*No HYST in 2016 for Bergen Regional, Deborah, Monmouth Southern Campus, St. Clare's Dover, St. Francis, Raritan Bay Old Bridge, RWJ Rahway, Virtua Marlton

Source: New Jersey Healthcare-Associated Infections for 2016 submitted through the National Healthcare Safety Network (NHSN).

[a]   Expected (E)= # of infections predicted using the 2015 Baseline and risk-adjusted models.
       Important to note that if Expected is <1, the SIR is not calculated as the result is not precise.
[b]   Standardized Infection Ratio (SIR)= Observed (O)/ Expected (E)
‡   Each hospital is compared to the National Ratio=1 which is derived using the CDC's NHSN data from the 2015 baseline.
L   indicates hospital infections are LOWER than infections seen nationally.
H   indicates hospital infections are HIGHER than infections seen nationally.
S   indicates hospital infections are SIMILAR to infections seen nationally.
–   SIR is not calculated because the Expected is < 1.
