OFFICIAL DEFINITION: Cargo Theft - the theft of a **Commercial Shipment**. That is when items **In the Supply Chain** that are being transported from a commercial establishment/business to a commercial establishment/business are stolen.

Cargo Theft Incidents can occur with Part I offenses and Part II offenses.

Positive Example:

A Tractor Trailer containing a load of kitchen appliances being delivered to a commercial establishment from a manufacturing facility is stolen - this situation meets the criteria and should be considered a Cargo Theft.

Negative Example:

A truck making delivery to residences is stolen. This situation would **not** be considered Cargo Theft because the items are no longer considered a "Commercial Shipment" and are no longer "In The Supply Chain".
