Work participation rates refer to the TANF program's federally defined work participation requirements for TANF families to engage in certain core work-related activities to receive their benefits. Currently in New Jersey, single parents must participate in these core activities for 30 hours or more per week, and New Jersey must ensure compliance with the requirement that 50 percent of all TANF families participate in these core activities in the absence of any caseload reduction credit. The application of this credit, earned from a reduction in state TANF caseload, allows New Jersey to reduce its minimum participation rate below this 50 percent level. The TANF work participation rate does not refer to TANF program participation by all eligible families within the State. Please keep in mind that these numbers are preliminary until finalized by the Administration for Children and Families (ACF). Typically, ACF does not publish "official" participation rates until 6 months after the end of the federal fiscal year.

As of July 2005, Food Stamp data is derived from NJ MMIS Shared Data Warehouse. One year % Change only available from July 2004 because of data source change. To retain consistency, all Food Stamp data is restated from July 2003 to present, but readers should be aware that current series indicates counts higher than were reported by the previous series. This apparent increase is due to basing the counts on "during the month" frame of reference for the current series, as distinguished from the "point in time" (end of month) snapshot frame of reference that characterized the previous series.

WFNJ includes two segments, **WFNJ/TANF** for families with children, and **WFNJ/GA** (General Assistance) for single adults and couples without dependent children. The emphasis is on achieving self-sufficiency and limits lifetime receipt of financial assistance to a total of five years.
