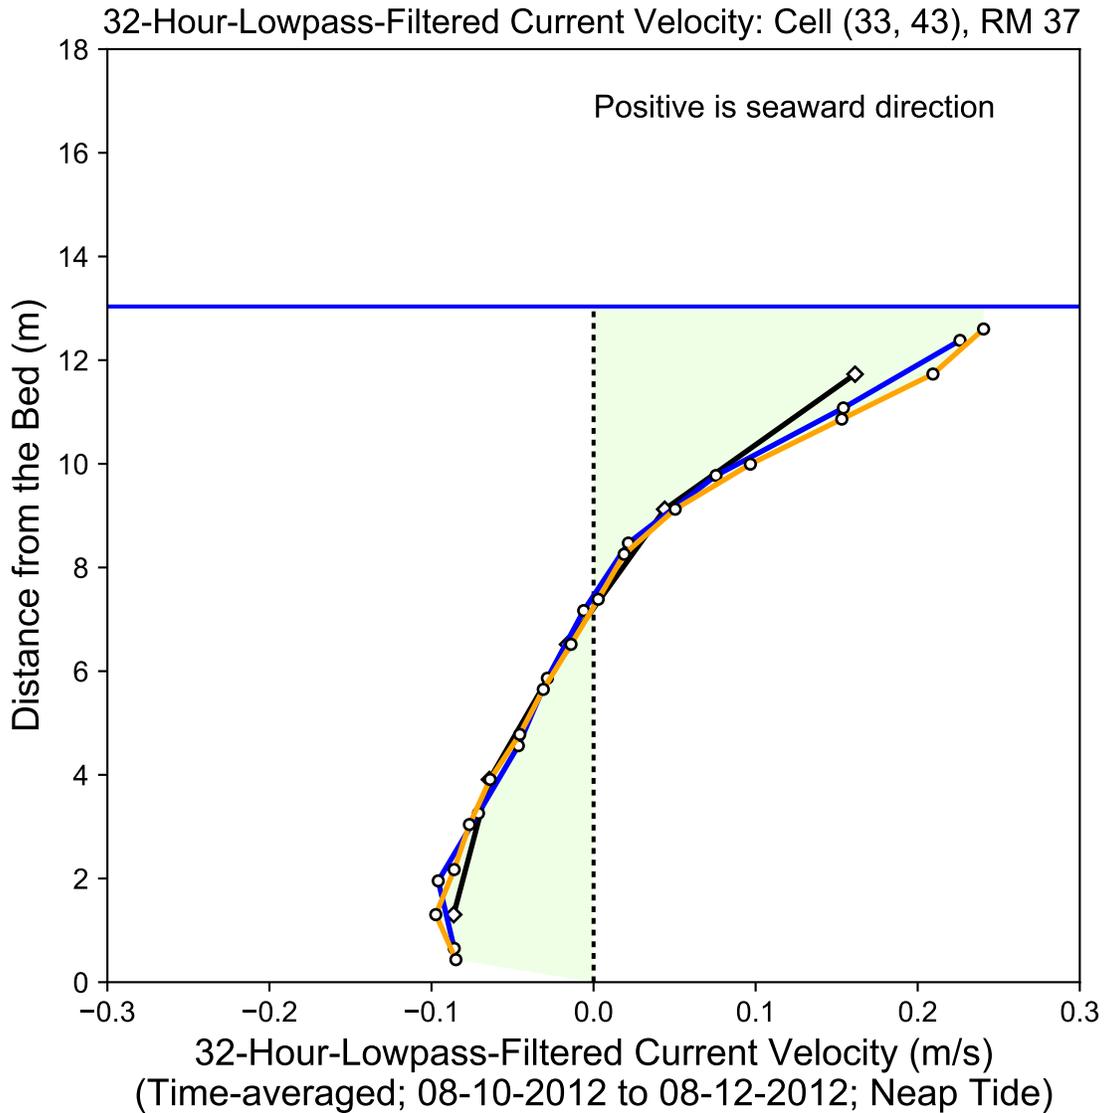

**Figure 3.4-12 (1)**

Simulated 32-Hour-Lowpass-Filtered Along-channel Current Velocity during 08-19-2012 to 08-21-2012; Spring Tide at Station S1 at Cell (33, 43), RM 37

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

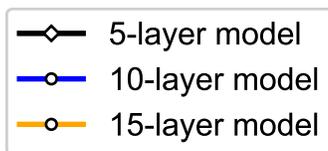

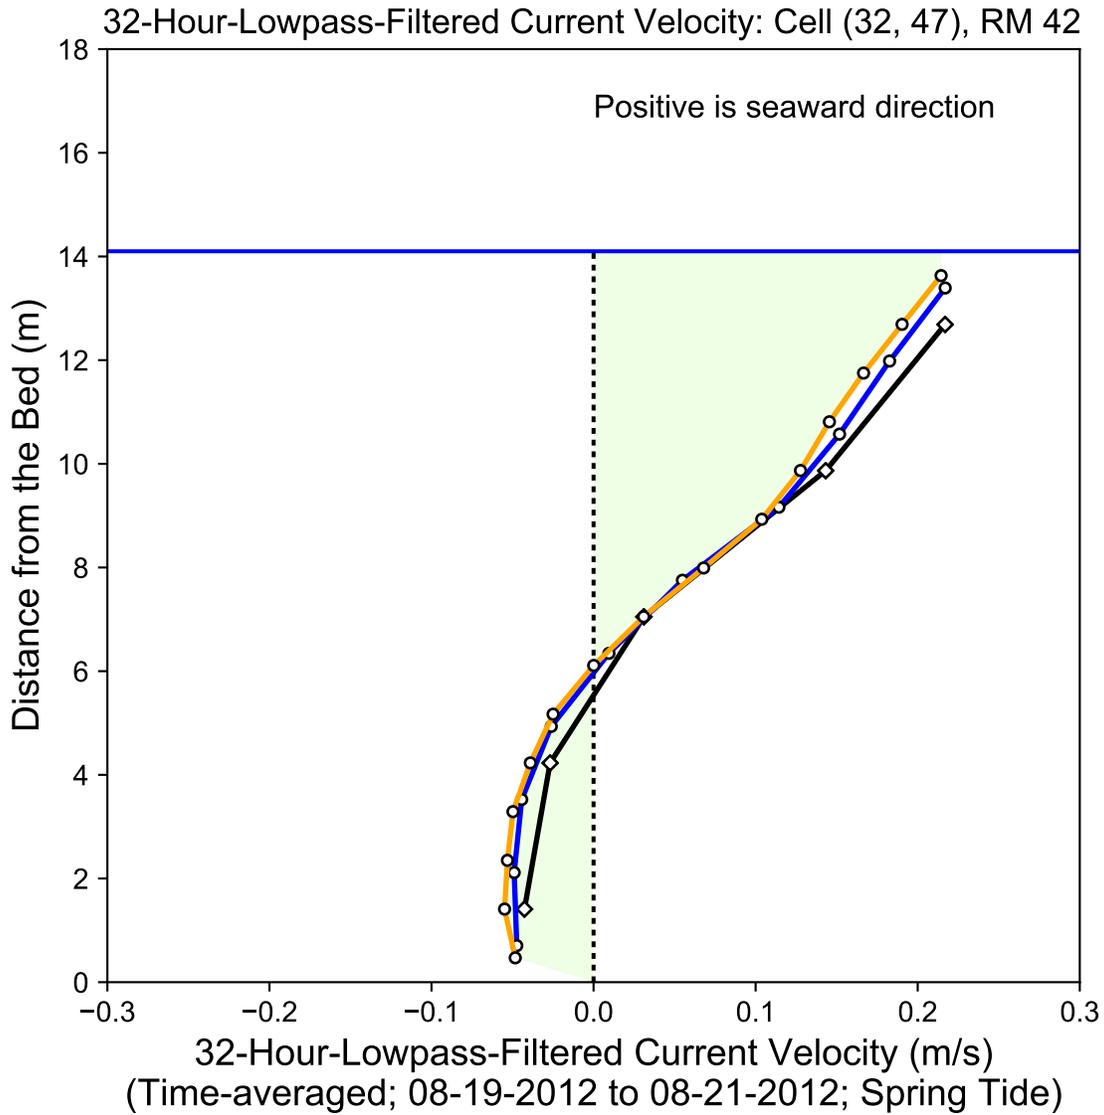

**Figure 3.4-12 (2)**

Simulated 32-Hour-Lowpass-Filtered Along-channel Current Velocity during 08-10-2012 to 08-12-2012; Neap Tide at Station S1 at Cell (33, 43), RM 37

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

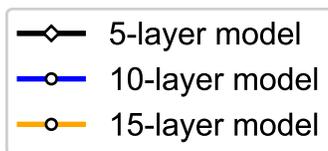

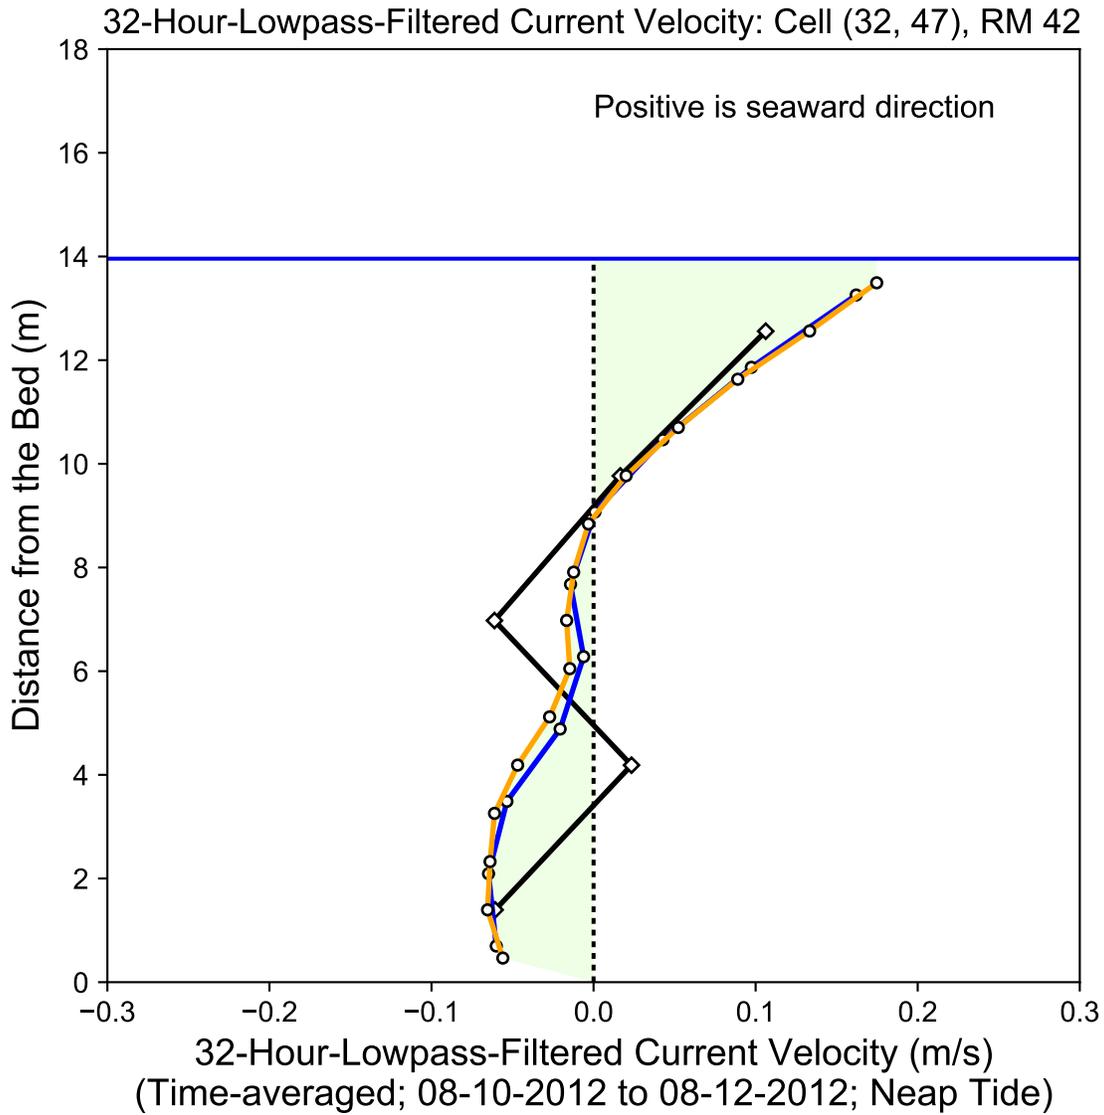

**Figure 3.4-13 (1)**

Simulated 32-Hour-Lowpass-Filtered Along-channel Current Velocity during 08-19-2012 to 08-21-2012; Spring Tide at Station S2 at Cell (32, 47), RM 42

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

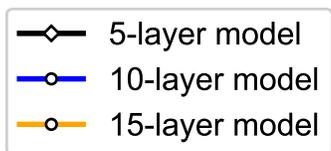

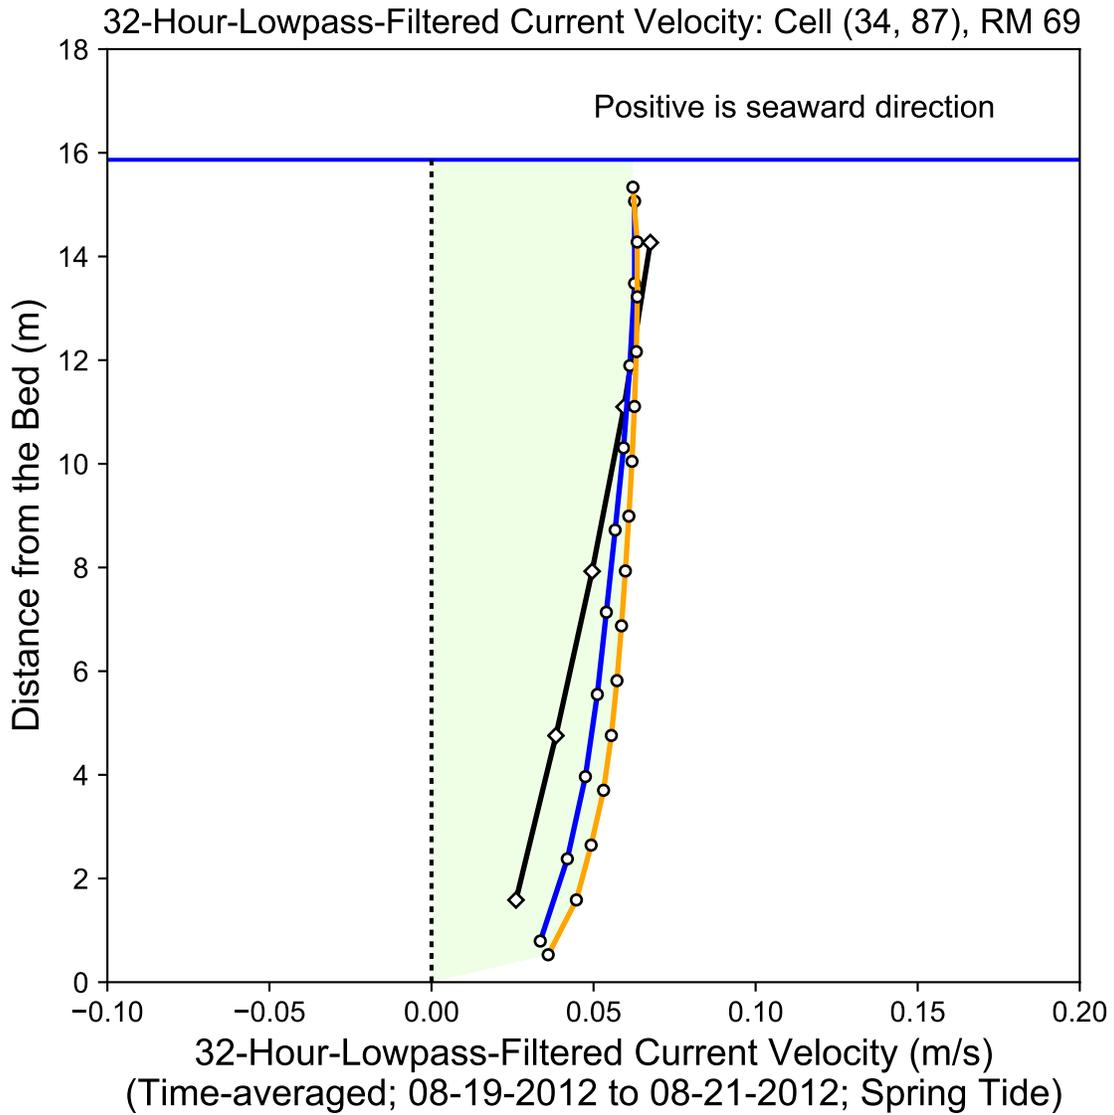

**Figure 3.4-13 (2)**

Simulated 32-Hour-Lowpass-Filtered Along-channel Current Velocity during 08-10-2012 to 08-12-2012; Neap Tide at Station S2 at Cell (32, 47), RM 42

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

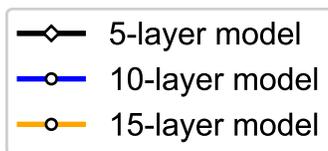

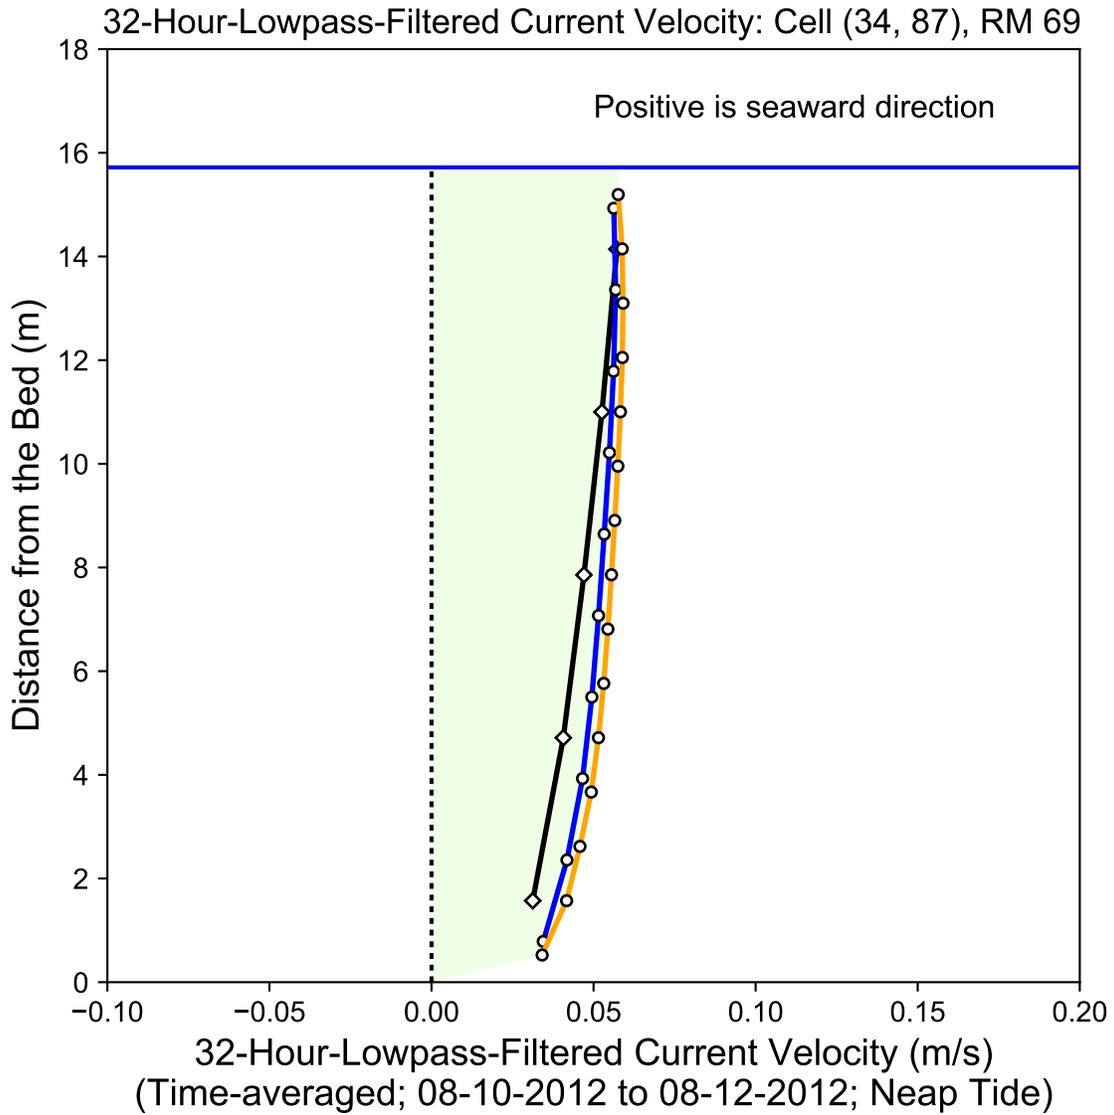

**Figure 3.4-14 (1)**

Simulated 32-Hour-Lowpass-Filtered Along-channel Current Velocity during 08-19-2012 to 08-21-2012; Spring Tide at Station S3 at Cell (34, 87), RM 69

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

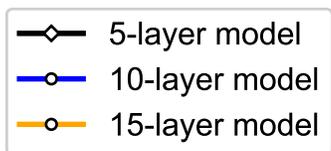

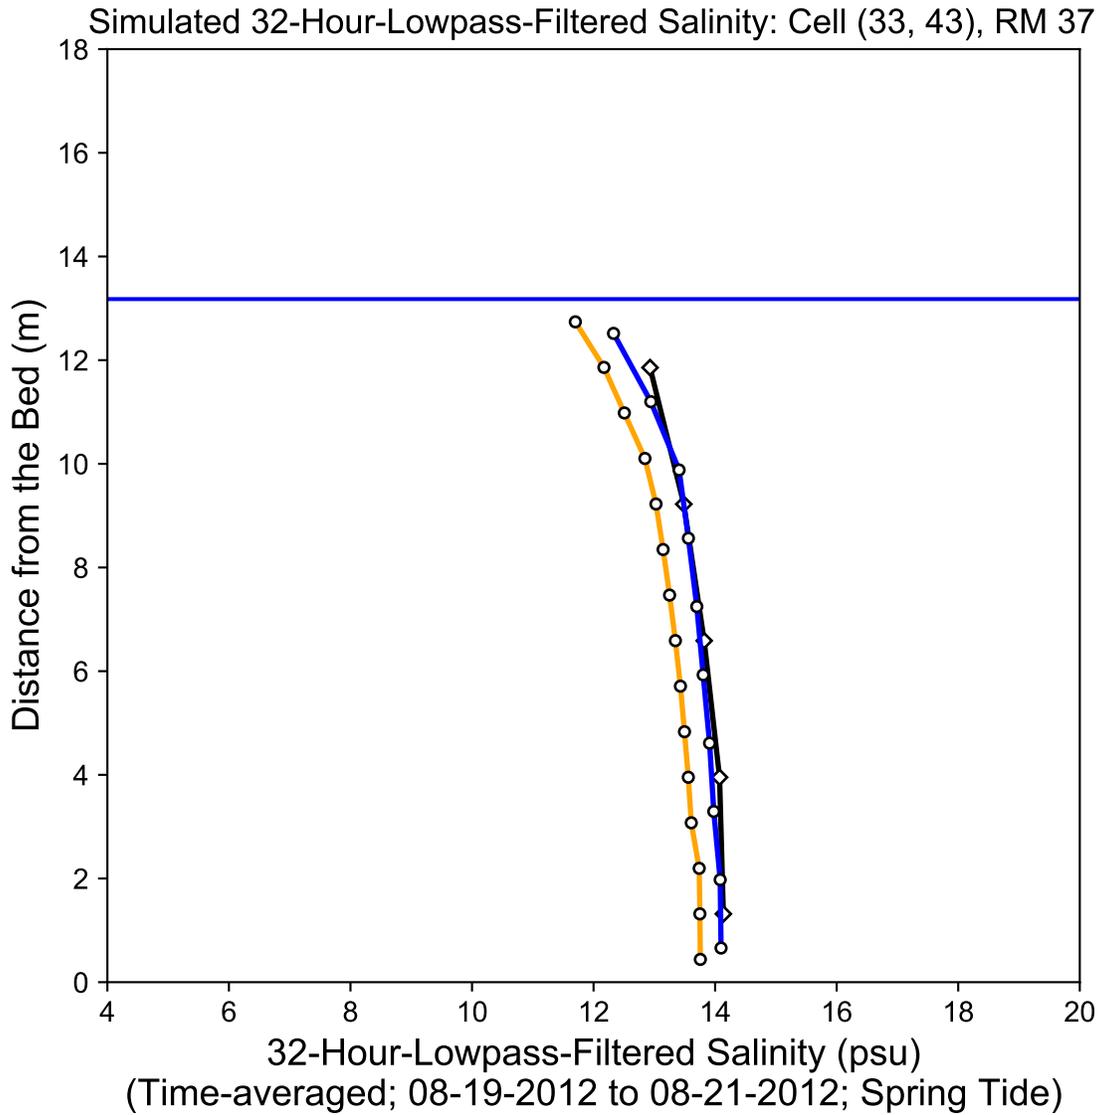

**Figure 3.4-14 (2)**

Simulated 32-Hour-Lowpass-Filtered Along-channel Current Velocity during 08-10-2012 to 08-12-2012; Neap Tide at Station S3 at Cell (34, 87), RM 69

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

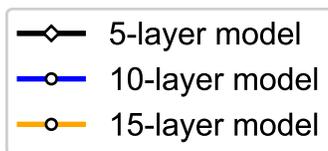

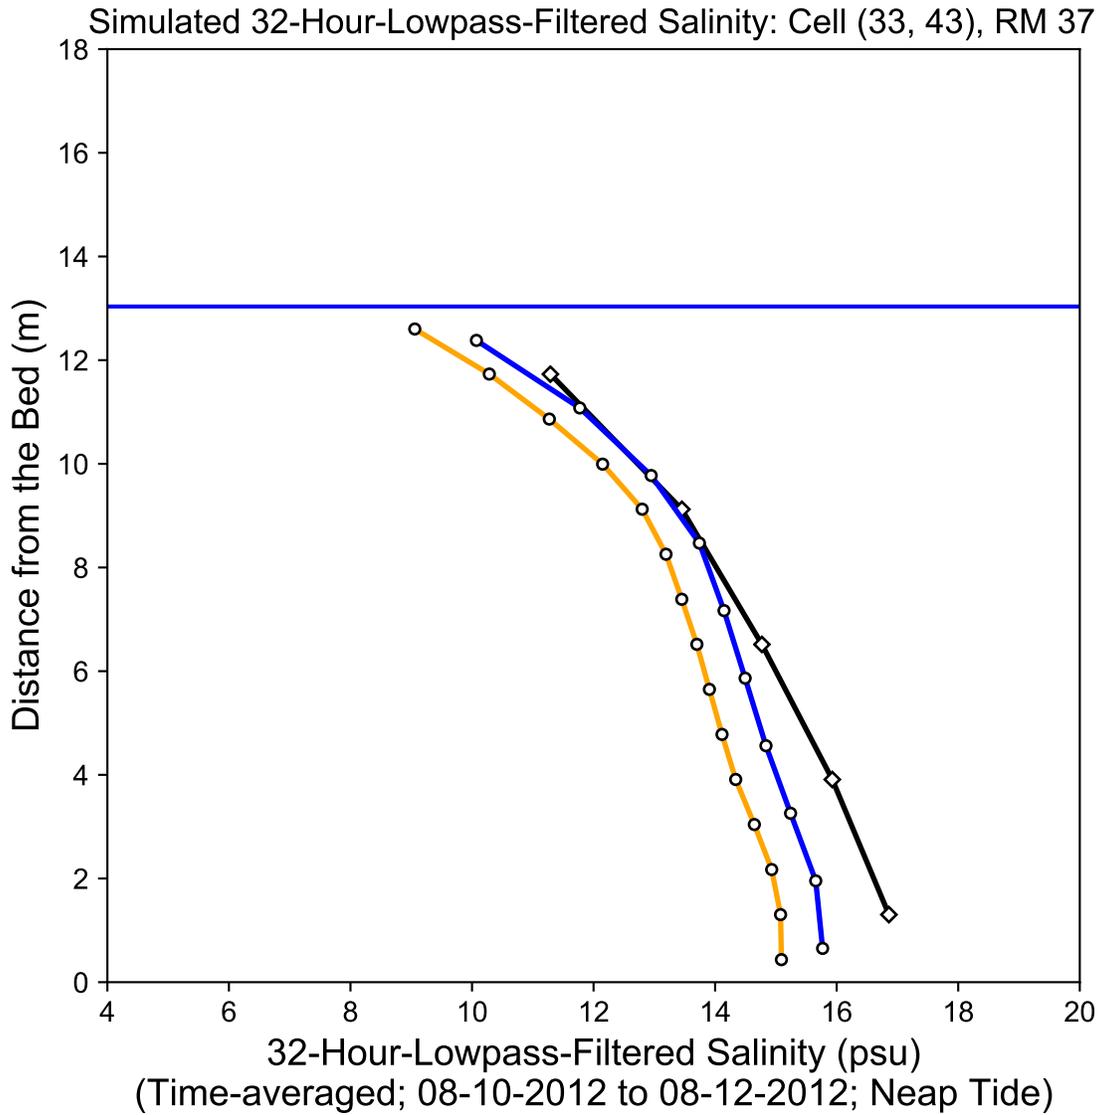

**Figure 3.4-15 (1)**

Simulated 32-Hour-Lowpass-Filtered Salinity during 08-19-2012 to 08-21-2012; Spring Tide at Station S1 at Cell (33, 43), RM 37

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

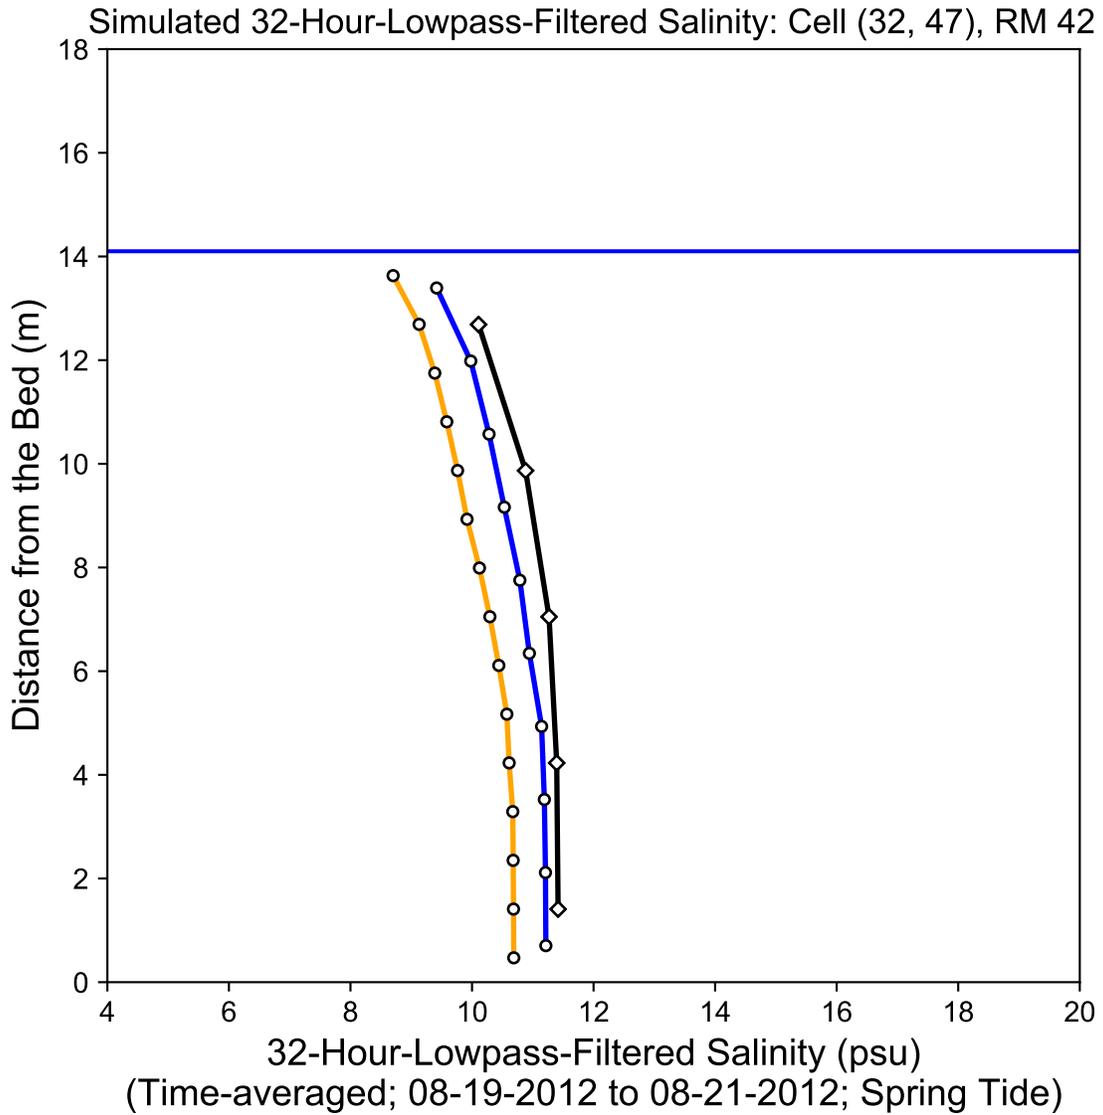

**Figure 3.4-15 (2)**

Simulated 32-Hour-Lowpass-Filtered Salinity during 08-10-2012 to 08-12-2012; Neap Tide at Station S1 at Cell (33, 43), RM 37

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

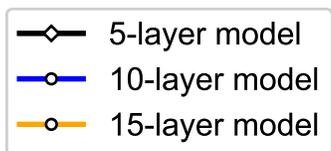

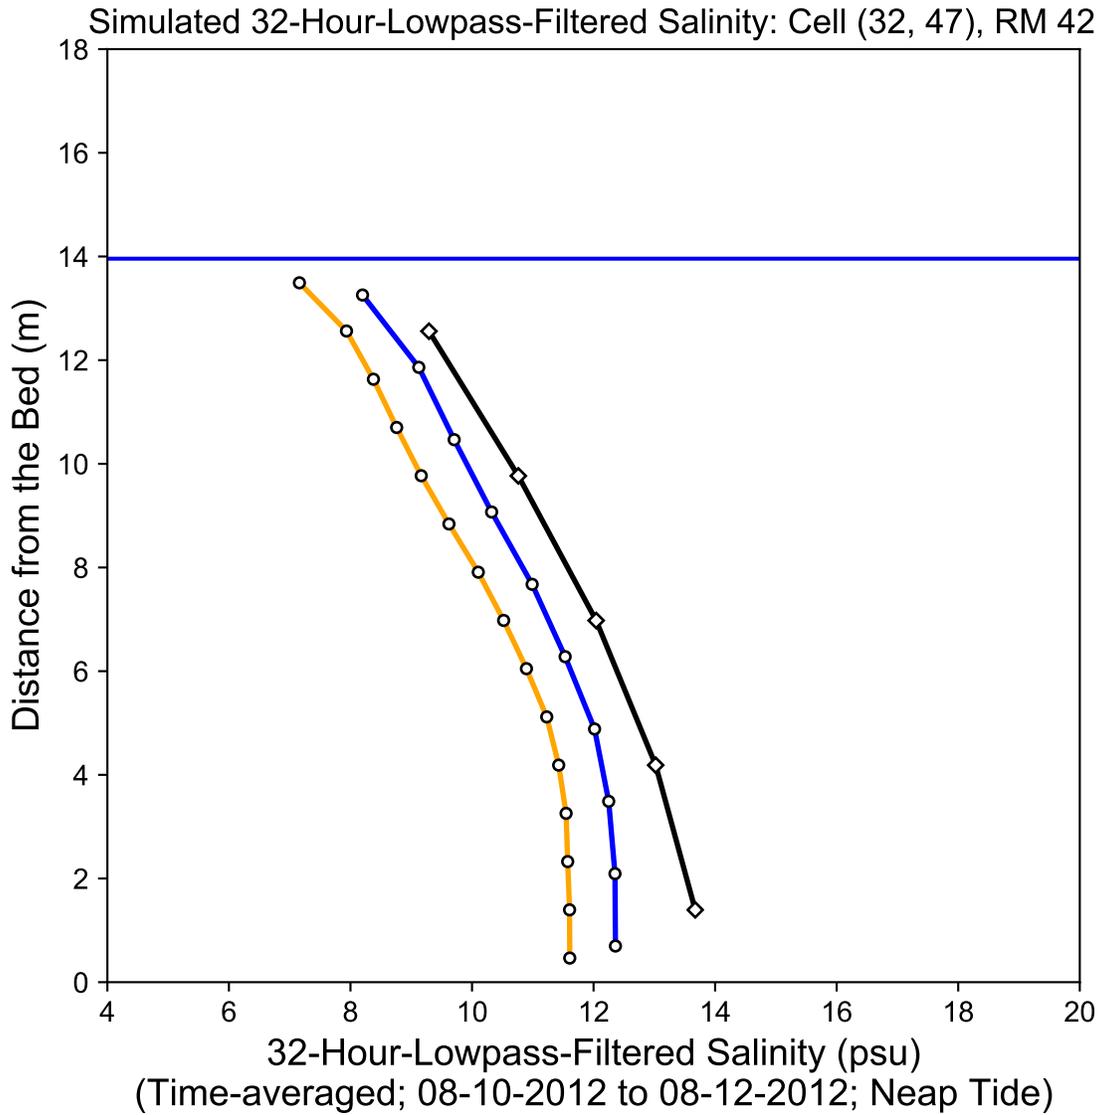

**Figure 3.4-16 (1)**

Simulated 32-Hour-Lowpass-Filtered Salinity during 08-19-2012 to 08-21-2012; Spring Tide at Station S2 at Cell (32, 47), RM 42

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

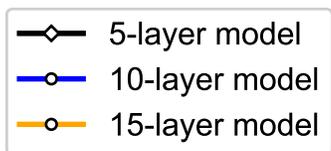

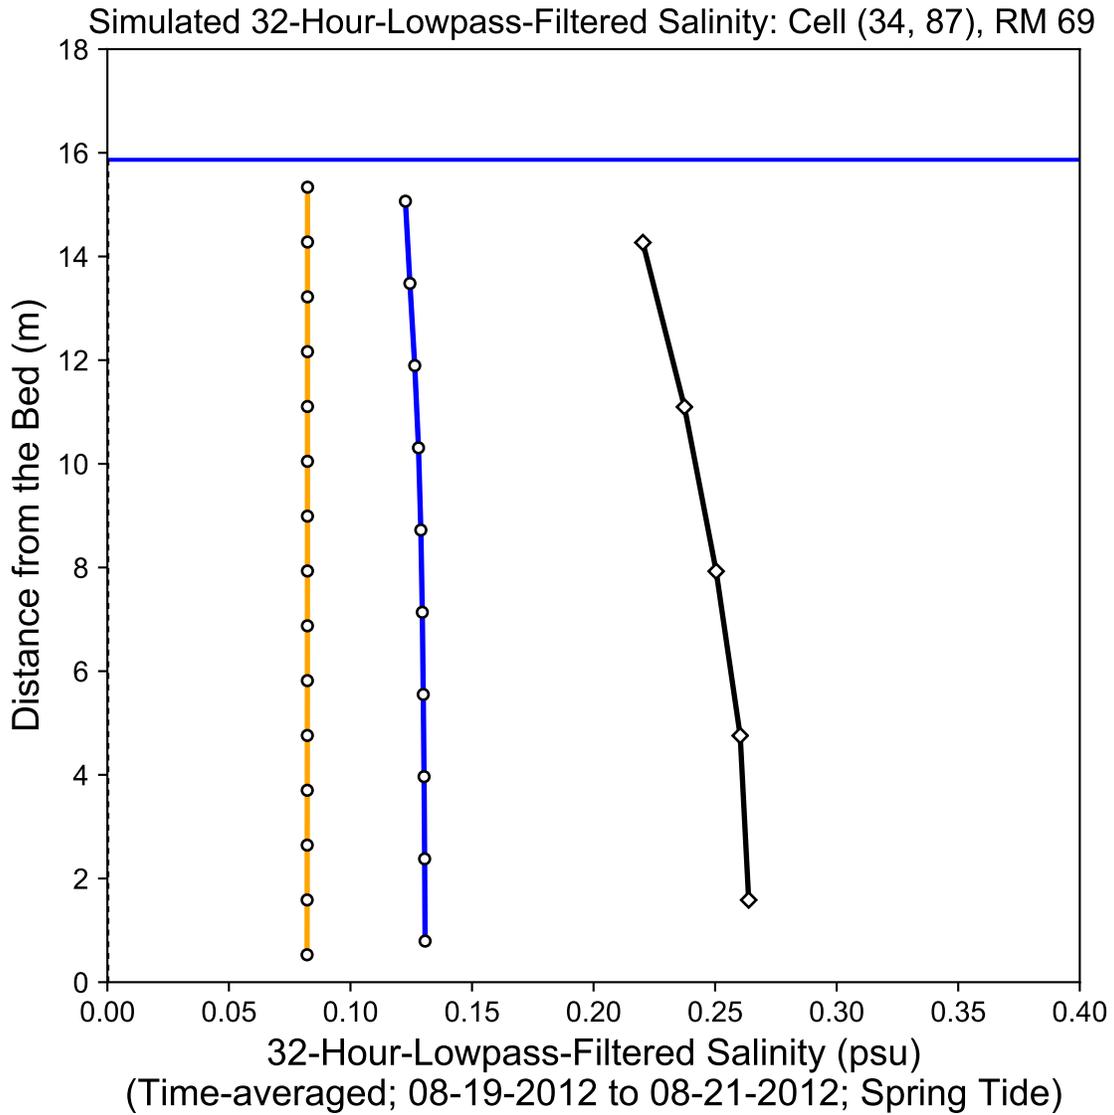

**Figure 3.4-16 (2)**

Simulated 32-Hour-Lowpass-Filtered Salinity during 08-10-2012 to 08-12-2012; Neap Tide at Station S2 at Cell (32, 47), RM 42

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

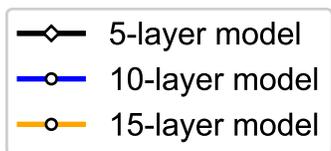

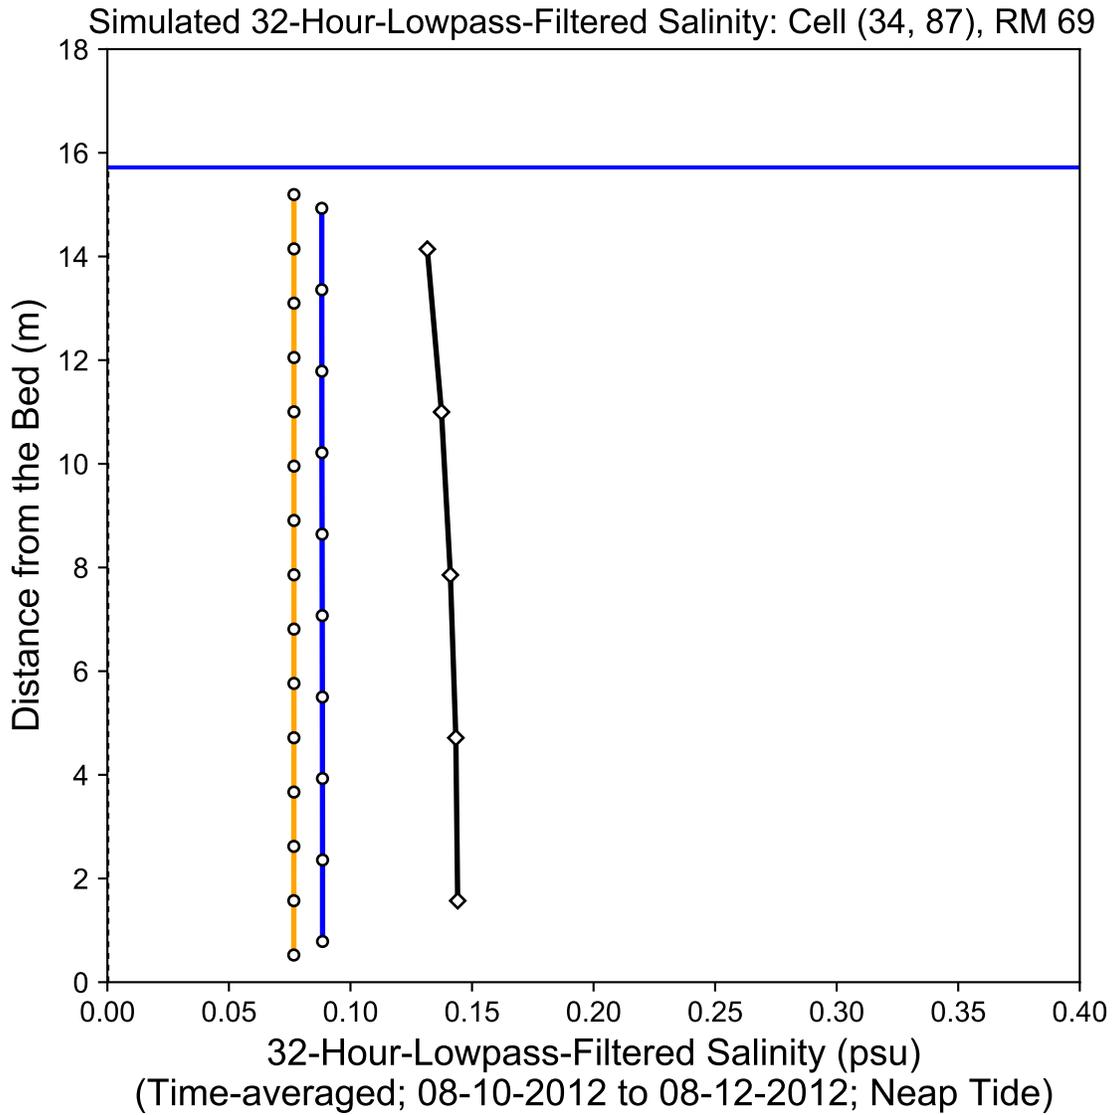

**Figure 3.4-17 (1)**

Simulated 32-Hour-Lowpass-Filtered Salinity during 08-19-2012 to 08-21-2012; Spring Tide at Station S3 at Cell (34, 87), RM 69

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

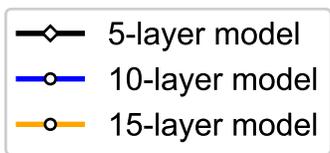

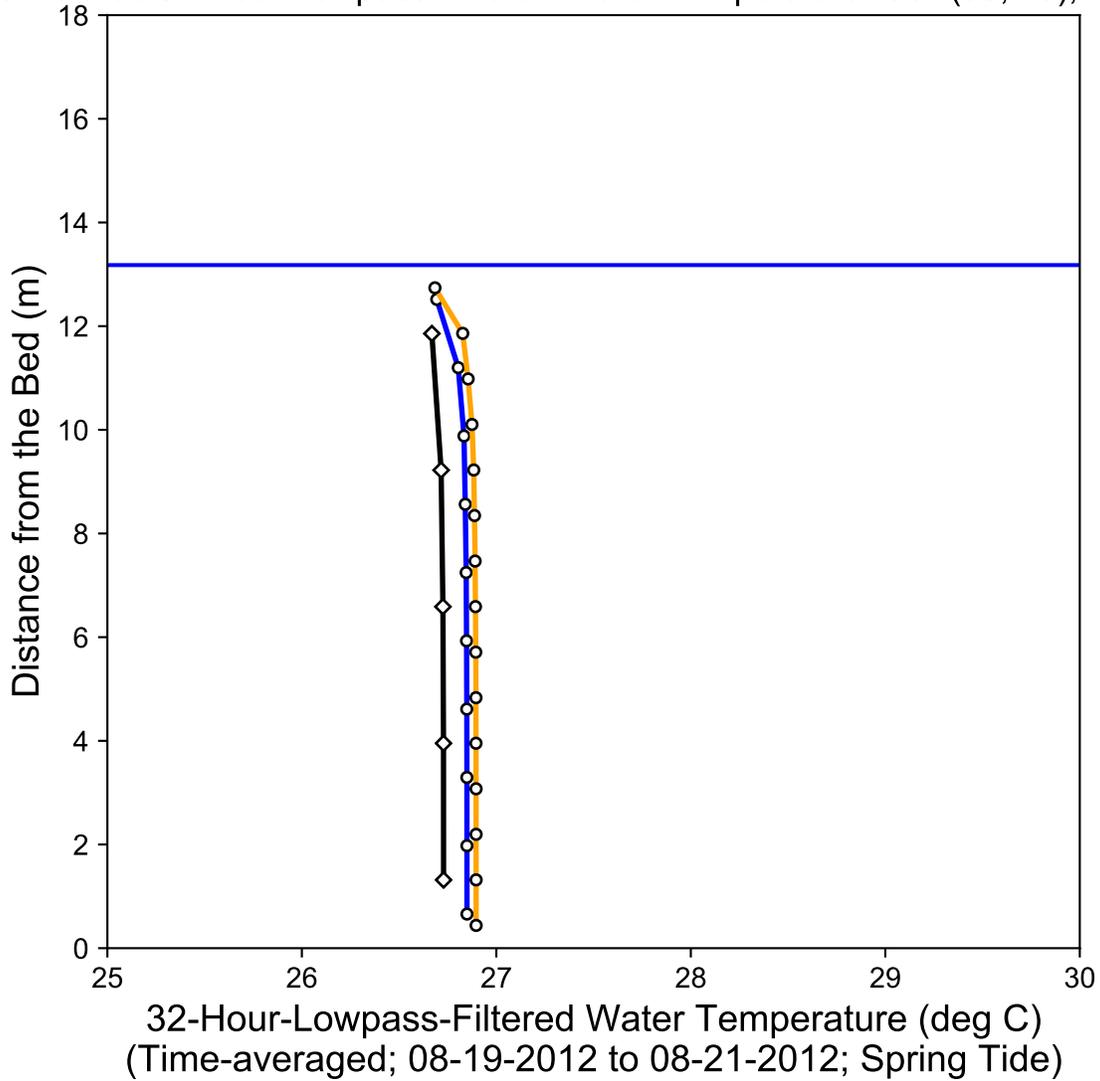

**Figure 3.4-17 (2)**

Simulated 32-Hour-Lowpass-Filtered Salinity during 08-10-2012 to 08-12-2012; Neap Tide at Station S3 at Cell (34, 87), RM 69

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

Simulated 32-Hour-Lowpass-Filtered Water Temperature: Cell (33, 43), RM 37

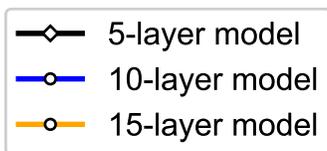

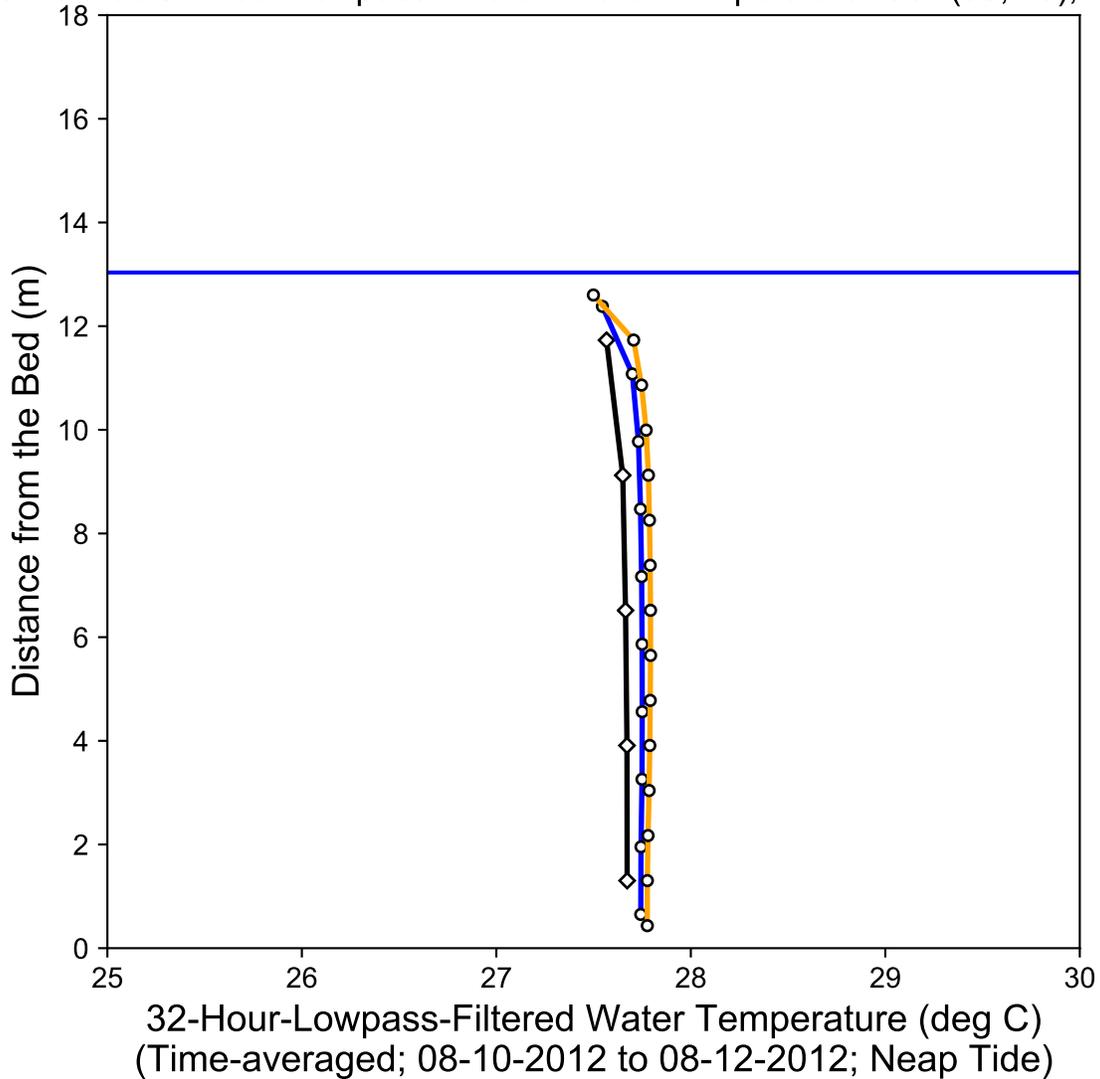

**Figure 3.4-18 (1)**

Simulated 32-Hour-Lowpass-Filtered Water Temperature during 08-19-2012 to 08-21-2012; Spring Tide at Station S1 at Cell (33, 43), RM 37

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

Simulated 32-Hour-Lowpass-Filtered Water Temperature: Cell (33, 43), RM 37

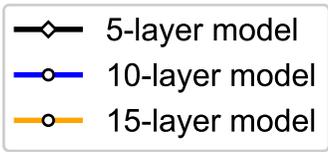

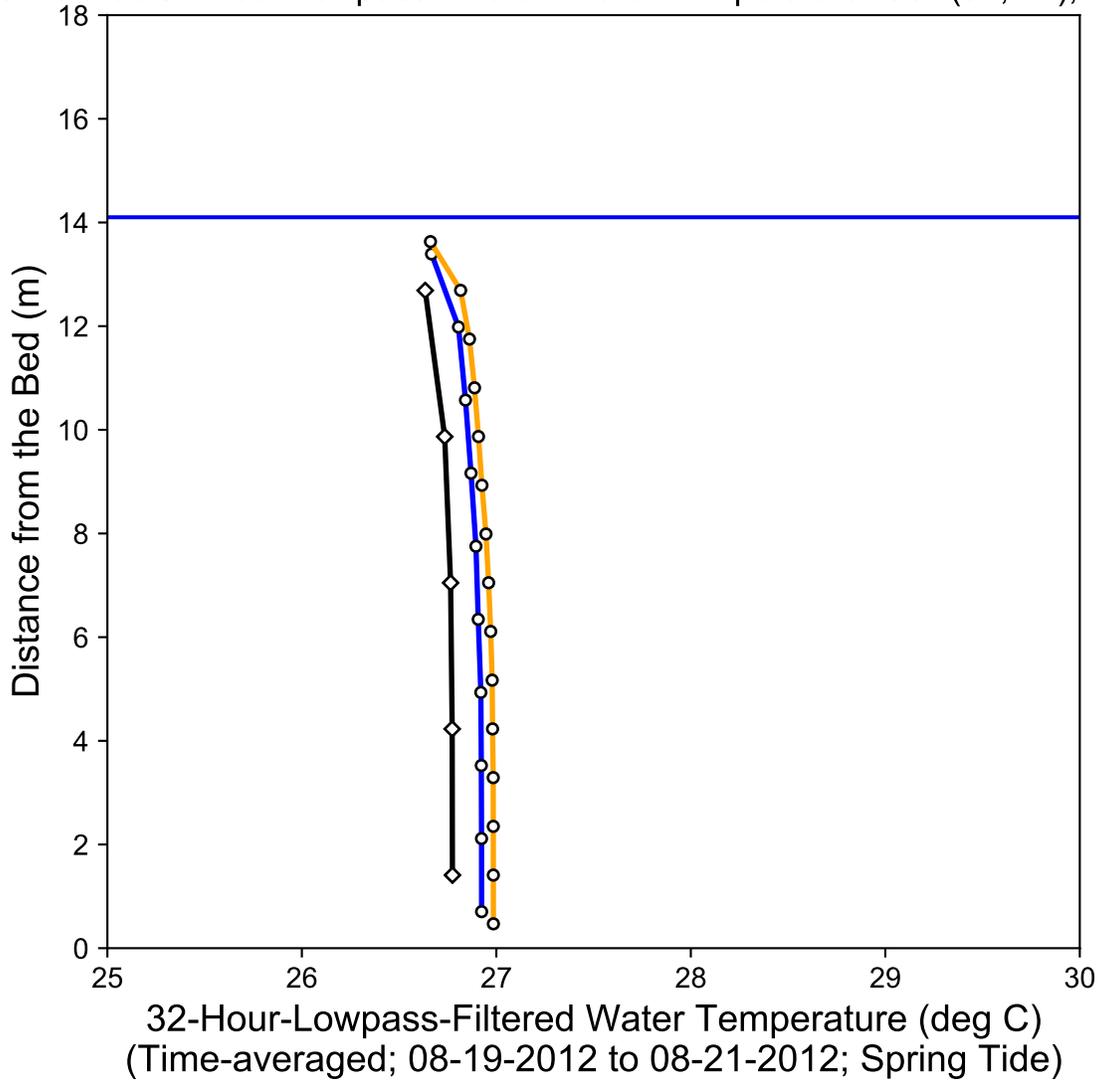

**Figure 3.4-18 (2)**

Simulated 32-Hour-Lowpass-Filtered Water Temperature during 08-10-2012 to 08-12-2012; Neap Tide at Station S1 at Cell (33, 43), RM 37

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

Simulated 32-Hour-Lowpass-Filtered Water Temperature: Cell (32, 47), RM 42

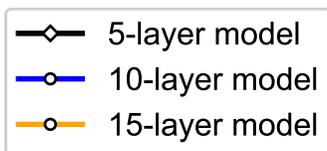

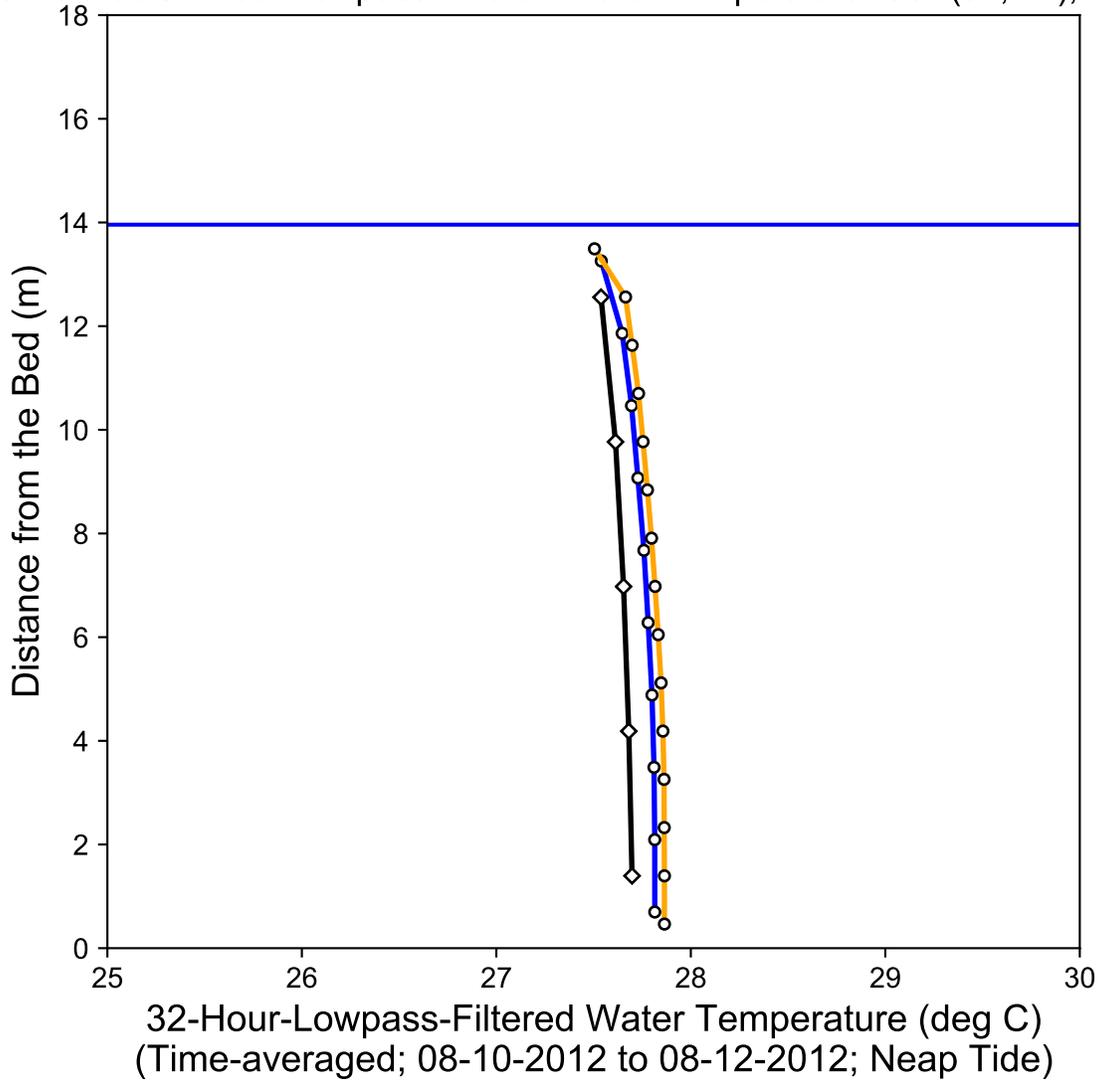

**Figure 3.4-19 (1)**

Simulated 32-Hour-Lowpass-Filtered Water Temperature during 08-19-2012 to 08-21-2012; Spring Tide at Station S2 at Cell (32, 47), RM 42

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

Simulated 32-Hour-Lowpass-Filtered Water Temperature: Cell (32, 47), RM 42

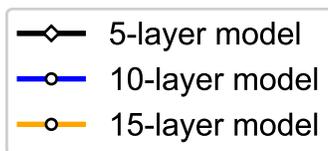

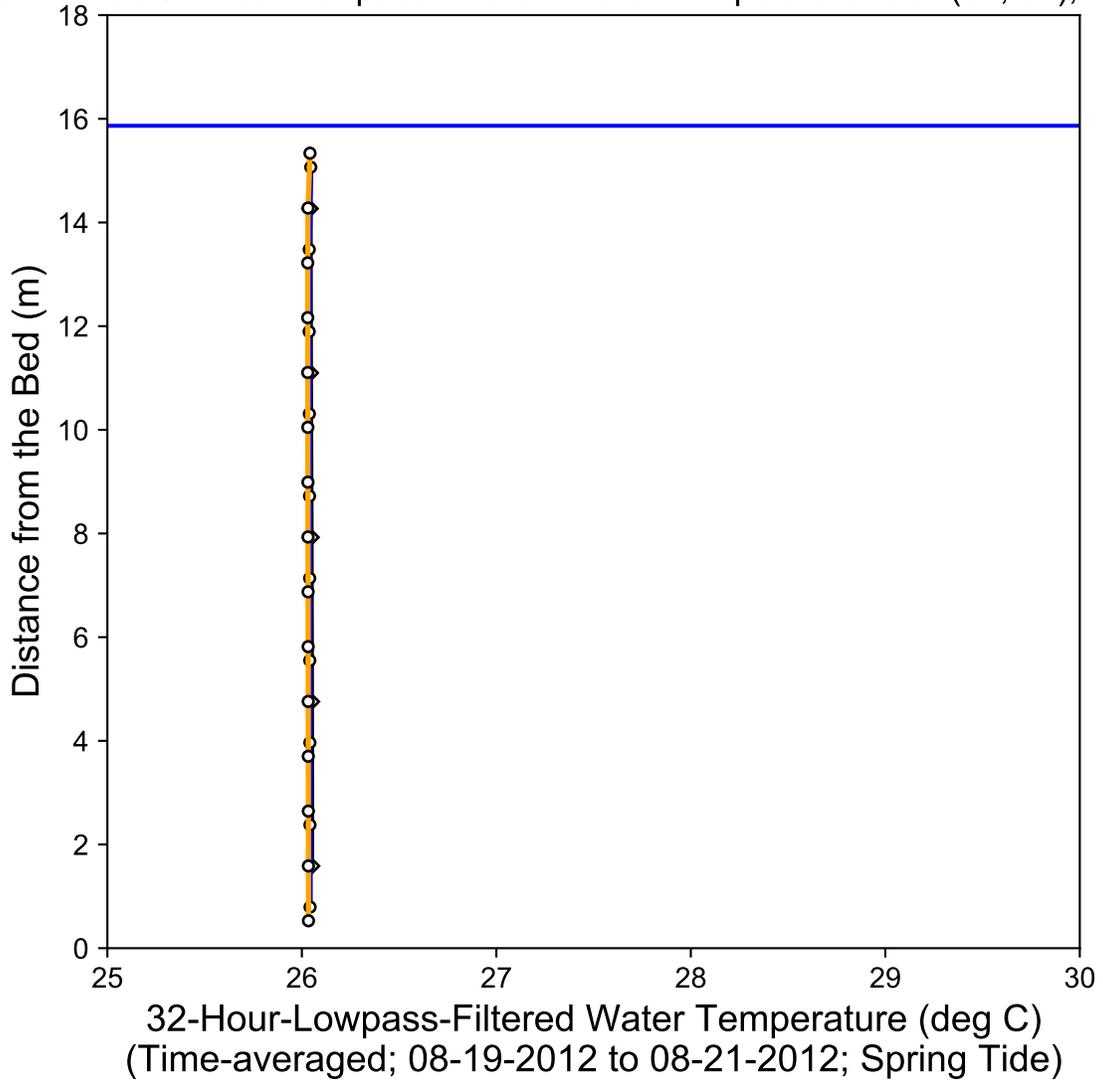

**Figure 3.4-19 (2)**

Simulated 32-Hour-Lowpass-Filtered Water Temperature during 08-10-2012 to 08-12-2012; Neap Tide at Station S2 at Cell (32, 47), RM 42

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

Simulated 32-Hour-Lowpass-Filtered Water Temperature: Cell (34, 87), RM 69

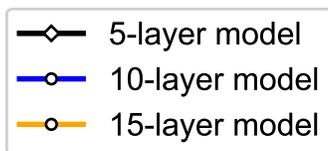

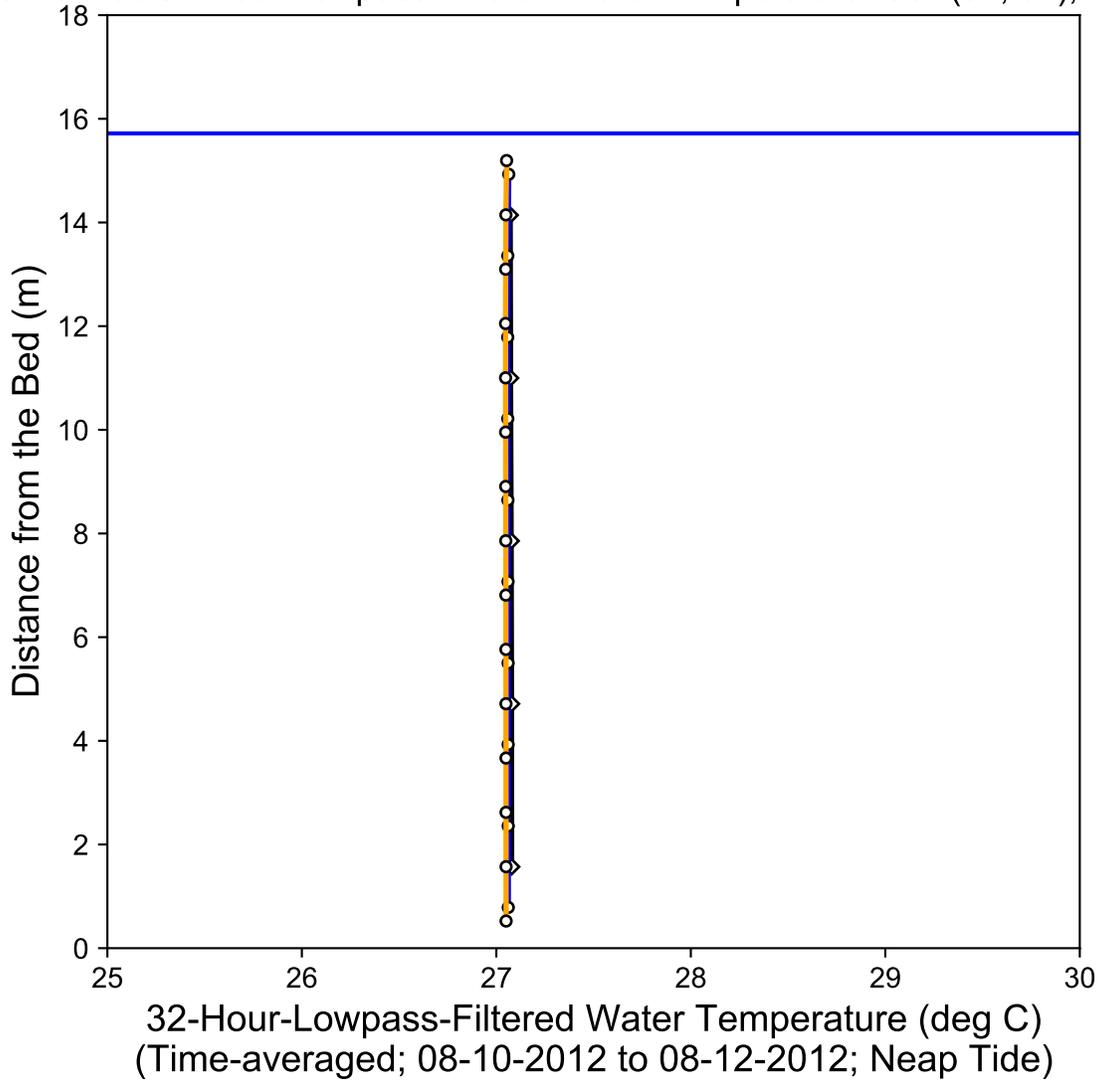

**Figure 3.4-20 (1)**

Simulated 32-Hour-Lowpass-Filtered Water Temperature during 08-19-2012 to 08-21-2012; Spring Tide at Station S3 at Cell (34, 87), RM 69

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.

Simulated 32-Hour-Lowpass-Filtered Water Temperature: Cell (34, 87), RM 69

**Figure 3.4-20 (2)**

Simulated 32-Hour-Lowpass-Filtered Water Temperature during 08-10-2012 to 08-12-2012; Neap Tide at Station S3 at Cell (34, 87), RM 69

Notes: LPFed results were calculated first, and then averaged over the time period to represent the mean vertical structure. Shaded area represents the profile of the 15-layer model.
