Content Note

This dismantled volume contains duplicate copies of miscellaneous tables and statements recording, primarily, statistics on the transport of coal and iron ore on the Morris Canal. While the tables were begun in 1866, information back to 1845 on the coal trade is provided on pages 26 and 42. Entries for the period 1871-1881, following the lease of the canal to the Lehigh Valley Railroad Company, consist mainly of accounts of bills sent to the railroad company's Bethlehem office. The index below lists table headings chronologically (by first year of appearance) under the following subjects: coal, iron ore, lumber, general trade, and miscellaneous. Years and page numbers are provided after each table heading. NOTE: The volume itself also contains an alphabetical index by subject.
