Multivariate Analysis Thermal Stress at Lordville

Del. R. Basin Comm., SEF

Feb 2019

Mission: To protect, conserve, and enhance the Commonwealth's aquatic resources and provide fishing and boating opportunities

Multivariate Approach

- Attempt to classify thermal type @ Lordville
 - Analogous to classifying species (meristics & morphometrics)
- Attempts identify relative influences of predictor variables explain most variation
 - Pattern recognition for constituting thermal stress
- Defined classification scheme
 - Cold: ≤ 68 °F
 - Tolerate: > 60 °F but < 75 °F
 - Stress: ≥ 75 °F but < 77 °F
 - Lethal: ≥ 77 °F

Frequency of Hourly Thermal Types

2008-'18	Hourly Thermal Grouping						Total Cum.	Percent	Percent
Month	Cold	Toler	Stres	Leth	Unk	Hour Possible	In Stress	In Lethal	
5	7548	584	41	11	0	8184	0.5%	0.1%	
6	6086	1741	67	25	1	7920	0.8%	0.3%	
7	4341	3486	252	82	23	8184	3.1%	1.0%	
8	6377	1716	77	13	1	8184	0.9%	0.2%	
9	7424	389	11	0	96	7920	0.1%	0.0%	
Total	31776	7916	448	131	121	40392	1.1%	0.3%	

79 % all hours are classified as being $\leq 68^{\circ}\text{F}$

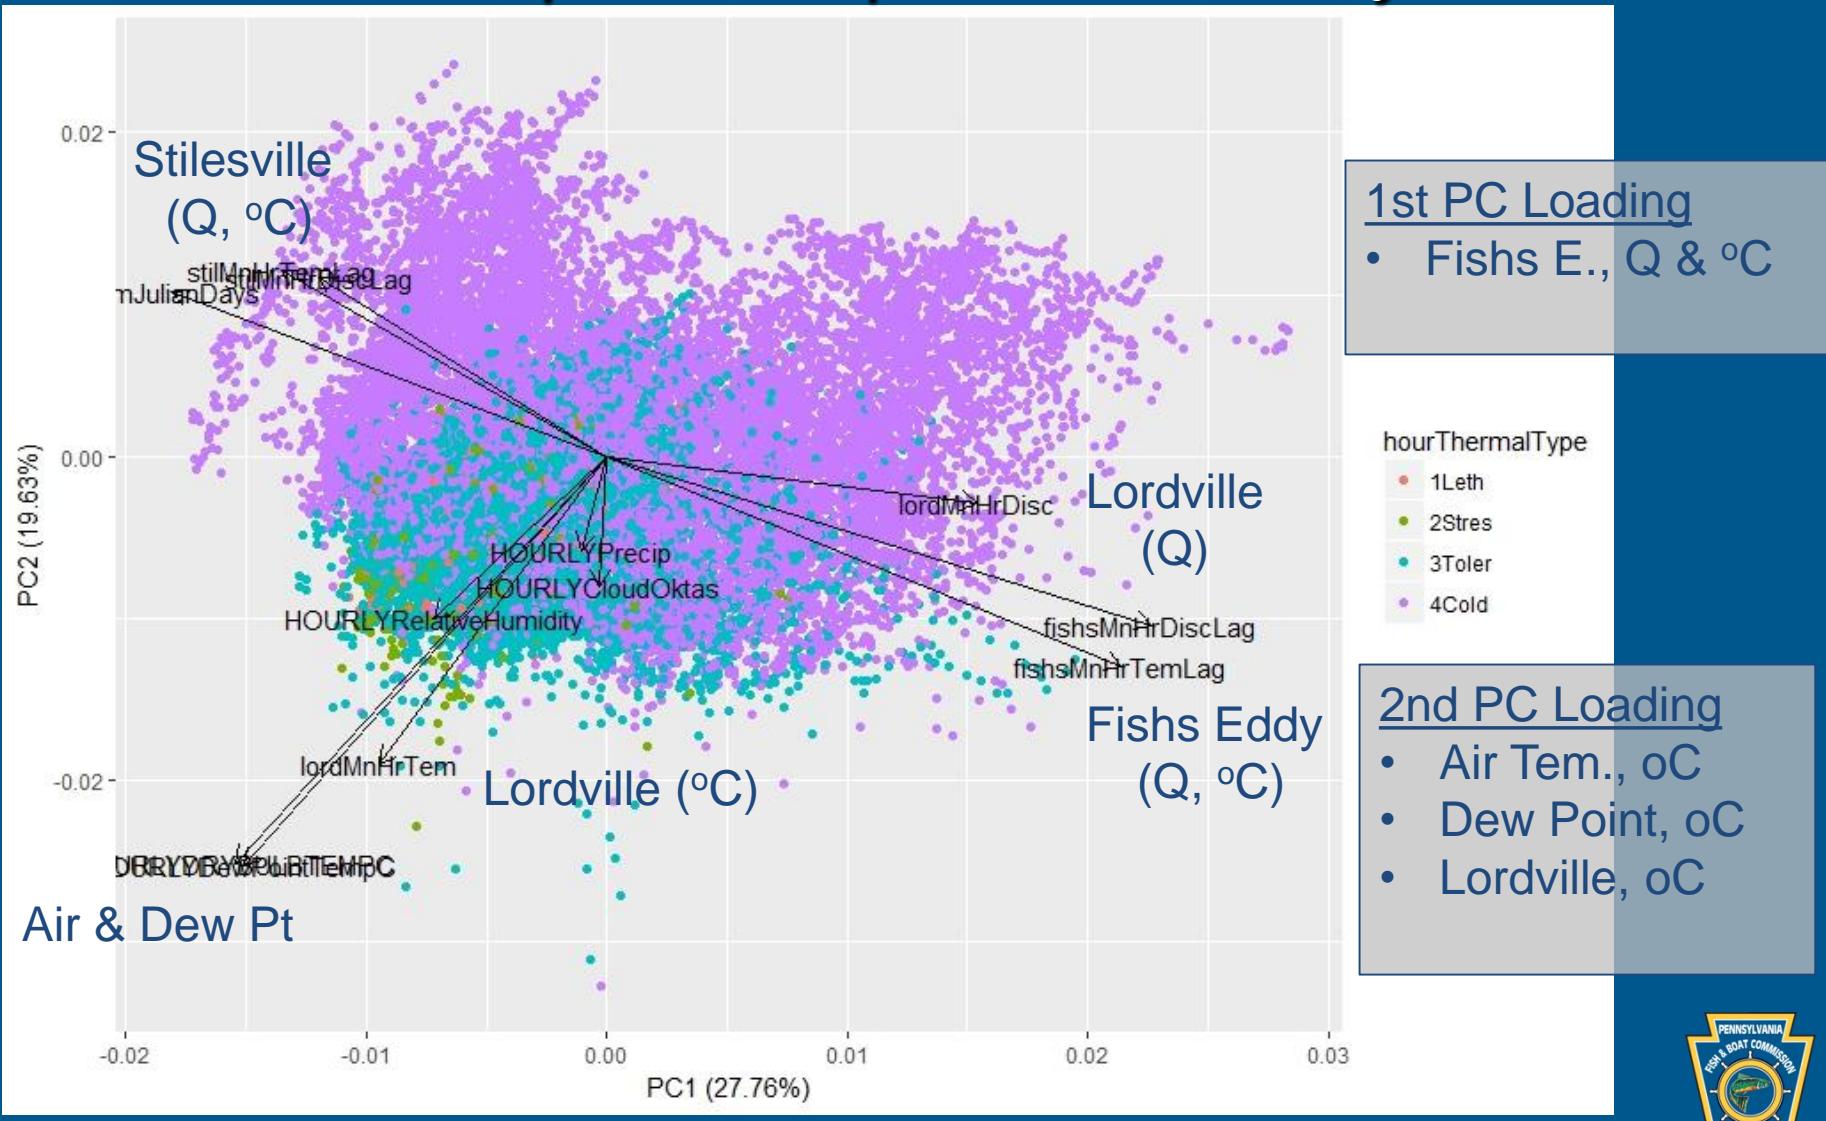

Data Handling

- Use hour temporal resolution, 2008-2018 (Apr-Oct)
 - Mean of every USGS Gage 15-minute obs
 - Exclude > 2,000 cfs @ Lordville
 - Exclude dates of known thermal releases
 - Binghamton hour weather obs
- Normalized variables (i.e., Mean = 0; Std = 1)
- Predictor variables (N = 12)
 - Lordville, Stilesville, lag & Fishs Eddy, lag (Q, °C)
 - Air Tem. (°C)
 - Dew Point (°C)
 - Re. Hum. (%)
 - Precip. (inches)
 - Cloud Cov. (%)
 - Julian hour (#)

Linear Discriminant Function Analysis

Summary

- Principal Components Analysis
 - Able to pattern recognize what constitutes thermal stress
 - Lordville Water °C & Air °C are best variables for identifying those occurrences
 - Difficult to interpret not overly adaptable to forecasting
- Linear Discriminant Functions Analysis
 - Separation of thermal events based on °C
 - Inability to accurately classify test “forecast” classification
 - Pursue parametric assumption violations and/or non-metric multidimensional scaling
