

# Domestic Travel and COVID-19

Wearing a mask over your nose is required on planes, buses, trains, and other forms of public transportation as well as at transportation hubs such as airports.

## Fully vaccinated

### Before and during travel

- People who are fully vaccinated can travel safely within the United States.
- Take precautions to protect others while traveling:
  - In areas with high numbers of COVID-19 cases, consider wearing a mask in crowded outdoor settings and for activities with close contact with others who are not fully vaccinated.

### After travel

- Monitor yourself after travel for symptoms of COVID-19. If symptoms develop, isolate yourself, reach out to your health provider, and consider getting tested.

## Unvaccinated

### Before and during travel

- Get tested with a PCR or antigen test 1-3 days before your trip.
- Take precautions to protect yourself and others:
  - Wear a mask in recommended areas.
  - Avoid crowds and maintain social distancing.
  - Wash your hands often and use hand sanitizer.
  - Do not travel if you are not feeling well.

### After travel

- Get tested with a viral test 3-5 days after travel and self quarantine at home for 7 days.
- If you do not get tested, self quarantine at home for 10 days.
- Avoid being around high risk individuals for 14 days whether or not you get tested.
- Self monitor for COVID-19 symptoms.
