Director of Guidance Services
West Windsor-Plainsboro High School

Karl Riemann
Curriculum Assistant
Hamilton Township Schools

Frank Severage
Director of Student Personnel Services
Bridgewater-Raritan Public Schools

Marie Yandolino
Counselor
Union Hills High School, Union City

Greg Youngman
Director of Guidance
Princeton High School
Acknowledgements

The New Jersey Model is the product of two years of development by the New Jersey Developmental Guidance and Counseling Initiative Steering Committee. The Steering Committee wishes to acknowledge the support and benefits received from many persons and their publications.

- The New Jersey Association for Counseling Development provided financial and logistical support and enthusiasm to make the New Jersey Model a reality.

- The grass roots initiative by NJACD and the New Jersey School Counselors Association is unique to the development of a state model.

- The many participants of the four Initiative workshops provided the direction and support for the new Model.

- Dr. Thomas Rubino, Director of Student Development, NJDOE, has offered suggestions to our Model for two years.

- Ann DeAngelo of the New Jersey Division of Vocational Education provided training in the National Career Development Guidelines for two districts.

- Dr. Robert Myrich's consultation, encouragement, and interpersonal style has brought new energy to the Initiative. The assumptions of the New Jersey Model are based upon his work.

- Dr. Donna Cavalieri and Judith Randall facilitated task groups working on the New Jersey Model and presented the New Hampshire Guidance and Counseling Project at the 1990 NJPCA Spring Conference.

- Dr. Norman Gysbers introduced the Missouri Comprehensive Guidance Program to New Jersey and assisted districts introducing the National Career Development Standards. His model provided the structural basis to the New Jersey Model.

- Brad Noel and Helen Chapman introduced the Connecticut Model at the North Atlantic Branch Assembly in New Jersey. The Connecticut curriculum development process was very helpful.

- Jamie Buckner shared creative delivery systems from the Comprehensive School Counseling Program in Alaska, and a model to address needs of a diverse state.

- Dr. Courtland Lee presented the multicultural developmental model to New Jersey and offered ways to address the unique needs of African-American students.

- Nancy Perry showed how to begin to change from traditional to developmental guidance in local districts.
Phylis Becker provided a clear understanding of the New Jersey monitoring standards and linked the steps of the monitoring process to developing a comprehensive guidance and counseling program.

Jim Bergin provided curriculum and implementation suggestions from the Oklahoma Model, Building Skills for Tomorrow: A Developmental Guidance Model.

Dr. Tom Trotter’s manual, Walking the Talk, and his presentation at the 1991 ASCA Leadership Development Conference, provided a framework to develop training workshops for New Jersey.

Ilene Schwartz, of The Word Masters, is credited for the quality of this final document. Her professional skills in desktop publishing, her feedback, and editing assistance have been invaluable to this Initiative. We are grateful for her many overtime hours to produce this document.

Jim Gardner, of Altamont Enterprises, has graciously met our rush deadlines and provided many insightful suggestions to enhance this publication.

The Steering Committee is grateful to the many professionals who offered suggestions and shared publications from Ohio, Arkansas, Indiana, Virginia, Iowa, and Wisconsin.
Foreword

Three years ago, members of the New Jersey Board of Education met with ASCA President Jim Whitledge and NJPCA and NJSCA to discuss the needs of school counselors. It was the beginning of a successful grass roots effort across the state to build support for developmental school counseling programs.

We are grateful to the hundreds of counselors who have shared in the New Jersey Developmental Guidance and Counseling Initiative. This document has evolved through steering committee meetings, workshop writing sessions, and the pioneering efforts of our Initiative leaders, recognized below.

Barry Mascari compiled, rewrote, and edited the many drafts with his portable "Mac". He contributed the sections on integrating primary prevention and intervention into developmental school counseling.

Madelyn Healy provided the historical continuity necessary to the evolution of the New Jersey programs, and developed the framework for the evaluation section.

Tassie Livingston developed the workshop programs and conducted registrations. Teams under the leadership of Tassie, Barry, Bob Kashuba, Bruce Morgan, Frank Severage, Jon Cosse, Karl Reiman, and Dave Oliver shared their district programs.

Betty Caccavo initiated the annual Elementary School Counselors Conference as a model professional development program. More than 300 counselors network and promote the best ideas in school counseling each year.

This document would not have been completed without the help of Evey Lukach, and Gerry, Chris and Julia Runte. They have typed, edited, collated, and lived among the papers and books. You have supported this Initiative, and us, with your patience and love.

Jim Lukach                Jane Runte

Preface

The New Jersey Developmental Guidance and Counseling Initiative began as a grassroots effort responding to the needs of New Jersey's school counselors. Faced with shrinking time for counseling, increased caseloads, and non-guidance duties, school counselors sought new program models and multifaceted interventions for the changing student population.

The New Jersey Model focuses upon these needs. Through the Initiative Workshops, New Jersey counselors have learned about K-12 school models, developmental guidance curricula, multicultural models, and multimodal counseling interventions.

Through Steering Committee meetings and writing sessions, the Model has evolved into its working form. The Model will continue to evolve through training workshops, feedback from pilot districts, and ongoing development.

The implementation of the Model is both a process and a product: as a process, local school counseling teams will develop their programs to meet the needs of their students. Students will move through the developmental process from kindergarten through high school to achieve their goals. The Model's product is twofold: the local districts' developmental school counseling plan, and the outcomes realized by individual students through this plan.

This Model emphasizes individual student planning throughout the four program components. Student planning is integrated into each component—counseling, consultation, curriculum and enhancement—to promote the goal of healthy and effective decisions by students.

The emphasis on the counseling team is also intentional. Without a thoughtful, systematic change process, the role and effectiveness of counselors will not improve. As Dr. Fred Krieg noted in his Elementary School Counselors Conference keynote,

"If you always do what you always did, you will always get what you always got."

Professional development is essential to the success of the New Jersey Model. Counselors working together at training workshops, away from stressful offices, will have the time to focus on their future and return to improve their counseling environment.

Administrative support of, and participation in, the development of the written plan is the key to its success. School counselors and their supervisors must share the same vision to 'chart the twenty-first century' for their students.

The Model is presented in seven sections. Section 1 focuses on the Conceptual Model. It identifies key changes in our society, our families, our workforce, our educational system, and presents the mission and developmental philosophy of the Model.

Section 2 describes the four program components which deliver the total school counseling program. Individual student planning and decision-making underscore all of the components.
Section 3 outlines the written plan, resources needed, and a suggested three-year plan to phase in the program.

Section 4 describes how to begin the change process, step by step, with emphasis on the needs assessment and curriculum development.

Section 5 provides a framework for integrating primary prevention and intervention programs for special needs into the model.

Section 6 provides an outline for program and outcome evaluation.

Section 7 lists publications and resources which have been helpful to the Model, and forms which can be used for local districts.

This document is a working draft. It will evolve further as school counseling teams continue to share with each other as they chart the twenty-first century.
Table of Contents

Section 1  The Conceptual Model ............................................. 1
  1.1  New Directions .......................................................... 2
  1.2  Purpose ................................................................. 8
  1.3  Rationale ............................................................... 8
  1.4  Assumptions ............................................................ 9
  1.5  Developmental Approach ............................................. 10

Section 2  Program Model Components ..................................... 11
  2.1  The Comprehensive System ......................................... 12
  2.2  Major Developmental Areas ....................................... 13
  2.3  Program Components ................................................ 17
      Sample Curriculum in the Three Developmental Areas .......... 24

Section 3  The Written Plan ................................................ 29
  3.1  Outline of the Written Plan ....................................... 30
  3.2  Resources Needed .................................................... 31
      Suggested Three-Year Transition Plan .............................. 34

Section 4  Getting Started .................................................. 41
  4.1  Beginning the New While Working in the Old ..................... 42
  4.2  A Step-By-Step Planning Guide .................................... 43
  4.3  The Needs Assessment .............................................. 45
  4.4  Writing Your District Curriculum .................................. 51

Section 5  Integrating Primary Prevention and Intervention Programs  53
  5.1  What is At-Risk? ..................................................... 54
  5.2  On-Going Prevention Activities .................................... 56
  5.3  Intervention Program Models ....................................... 59
NJ School Counseling Initiative

Section 6 Evaluation ................................................................. 61
  6.1 How to Evaluate Your Comprehensive School Counseling Program .... 62
  6.2 Program Evaluation ......................................................... 63
  6.3 Process Evaluation ......................................................... 65
  6.4 Evaluating the New Jersey Model: Putting Counseling Theory into Practice .... 67

School Counseling Program Evaluation/Summary .................. 70

Section 7 Resources ................................................................. 79
  State Program Models ......................................................... 80
  Books ........................................................................ 82

Appendix .............................................................................. 85
