# Three Year Strategic Plan January 2014 – December 2016

#### <u>Overview</u>

During March and April of 2013, four large working groups of providers, consumers, family members and Division staff were held to gain input for the purpose of developing a strategic plan for the Division. The groups developed lists of items for consideration in planning the three strategic areas of Move to Managed Care, Workforce Development, and Community Integration. Emphasis was given to items considered most important for overall systems change. These items became the ten priorities identified within as the Strategic Plan.

The DMHAS Strategic Plan outlines the work of the division over the next three years (January 2014 - December 2016). The priorities are being addressed by separate work-teams consisting of a Team Lead and members. It is a multi-phased Plan, with some priorities being focused upon later since they are interdependent on priorities in the first phase. Some of the priorities are very global in nature, and thus will accommodate multiple tasks within the priority. The Strategic Plan only includes priorities that are interdependent with other projects. Those projects with their own independent plans, such as suicide prevention, will complete them in accordance with their independent workplans.

The information below is a high level review of the ten priorities within the three strategic areas. The general areas of focus, start date for the priority and the various offices that encompass the work-teams are included. Each priority will develop its own workplan with key tasks and deliverables, meeting each of the areas of focus listed below.
