RESOURCE PLANNING AND MANAGEMENT MAPS of the first New Jersey State Development and Redevelopment Plan

This document contains 8.5 x 11" reproductions of Planning Area delineations of the New Jersey State Development and Redevelopment Plan (SDRP) which are produced and released by the NJ Office of State Planning (OSP). The original quadrangle scale (1:24,000) maps are on file and available from the Office of State Planning.

These maps are useful for evaluating the SDRP mapping in a general way. They are not useful for attempting to pin point exact locations, as no base maps exist offering landmark locations, and their scale is too small. It is recommended that the original 1:24,000 scale maps be used for that purpose.

The map is intended to represent areas where specific policy objectives apply. The map can not be used to determine the appropriateness of any particular land use for a site. The map should only be used in conjunction with the entire SDRP. Copies of the SDRP are available from OSP. Any questions relating to the plan or its delineations for the State should be directed to OSP.

The maps reflect the delineations as they appeared on October 29, 1993, including approved amendments requested by Hunterdon and Cumberland counties. Any map amendments adopted since then are not reflected in these delineations. The delineations are scheduled for review and revision every three years.

Other map products available from OSP include U.S.G.S. Topoquad scale (1:24,000) versions of the maps contained in this document, and 1"= 4 mile color map of the plan measuring 28 x 43 inches and selected county RPMM maps (call for availability).
